# Custom Curriculums in the Blue Mango Learning System

Select Manage Custom Curriculums

Select "Manage Custom Curriculums" from the Window menu. (This will look slightly different on a Windows system - I prepared this tutorial on a Mac).
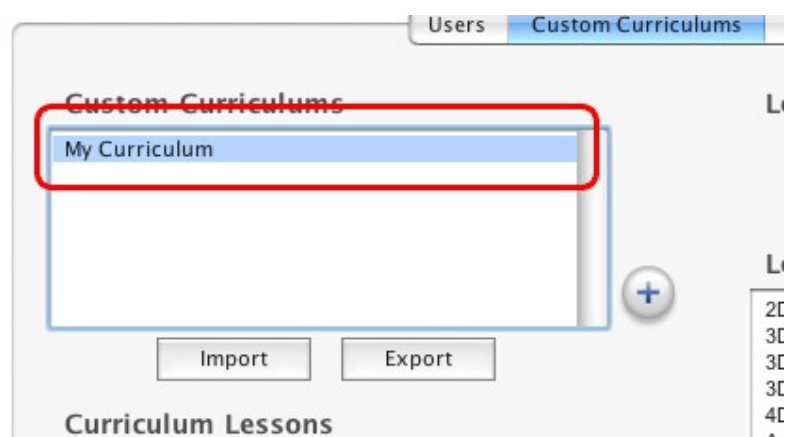

Create a Curriculum

Click on the + button next to the "Custom Curriculums" field.
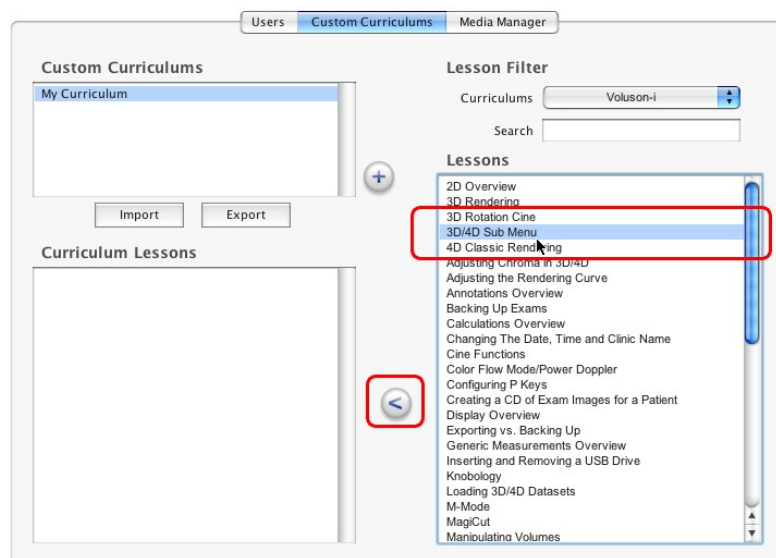

Title Your Curriculum

Give your curriculum a title and press return. You should see it in the list.

# Custom Curriculums in the Blue Mango Learning System

Select a Lesson

Select a Lesson from the list on the right and select the < button. The lesson will be added to the Curriculum Lessons field on the left.

## *Repeat*

Keep adding lessons until you have a few in your curriculum.

# Custom Curriculums in the Blue Mango Learning System

Return to main window

Close the Custom Curriculum
Window and return to the Lesson
Library (you can also select Lesson
Library from the Window list).

Select Your Custom Curriculum

Select the Custom Curriculum you
created from the "Curriculums" drop
down menu.

Custom Curriculums in the Blue Mango Learning System

Your Curriculum

You will now just see the lessons that you added to your curriculum. We don't currently have a feature to create your own groupings. The important thing here is that if you load one of these lessons and it contains a reference to a lesson not in this curriculum you will still be able to load the referenced lesson. This allows you to quickly great new lesson groupings without having to worry about whether dependent material is included or not.
