ebCPPA TC

Dale Moberg, chair ebCPPA, CycloneCommerce/ Axway
Sacha Schlegel, member, CycloneCommerce/ Axway

ebCPPA TC Objectives

- Maintenance of 2.0b specification
- Extensions based on end user feedback.
- Preparation for next ebCPPA spec version:
  - Support of new ebXML Business Process 2.0 specification.
  - Support of upcoming ebXML Message Service 3.0 specification.

Collaborative work with OASIS Universal Business Language (UBL) Small Business Subset (SBS) Subcommittee and OASIS ebXML Business Process Technical Committee

Resulted in Universal Business Process (UBP) a set of very simple and common collaborative business processes (ebBP definitions) using UBL and UBL SBS business documents. The work included the building blocks for any ebXML CPA supporting UBP as well as a set of exemplar CPA's ready to be installed in an ebXML Message Service Handler (MSH) to conduct B2B.

Work highlights the top down approach of collaborative business processes and business documents to collaboration agreements to actual messaging.
