

OASIS TC Discussion List Proposal (BWS-discuss)

This document is a proposal for the creation of a discussion list for evaluating the interest in proposing a new OASIS TC for biometric web services (BWS).

Name

The name of the discussion list should be **bws-discuss**.

Statement of Scope

The purpose of the TC under consideration is to define, enhance, and maintain open standards that facilitate the use of biometrics and biometric operations over a services oriented architecture, such as web services. At its inception, the TC will specifically target web services for biometric devices—a specification describing a suite of sensor- and modality-agnostic ‘low-level’ acquisition operations (e.g., sensor initialization, sensor configuration, data capture, data transfer.)

Proposers

Cathy Tilton, cathy.tilton@daon.com, Daon

Ross J. Micheals, ross.micheals@nist.gov, NIST (Sponsor-level member)

Brad Wing, bradford.wing@nist.gov, NIST (Sponsor-level member)

List Leader

Ross J. Micheals, ross.micheals@nist.gov, NIST (Sponsor-level member)

Notes

The proposers request that the Call for Participation be issued on September 21, 2010, to coincide with the 2010 Biometric Consortium Conference.
