Abstract:

This XML-based Emergency Data Exchange Language (EDXL) Resource Messaging specification describes a suite of standard messages for data sharing among emergency and other information systems that deal in requesting and providing emergency equipment, supplies,

people and teams, This format may be used over any data transmission system, including but not limited to the SOAP HTTP binding.

Status:

This document was last revised or approved by the Emergency Management Technical Committee on the above date. The level of approval is also listed above. Check the current location noted above for possible later revisions of this document.

Technical Committee members should send comments on this specification to the Technical Committee's email list. Others should send comments to the Technical Committee by using the "Send A Comment" button on the Emergency Management TC web page at <http://www.oasis-open.org/committees/emergency/>.

For information on whether any patents have been disclosed that may be essential to implementing this specification, and any offers of patent licensing terms, please refer to the Intellectual Property Rights section of the Technical Committee web page at <http://www.oasis-open.org/committees/emergency/ipr.php>

The non-normative errata page for this specification is located at <http://www.oasis-open.org/committees/emergency/>.

C. REVISION HISTORY	170

1 Introduction

1.1 Purpose

As detailed in the EDXL_DE Specification the goal of the EDXL project is to facilitate emergency information sharing and data exchange across the local, state, tribal, national and non-governmental organizations of different professions that provide emergency response and management services. EDXL will accomplish this goal by focusing on the standardization of specific messages (messaging interfaces) to facilitate emergency communication and coordination particularly when more than one profession or governmental jurisdiction is involved.

The primary purpose of the Emergency Data Exchange Language Resource Messaging (EDXL_RM) Specification is to provide a set of standard formats for XML emergency messages. These Resource Messages are specifically designed as payloads of Emergency Data Exchange Language Distribution Element- (EDXL_DE)-routed messages. Together EDXL_DE and EDXL_RM are intended to expedite all activities associated with resources needed to respond and adapt to emergency incidents. The Distribution Element may be thought of as a "container". It provides the information to route "payload" message sets (such as Alerts or Resource Messages), by including key routing information such as distribution type, geography, incident, and sender/recipient IDs.

The Resource Message is constrained to the set of Resource Message Types contained in this specification. The Resource Message is intended to be the payload or one of the payloads of the Distribution Element which contains it.

1.2 History

Disaster Management (DM) is a communications program in the Department of Homeland Security's (DHS) Office for Interoperability and Compatibility (OIC) and managed by the Science and Technology (S&T) Directorate. The program was initiated as one of the President's e-gov initiatives. DM's mission is to serve as the program within the Federal Government to help local, tribal, state, and federal public safety and emergency response agencies improve public safety response through more effective and efficient interoperable data sharing. The DHS DM program sponsors a Practitioner Steering Group (PSG) made up of representatives of major emergency response associations.

The DM Practitioner Steering Group (PSG) governance was formalized following publication of the EDXL Distribution element. It plays a key role in the direction, prioritization, definition, and execution, and of the DHS-DM program. The group is comprised of representatives of major emergency response associations, setting priorities and providing recommendations regarding messaging standards development as well as the other facets of the DM program.

The PSG specified messaging standards-based systems interoperability as the #1 priority for the DHS Disaster Management program. The EDXL Resource Messaging Specification effort was identified as the top priority standard by this group following the EDXL-DE. The requirements and specification effort was initiated by this group in partnership with industry members of the Emergency Interoperability Consortium (EIC) in a Standards Working Group (SWG). That group developed a draft specification which was submitted to the OASIS Emergency Management Technical Committee to begin work on this EDXL-RM specification.

The process remained the same as with the EDXL_DE specification with the exception that the Technical Committee requested that the initial candidate specification submitted by the expert group be recast as a formal Requirements Document according to a template that the Technical Committee provided to the expert group. The candidate specification was then resubmitted along with this requested requirements document.

1.3 Structure of the EDXL Resource Message

The EDXL Resource Message specification applies to 16 separate specific message types related to the major communication purposes involved in the allocation of resources pertaining to preparation for, response to and remediation of emergency incidents.

The non-normative abstract reference model diagram in Figure 1 in Section 3.1 shows the abstract structural relationships of the main components:

- **Resource Message:** The overall Type of EDXL Payload;
- **Message:** The specific message, primarily of Request or Response general types, but with significant other subtypes;
- **Party:** Organizations and Individuals connected with the message;
- **Resource:** the actual referent of the message, which can be equipment, material substances such as water, people with certain skills, etc;
- **Schedule:** Temporal information such as when requested, when needed, when arrived, etc., associated with the message;
- **Assignment:** Instructions relative to the disposition of Resource or Resources referred to in the message usually related to geospatial and jurisdictional information.

The Element Reference Model in Figure 2 in Section 3.2 gives a more concrete view of the structure common to all Resource Messages.

Table 1 in Section 3.3 provides a Resource Message Type Summary of the 16 specific types of Resource Message.

Figure 3 in Section 3.3 illustrates the three primary types of behavior which Resource Messages enable :

- **Discovery;**
- **Ordering;** and
- **Deployment.**

Table 1: in Section 3.3 provides a Resource Message Type – Element Matrix where each row represents a specific message element grouped by functional categories and each column represents a specific message type. Thus one can determine whether any combination of message element and message type is Required, Conditional, or Optional.

Each specific message type is fully described in Sections 3.3.1 through 3.3.16

1.4 Terminology

The key words “MUST”, “MUST NOT”, “REQUIRED”, “SHALL”, “SHALL NOT”, “SHOULD”, “SHOULD NOT”, “RECOMMENDED”, “MAY”, and “OPTIONAL” in this document are to be interpreted as described in **Error! Reference source not found..**

2 Design Principles and Concepts (non-normative)

Below are some of the guiding principles of the Resource Message:

- Provide a standard message format for the Resource Message
- Provide separate specific formats for the discrete, distinct Resource Message Types
- Enable dissemination of messages based on geographic delivery area
- Use and re-use of data content and models developed by other initiatives
- Business process-driven specific messaging needs across emergency professions
- Supporting everyday events and incident preparedness, as well as disasters
- Facilitate emergency information sharing and data exchange across the local, state, tribal, national and non-governmental organizations of different professions that provide emergency response and management services

2.1 Requirements for Design

The initial requirements submitted to the Technical Committee by the EDXL Standards Working Group described in Section 1.2 can be reviewed :

EDXL Resource Messaging Standard Requirements Supplement, workgroup

<http://www.oasis-open.org/committees/download.php/14981/EDXLRqmtsSupplement101905.doc>,
October 19, 2005

In summary, the EDXL Resource Messaging specification should

1. Define a detailed message format structure for the following specific EDXL Resource Message Types: (Note that requirements that are self-evident from Message Type names are not separately listed)
 - a. RequestResource
 - b. Response to Request Resource
 - c. Requisition Resource
 - d. Commit Resource
 - e. Request Information (RFI)
 - f. Response to Request Information
 - g. Offer Unsolicited Resource
 - h. ReleaseResource
 - i. Request Return
 - j. Response to Request Return
 - k. Request Quote
 - l. Response to Request Quote
 - m. Request Resource Deployment Status
 - n. Report Resource Deployment Status
 - o. Request Extended Deployment Duration
 - p. Response to Request Extended Deployment Duration
2. Explicitly specify use of EDXL_DE as the routing mechanism for the EDXL Resource Message
3. Provide the ability to specify a desired geographic Resource delivery area, provide for notice of Resource demobilization and the ability to communicate information to provide for returning Resource
4. Provide ability to accept or decline a Response to Request Resource that indicates requested Resource is available or to accept or decline an Offer of Unsolicited Resource
5. Provide the ability to cancel any Resource Message (actual method is Message Recall)

6. Provide the ability to reference specific incidents in Resource Message
7. Provide unique identifier for each message as well as the ability to reference previous messages, including but not limited to originating message in a given sequence
8. Provide the ability to specify Date and Time of Resource Message, referenced messages, scheduling information, assignment information and specific instructions
9. Provide the ability to report Disposition of referenced Resource Message(s)
10. Provide the ability to specify contact information of individuals responsible for Resource Message(s) and/or Resource(s)
11. Provide the ability to specify funding information for Resources
12. Provide the ability to reference external lists for Resource Message content
13. Provide the ability to fully describe Resource(s)
14. Provide the ability to specify Special Requirements such as protective equipment or specific skill credentials, e.g. certifications, licenses
15. Provide the ability to specify Resource Information for purposes beyond identification and qualification such as scheduling and assignment.

2.2 Example Usage Scenarios

Note: The following examples of use scenarios were used as a basis for design and review of the EDXL Resource Messaging Specification. These scenarios are non-normative and not intended to be exhaustive or to reflect actual practices.

2.2.1 Safecom Explosion

This scenario follows the detection of a noxious aerosol substance leak at a demical plant that produces toxic materials, including evacuations, requests for hazmat teams and the evolution of the incident into an explosion that destroys the leak sit and an adjacent building with casualties requiring emergency healthcare teams, full incident command establishment, responses of various kinds and clean up

Full use case available: http://www.oasis-open.org/committees/download.php/14410/EDXL_use_example_SafecomExplosion%20060805.doc

2.2.2 Cedar Fire Incident

This is an actual use case that follows the events of the “Cedar” fire incident in late October and November 2003 in San Diego County, California. Operation Center (EOC) has been activated, and requests the agencies to be on alert. This follows the lack of radio interoperability and poor coordination of mutual aid in the area due to several other fires during the period and previously

Full use case available: http://www.oasis-open.org/committees/download.php/14411/EDXL_use_example_Fire061005.doc

2.2.3 Hurricane

This scenario modeled a category 5 hurricane several months prior to the start of the 2005 hurricane season in earnest, and follows many different kinds of resource requests and evolving situations as a widespread incident with mass casualties and damage occurs.

Full use case available: http://www.oasis-open.org/committees/download.php/14412/EDXL_use_example_Hurricane061005.doc

2.2.4 Pandemic Influenza

This scenario models an Influenza Pandemic outbreak at Phase 6 (Increased and pre-sustained transmission in general population) as determined by the State Health Agency/Public Health Department. It includes such activities as requesting medical facilities to take stock and determine what resources are readily available and on hand (inventory of available supplies). It includes a wide range of resource messages such as requests for vaccines and anti-virals.

Full use case available: http://www.oasis-open.org/committees/download.php/14411/EDXL_use_example_Influenza_06152005%20LaniGrahmRev.doc

3 EDXL Resource Messaging Model (Non-normative)

3.1 Abstract Reference Model

Figure 1 below shows the Resource Messaging Abstract Reference Model (RM-ARM). The purpose of the RM-ARM is to highlight the high-level structure of the RM framework and the relationships between the main entities.

The Resource Message contains either one of two major message categories: a Request or a Response message; or a minor message category type, a Report message;. These two major and one minor message categories form the underlying framework for all messages. The Resource Message also contains information on the Party (person or organisation) that plays a significant Role in the message transaction. Funding information can also be specified.

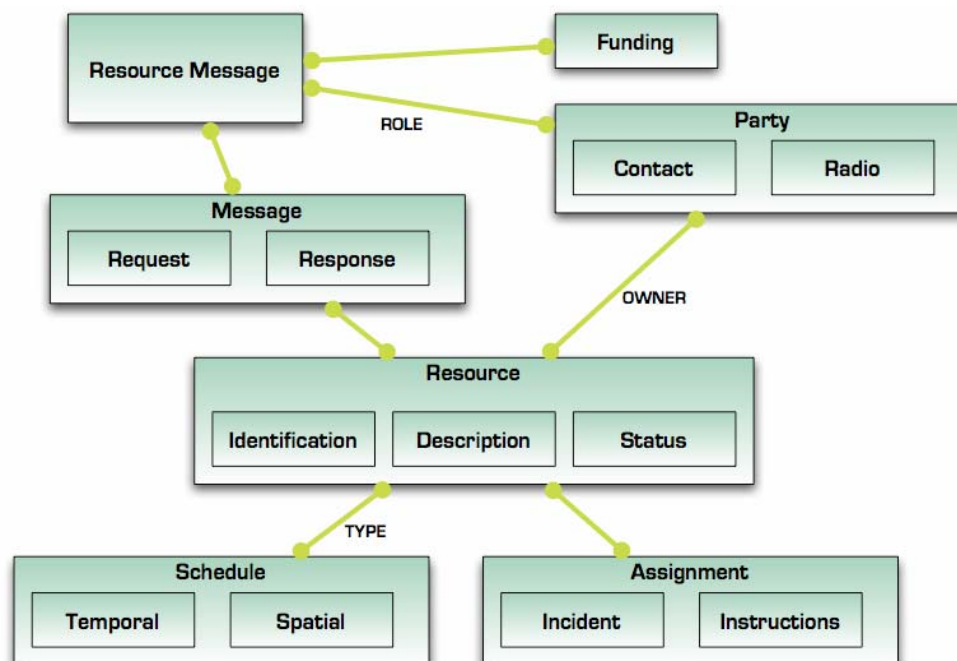

Figure 1: Resource Messaging – Abstract Reference Model

The core of any message is the Resource. A Resource contains information about its Identity, Description and its Status. A Resource owner can also be identified.

A Resource may also have a schedule which includes Temporal and Spatial details. For example, the expected arrival time and place for a specific resource. There are a number of types for Schedules.

A Resource may also have information about its Assignment including the identified Incident and Instructions related to the incident assignment.

3.2 Element Reference Model

Figure 2 below shows the EDXL–RM Element Reference Model (ERM). The purpose of the ERM is to highlight the low-level structure of the RM framework and the relationships between the main entities and their elements.

It is important to note that the ERM should not be used as an implementation model as the exact semantics and structure is captured in the subsequent sections on the Resource Message Types.

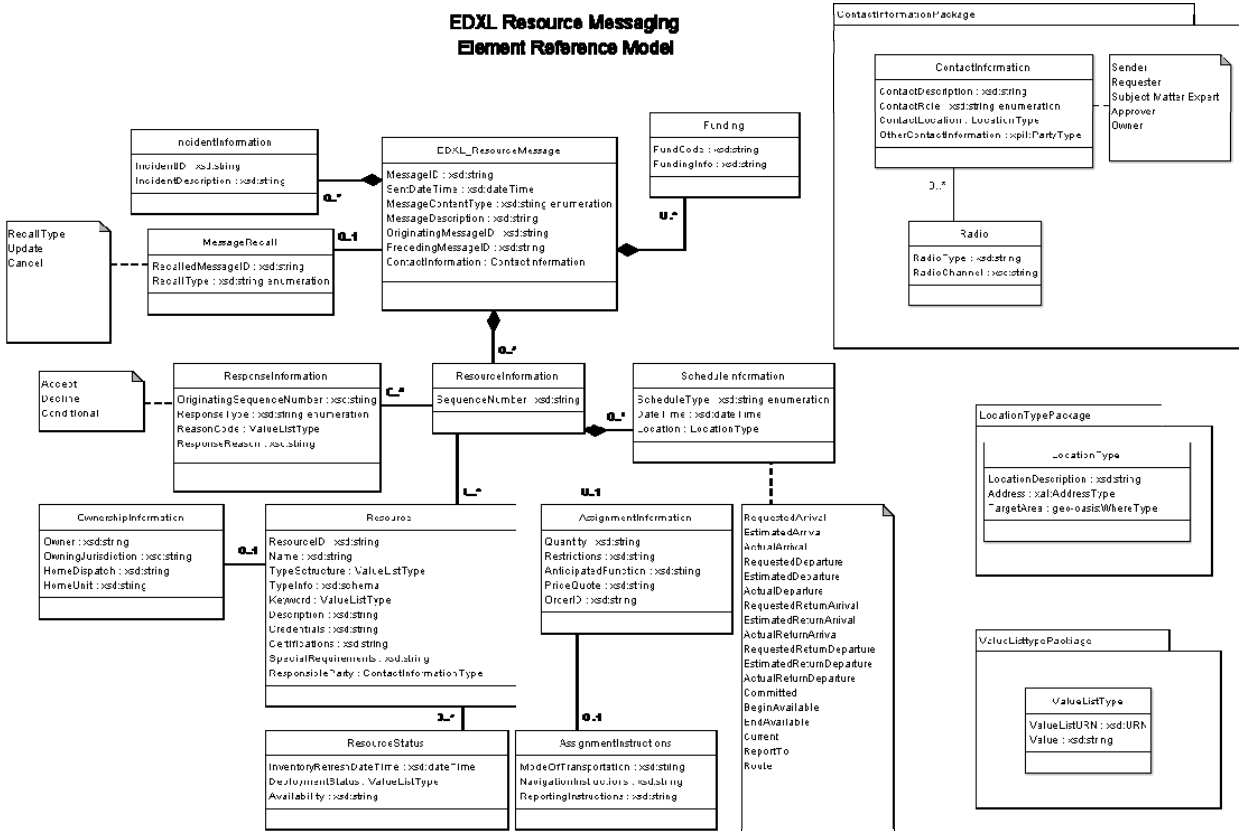

Figure 2: Resource Messaging – Element Reference Model

The RM-ERM shows the element-level details for the main entities in the RM. The semantics for each of the elements is defined in Section Error! Reference source not found..

3.3 Resource Message Types

The general RM framework is based on a Request/Response model. Most of the Request messages expect a Response, and in some cases, messages are used to notify others of changes or offers of resources.

This two-way communication is characterised by two classes of primary actors. The Resource Consumer is an actor that needs or requires resources to undertake response to an incident. The Resource Supplier is an owner, or distributor, or manager of resources that can meet the needs of Resource Consumers. There may be more than one actor of each class for a given sequence of message exchanges, and there may also be other classes of actors besides these two primary types.

There are 16 resource messages defined in this specification, which are summarized in Table 2 below.

Table 2: Resource Message Type Summary

Message Type	Description	Message Sender
Request Resource	Message used to request needed resources from one or many recipients, possibly spawning multiple responses. [RequestResource]	Resource Consumer
Response to Request Resource	Message used as the response to a "Request Resource". Allows sender to list resource(s) which they feel represent suitable match with a resource request. [ResponseToRequestResource]	Resource Supplier
Requisition Resource	Message used to "order" specific resource, or to confirm specific resource to be "ordered" relating to one or more responses to a "Request Resource". [RequisitionResource]	Resource Consumer
Commit Resource	Message used to agree or commit specific resource in response to a Resource Request or Requisition, or to a "Request Return". [CommitResource]	Resource Supplier
Request Information (RFI)	Message used to ask resource questions or provide general description of situation and general resources needs. [RequestInformation]	Resource Consumer
Response to Request Information	Message used as the response to an RFI message providing general information or to list resource that may meet the specified need. [ResponseToRequestInformation]	Resource Supplier
Offer Unsolicited Resource	Message used to offer available resources (that have not been requested) to assist with an emergency response. [OfferUnsolicitedResource]	Resource Supplier
Release Resource	Message used at the incident to "release" (demobilize) resource back to its original Supplier. [ReleaseResource]	Resource Consumer
Request Return	Message used to request release (demobilize) of resources back to its original point of assignment or to another location / assignment ("I want my stuff back"). [RequestReturn]	Resource Supplier
Response to Request Return	Message used as the response to a "Request Return" indicating whether the resource may be released, with relevant time-line information. [ResponseToRequestReturn]	Resource Consumer
Request Quote	Message used to request a price quote from a seller or supplier. [RequestQuote]	Resource Consumer
Response to Request Quote	Message used as the response to a "Request Quote". Allows sender to list resource(s) which they feel represent suitable match with the request, with pricing information. [ResponseToRequestQuote]	Resource Supplier
Request Resource Deployment Status	Message used to request current "status" of resource. [RequestResourceDeploymentStatus]	Both
Report Resource Deployment Status	Message used to report on the current "status" of any resource. [ReportResourceDeploymentStatus]	Both
Request Extended Deployment Duration	A request initiated by the requester / receiver of resource, "I want to extend how long I need to keep this resource" [RequestExtendedDeploymentDuration]	Resource Consumer
Response to Request Extended Deployment Duration	Message used as the response to "Request Extended Deployment Duration". [ResponseToRequestExtendedDeploymentDuration]	Resource Supplier

259

260 The remainder of this section is informative only. It is included to show how the resource messages might
261 flow between the Resource Consumer and Resource Supplier during resource management. Note,

however, that this specification does not prescribe the sequence of message exchanges, except for some dependencies between messages which are described in Section 3.3.1.

The Resource Messages can be used in three phases of resource management:

- Discovery,
- Ordering, and
- Deployment, as shown in Figure 3.

The Discovery phase enables Resource Consumers to find out about available resources, including their costs, and offers of resources from Resource Suppliers.

The Ordering phase enables Resource Consumers to explicitly requisition Resources from Resource Suppliers.

The Deployment phase enables both actors to find about the current status of resources in the field, request extensions and returns.

It is important to note that this specification does not mandate an exact order and workflow of Resource Messages. For example, the Ordering phase may actually only require the Commit Resource message for some actors.

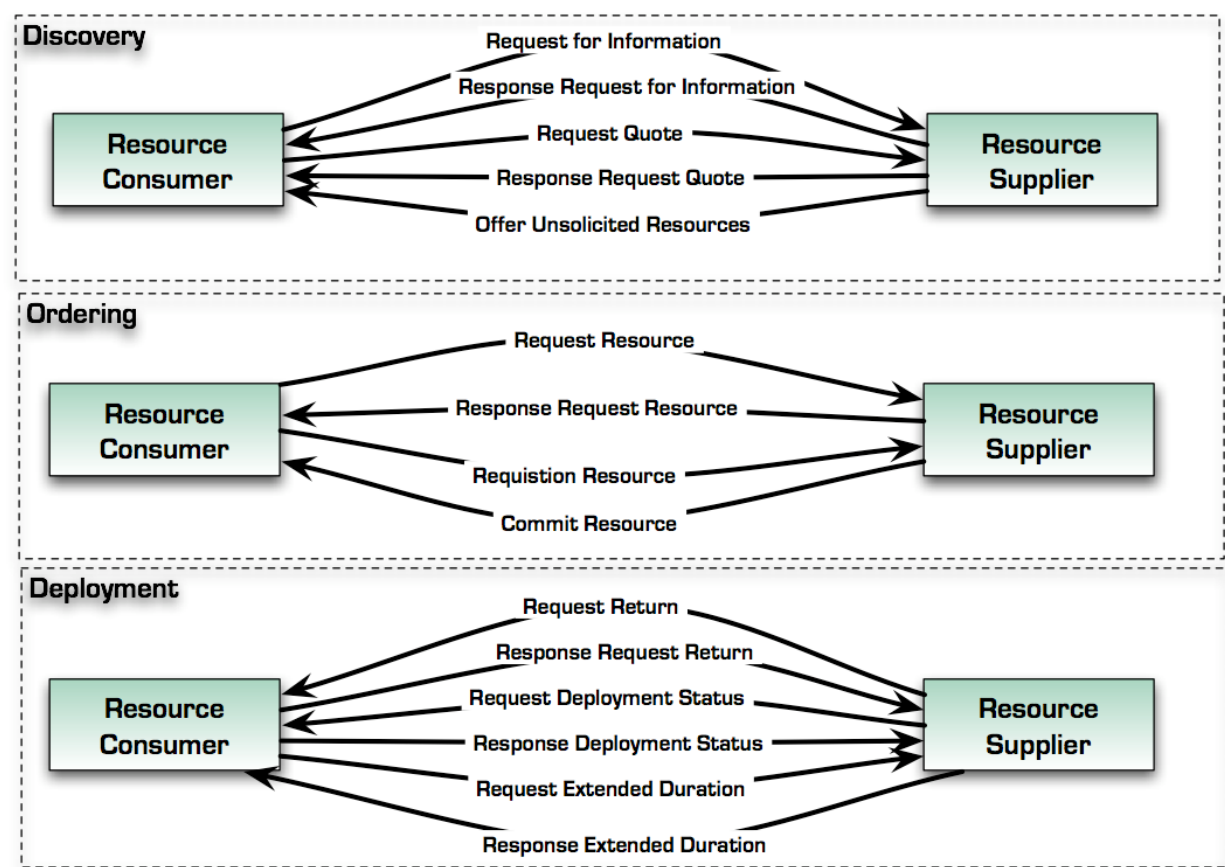

Figure 3: Resource Message Phases

Table 3 summarises all the Message Types and their element contents. The specific details on each of the Message Types are outlined in the following sections.

Table 3: Resource Message Type – Element Matrix (Key: R = Required, C = Conditional, O = Optional, N/A – Not Applicable to the message type)

Schema Segment	Message Element	Request Resource	Response to Request Resource	Requisition Resource	Commit Resource	Request Information (RFI)	Response to Request Information	Offer Unsolicited Resource	Release Resource	Request Return	Response to Request Return	Request Quote	Response to Request Quote	Request Resource Deployment Status	Report Resource Deployment Status	Request Extended Deployment Duration	Response to Request Extended Deployment Duration

Table 4: Resource Message Type – Element Matrix (Key: R = Required, C = Conditional, O = Optional, N/A – Not Applicable to the message type)

3.3.1 Request Resource Message

3.3.1.1 Overview

The *Request Resource* message is used as a broad area announcement for resource needs. Emergency Managers, Incident Commanders, First Responders use this message to request information on availability of resources that they need.

3.3.1.2 Element Reference Model

Figure 4 below shows the EDXL–RM Element Reference Model (ERM) tailored for the Request Resource Message. The ERM shows the element-level details for the main entities in the RM.

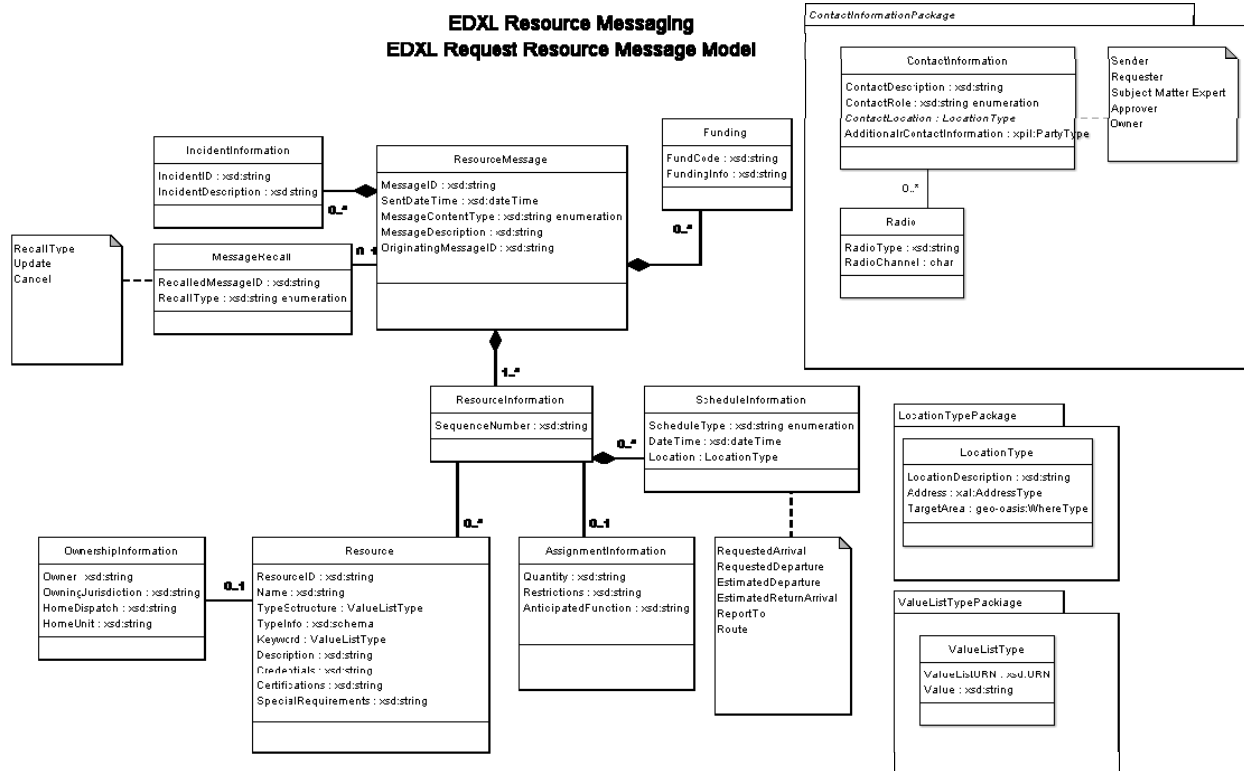

Figure 4: EDXL-RM ERM for Request Resource Message

The following table outlines the element and attribute cardinalities for this message type, as follows:

- **bold** indicates an element/attribute that is required
- *italics* indicate an element/attribute that is conditional (the applicable rules for these elements appear below the table)
- an asterisk (*) indicates that an element/attribute can appear multiple times
- a caret symbol (^) indicates that the values of an element/attribute are constrained, as per the rules shown below the table.

All elements/attributes that are not shown in bold or italics are optional.

Table 5: Request Resource Message Elements

Parent Element	Sub-Elements
ResourceMessage	MessageID , SentDateTime , MessageContentType [^] , MessageDescription, OriginatingMessageID , IncidentInformation*, MessageRecall, Funding*, ContactInformation*, ResourceInformation*
IncidentInformation	<i>IncidentID</i> , <i>IncidentDescription</i>
MessageRecall	RecalledMessageID , RecallType
Funding	<i>FundCode</i> , <i>FundingInfo</i>
ResourceInformation	SequenceNumber , Resource , AssignmentInformation, ScheduleInformation*
Resource	<i>ResourceID</i> , <i>Name</i> , <i>TypeStructure</i> , <i>TypeInfo</i> , Keyword *, Description, Credentials, Certifications, SpecialRequirements

AssignmentInformation	Quantity, Restrictions, AnticipatedFunction
ScheduleInformation	ScheduleType[^] , DateTime, Location

310 The following rules apply to the above elements/attributes:

- 311 • The ResourceMessage:MessageID, ResourceMessage:SentDateTime
- 312 ResourceMessage:MessageContentType, ResourceMessage:OriginatingMessageID,
- 313 ResourceMessage:ContactInformation, and ResourceMessage:ResourceInformation elements MUST
- 314 be present.
- 315 • The value of ResourceMessage:MessageContentType MUST be "RequestResource".
- 316 • If a ResourceMessage:IncidentInformation element is present, then at least one of
- 317 IncidentInformation:IncidentID and/or IncidentInformation:IncidentDescription MUST be present.
- 318 • If the ResourceMessage:MessageRecall element is present, then the
- 319 MessageRecall:RecalledMessageID and MessageRecall:RecallType elements MUST be present.
- 320 • If a ResourceMessage:Funding element is present, then at least one of Funding:FundCode and/or
- 321 Funding:FundingInfo MUST be present.
- 322 • The ResourceInformation:SequenceNumber and ResourceInformation:Resource elements MUST be
- 323 present.
- 324 • At least one of Resource:ResourceID, Resource:Name and/or ResourceType:TypeStructure MUST
- 325 be present.
- 326 • If the ResourceInformation:ScheduleInformation element is present, then the value of
- 327 ScheduleInformation:ScheduleType MUST be present and contain one of the following values:
- 328 • New Schedule Information: "RequestedArrival", "RequestedDeparture",
- 329 "EstimatedReturnDeparture", "EstimatedReturnArrival", "ReportTo", or "Route".

330

331 The schema for a Request Resource message can be found in Appendix A.3.

332 3.3.1.3 Message Flow

333 The Request Resource message is an initial message created and sent by the Resource Consumer to
334 any number of Resource Suppliers.

335 The potential responses to this message include:

- 336 • Response to Resource Request (See 0)
- 337 • Response may include Accept, Decline, and any Conditional response.
- 338 • Acknowledgement
- 339 • The EDXL-DE is used for a message acknowledgement.

340

341 The message may be canceled or updated through the ResourceMessage:MessageRecall element.

342 3.3.1.4 Message Example

343 Below is an example of a Request Resource Message, in which three resource requests are shown:

- 344 • Small Animal Sheltering Team (id=001)
- 345 • Patrol and Surveillance Helicopters (id=002)
- 346 • Electrical Power Restoration Team (id=003)

3.3.2 Response to Request Resource Message

3.3.2.1 Overview

The *Response to Request Resource* message is used by potential resource suppliers (e.g. mutual aid partners, equipment suppliers, etc.) to respond to *Request Resource* messages from Logistics Coordinators or others with logistics responsibilities. The response may identify availability, limitations and other pertinent information related to resources in the original request.

3.3.2.2 Element Reference Model

Figure 5 below shows the EDXL–RM Element Reference Model (ERM) tailored for the Response to Request Resource Message. The ERM shows the element-level details for the main entities in the RM.

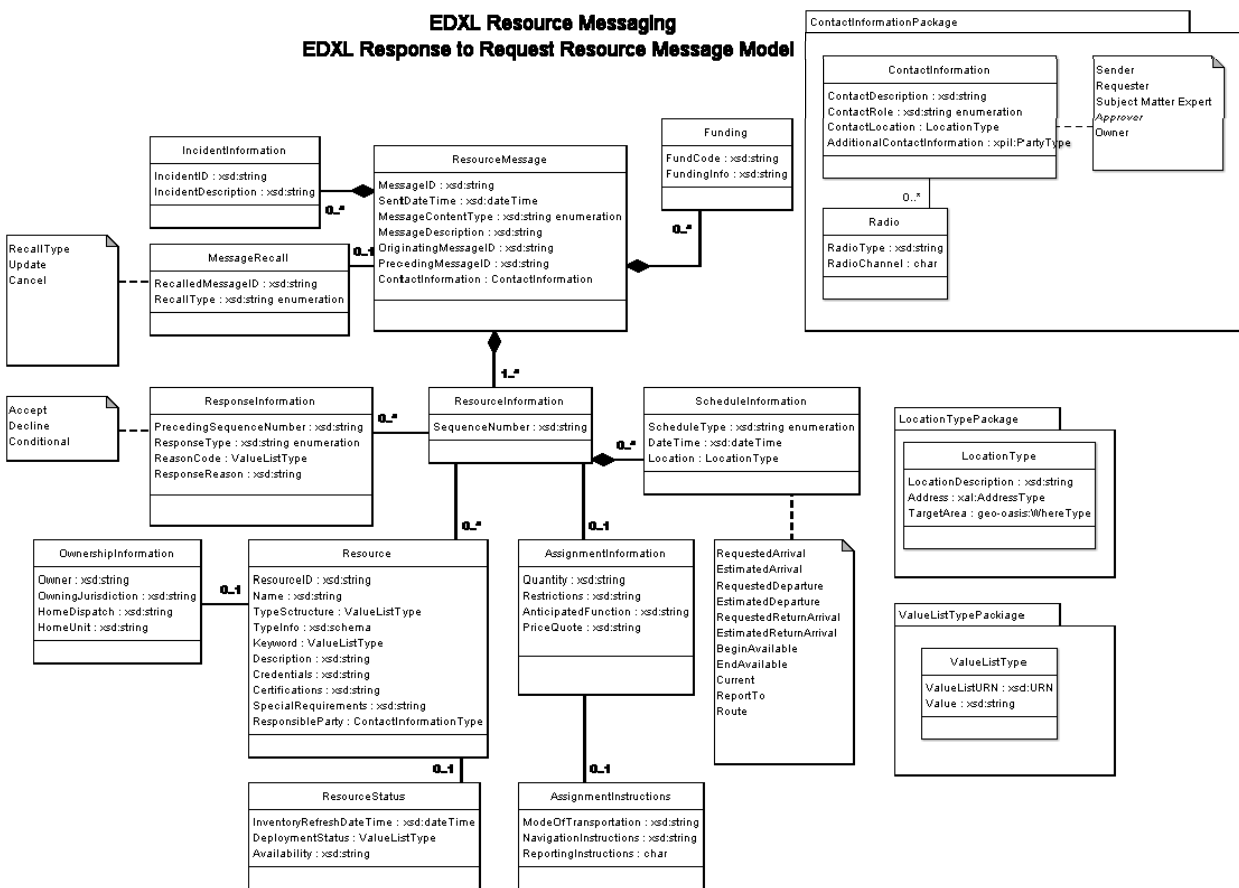

Figure 5: EDXL-RM ERM for Response to Request Resource Message

The following table outlines the element and attribute cardinalities for this message type.

Table 6: Response to Request Resource Message Elements

Parent Element	Sub-Elements
ResourceMessage	MessageID, SentDateTime, MessageContentType^, MessageDescription, OriginatingMessageID, PrecedingMessageID, PrecedingMessageID, IncidentInformation*, MessageRecall, Funding* ContactInformation*,

	ResourceInformation*
IncidentInformation	<i>IncidentID, IncidentDescription</i>
MessageRecall	RecalledMessageID, RecallType
Funding	<i>FundCode, FundingInfo</i>
ResourceInformation	SequenceNumber, ResponseInformation, Resource, AssignmentInformation, ScheduleInformation*
ResponseInformation	PrecedingSequenceNumber, ResponseType, ReasonCode, <i>ResponseReason</i>
Resource	<i>ResourceID, Name, TypeStructure, TypeInfo, Keyword*, Description,</i> Credentials, Certifications, SpecialRequirements, ResponsibleParty, OwnershipInformation, ResourceStatus
OwnerInformation	<i>Owner, OwningJurisdiction, HomeDispatch, HomeUnit</i>
ResourceStatus	InventoryRefreshDateTime, DeploymentStatus, Availability
AssignmentInformation	Quantity^, Restrictions, AnticipatedFunction, PriceQuote, AssignmentInstructions
AssignmentInstructions	ModeOfTransportation, NavigationInstructions, ReportingInstructions
ScheduleInformation	ScheduleType^ , DateTime, Location

503

504 The following rules apply to the above elements/attributes:

- 505 • The ResourceMessage:MessageID, ResourceMessage:SentDateTime
506 ResourceMessage:MessageContentType, ResourceMessage:OriginatingMessageID,
507 ResourceMessage:PrecedingMessageID, ResourceMessage:ContactInformation, and
508 ResourceMessage:ResourceInformation elements MUST be present.
- 509 • The value of ResourceMessage:MessageContentType MUST be "RequestResourceResponse".
- 510 • If a ResourceMessage:IncidentInformation element is present, then at least one of
511 IncidentInformation:IncidentID and/or IncidentInformation:IncidentDescription MUST be present.
- 512 • If the ResourceMessage:MessageRecall element is present, then the
513 MessageRecall:RecalledMessageID and MessageRecall:RecallType elements must be present.
- 514 • If a ResourceMessage:Funding element is present, then at least one of Funding:FundCode or
515 Funding:FundingInfo MUST be present.
- 516 • The ResourceInformation:SequenceNumber and ResourceInformation:ResponseInformation
517 elements must be present.
- 518 • The ResponseInformation:PrecedingSequenceNumber and ResponseInformation:ResponseType
519 elements must be present.
- 520 • If ResponseInformation:ResponseType has a value of "Conditional", then at least one of
521 ResponseInformation:ReasonCode and/or ResponseInformation:ResponseReason elements MUST
522 be present.
- 523 • At least one of Resource:ResourceID, Resource:Name, and/or ResourceType:TypeStructure element
524 MUST be present.
- 525 • If a ResourceInformation:Resource element is present, then at least one of Resource:ResourceID,
526 Resource:Name, and/or ResourceType:TypeStructure element MUST be present.

- If Resource:OwnerInformation is present, then at least one of OwnershipInformation:Owner and/or OwnershipInformation:OwningJurisdiction element MUST be present.
- If the ResourceInformation:AssignmentInformation element is present and the ResponseInformation:ResponseType contains a values of "Accept" or "Conditional", then the AssignmentInformation:Quantity element must be present.
- If ResourceInformation:ScheduleInformation is present then ScheduleInformation:ScheduleType MUST be present and contain one of the the following values:
 - New Schedule Information: "EstimatedArrival", "Estimated Departure", "RequestedReturnDeparture", "RequestedReturnArrival", "BeginAvailable", and "EndAvailable",
 - Carried Forward Schedule Information: "RequestedArrival", "RequestedDeparture", "EstimatedReturnDeparture", "EstimatedReturnDeparture" or "ReportTo",
 - Either New or Carried Forward Schedule Information: "Route".

The schema for a Response to Request Resource message can be found in Appendix A.4.

3.3.2.3 Message Flow

The Response to Request Resource message is sent by a Resource Supplier in response to an original Request Resource message.

The potential responses to this message include:

- Acknowledgement
 - The EDXL-DE is used for a message acknowledgement.

A Response to Request Resource message MAY be followed by a Requisition message from the Resource Consumer.

The message may be canceled or updated through the ResourceMessage:MessageRecall element.

3.3.2.4 Message Example

Below is an example of a Response to Request Resource Message. This is an example response to the original request shown in Section 3.3.1.4 . In this example, the three requests have different responses:

- The "Small Animal Sheltering Team" (idref=001) has Conditional changes to the request. In this case the Schedule information is different from that requested.
- The "Patrol and Surveillance Helicopters" (idref=002) is Declined.
- The "Electrical Power Restoration Team" (idref=003) is Accepted.

[Note: The XML example shown in this section is informative only.]

3.3.3 Requisition Resource Message

3.3.3.1 Overview

The “Requisition Resource” message is used by Resource Consumers to order resources from Resource Suppliers. These may relate to one or more responses to a previous Request Resource message.

3.3.3.2 Element Reference Model

Figure 6 below shows the EDXL–RM Element Reference Model (ERM) tailored for the Requisition Resource Message. The ERM shows the element-level details for the main entities in the RM.

AssignmentInformation	Quantity , Restrictions, AnticipatedFunction, PriceQuote, AssignmentInstructions
AssignmentInstructions	ModeOfTransportation, NavigationInstructions, ReportingInstructions
ScheduleInformation	ScheduleType[^] , DateTime, Location

The following rules apply to the above elements/attributes:

- The ResourceMessage:MessageID, ResourceMessage:SentDateTime, ResourceMessage:MessageContentType, ResourceMessage:OriginatingMessageID, ResourceMessage: Funding, ResourceMessage: ContactInformation, and ResourceMessage: ResourceInformation elements MUST be present.
- The value of ResourceMessage:MessageContentType MUST be "RequisitionResource".
- If a ResourceMessage:IncidentInformation element is present, then at least one of IncidentInformation:IncidentID and/or IncidentInformation:IncidentDescription elements MUST be present.
- If the ResourceMessage:MessageRecall element is present, then the MessageRecall:RecalledMessageID and MessageRecall:RecallType elements must be present.
- If a ResourceMessage:Funding element is present, then at least one of Funding:FundCode and/or Funding:FundingInfo elements MUST be present.
- The ResourceInformation:SequenceNumber, ResourceInformation:Resource and ResourceInformation:AssignmentInformation elements MUST be present
- At least one of Resource:ResourceID, Resource:Name, and/or ResourceType:TypeStructure element MUST be present.
- If a Resource:OwnerInformation is present, then at least one of OwnershipInformation:Owner or/or OwnershipInformation:OwningJurisdiction elements MUST be present.
- The AssignmentInformation:Quantity element MUST be present.
- If ResourceInformation:ScheduleInformation is present, then the ScheduleInformation:ScheduleType MUST be present and contain one of the the following values:
 - Carried Forward Schedule Information: "EstimatedArrival", "EstimatedDeparture", "EstimatedReturnDeparture", "EstimatedReturnArrival", "ReportTo",
 - New or Carried Forward Schedule Information: "RequestedArrival", "RequestedDeparture", "EstimatedReturnDeparture", "EstimatedReturnArrival", "ReportTo", or "Route"

The schema for a Requisition Resource message can be found in Appendix A.5.

3.3.3.3 Message Flow

The Requisition Resource message is a message created and sent by the Resource Consumer to any number of Resource Suppliers.

The potential responses to this message include:

- Commit Resource
 - This includes Accept, Decline and Conditional responses
- Acknowledgement
 - The EDXL-DE is used for a message acknowledgement.

The message may be canceled or updated through the ResourceMessage:MessageRecall element.

3.3.3.4 Message Example

Below is an example of a Requisition Resource Message, in which two resource requisitions are shown:

- Small Animal Sheltering Team (id=001)
- Patrol and Surveillance Helicopters (id=002)

[Note: The XML example shown in this section is informative only.]

3.3.4 Commit Resource Message

3.3.4.1 Overview

The “Commit Resource” message is used by a Resource Supplier to confirm that resources have been committed to a Resource Consumer request. Usually, the Commit Resource is in response to a Requisition Resource, or even a Request Resource. In some (rarer) cases, the Commit Resource may be the first message sent to confirm a resource allocation from Resource Suppliers to Resource Consumers. The Commit Resource is the only message used to indicate the resources have been allocated to an assignment/incident.

3.3.4.2 Element Reference Model

Figure 7 below shows the EDXL–RM Element Reference Model (ERM) tailored for the Commit Resource Message. The ERM shows the element-level details for the main entities in the RM.

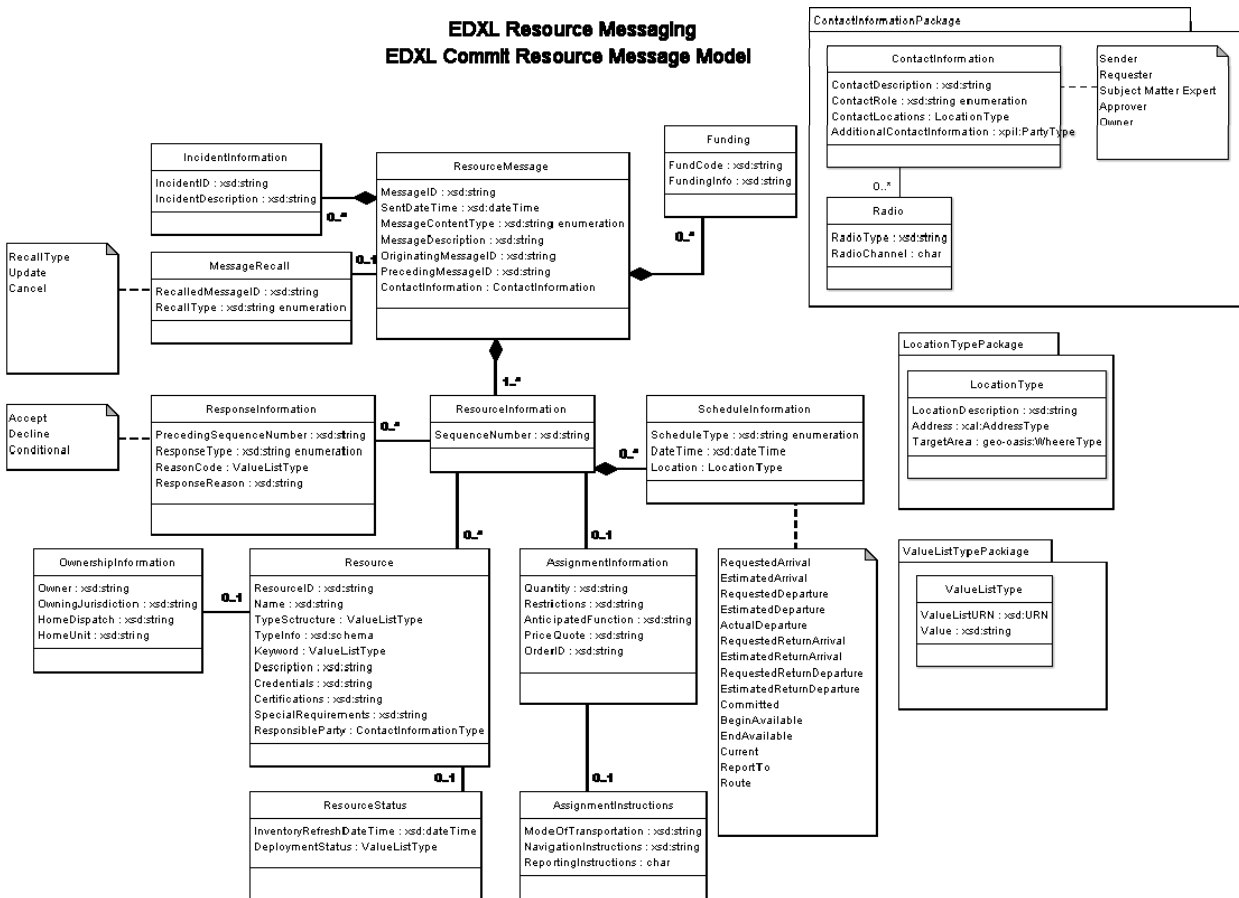

Figure 7: EDXL-RM ERM for Commit Resource Message

The following table outlines the element and attribute cardinalities for this message type.

Table 8: Commit Resource Message Elements

Parent Element	Sub-Elements
ResourceMessage	MessageID, SentDateTime, MessageContentType^, MessageDescription,

	OriginatingMessageID, PrecedingMessageID, IncidentInformation*, MessageRecall, Funding* ContactInformation*, ResourceInformation*
IncidentInformation	<i>IncidentID, IncidentDescription</i>
MessageRecall	RecalledMessageID, RecallType
Funding	<i>FundCode, FundingInfo</i>
ResourceInformation	SequenceNumber, ResponseInformation, Resource^, AssignmentInformation^, ScheduleInformation*^
ResponseInformation	PrecedingSequenceNumber, ResponseType, ReasonCode, ResponseReason
Resource	<i>ResourceID, Name, TypeStructure, TypeInfo, Keyword*, Description, Credentials, Certifications, SpecialRequirements, ResponsibleParty, OwnershipInformation, ResourceStatus</i>
OwnerInformation	<i>Owner, OwningJurisdiction, HomeDispatch, HomeUnit</i>
ResourceStatus	<i>InventoryRefreshDateTime, DeploymentStatus</i>
AssignmentInformation	Quantity, Restrictions, AnticipatedFunction, PriceQuote, OrderID, AssignmentInstructions
AssignmentInstructions	<i>ModeOfTransportation, NavigationInstructions, ReportingInstructions</i>
ScheduleInformation	ScheduleType^, DateTime, Location

872

873 The following rules apply to the above elements/attributes:

- 874 • The ResourceMessage:MessageID, ResourceMessage:SentDateTime,
875 ResourceMessage:MessageContentType, ResourceMessage:OriginatingMessageID,
876 ResourceMessage:PrecedingMessageID, ResourceMessage: ContactInformation, and
877 ResourceMessage: ResourceInformation elements MUST be present.
- 878 • The value of ResourceMessage:MessageContentType MUST be “CommitResource”.
- 879 • If a ResourceMessage:IncidentInformation element is present, then at least one of
880 IncidentInformation:IncidentID and/or IncidentInformation:IncidentDescription element MUST be
881 present.
- 882 • If the ResourceMessage:MessageRecall element is present, then the
883 MessageRecall:RecalledMessageID and MessageRecall:RecallType elements must be present.
- 884 • If a ResourceMessage:Funding element is present, then at least one of Funding:FundCode and/or
885 Funding:FundingInfo element MUST be present.
- 886 • The ResourceInformation:SequenceNumber and ResourceInformation: ResponseInformation:
887 ResponseInformation elements MUST be present.
- 888 • If ResponseInformation:ResponseType has a value of “Accept” or “Conditional”, then the
889 ResourceInformation:Resource element MUST be present. Note: A ResponseInformation element is
890 required for each resource that is accepted or conditionally accepted. If
891 ResponseInformation:ResponseType has a value of “Decline” and all resources in the
892 RequisitionResource message are being declined, then the Resource element is optional.
- 893 • If ResponseInformation:ResponseType has a value of “Accept” or “Conditional”, then the
894 ResourceInformation:AssignmentInformation element MUST be present. If
895 ResponseInformation:ResponseType has a value of “Decline”, then the
896 ResourceInformation:AssignmentInformation is not applicable.

- If ResponseInformation:ResponseType has a value of "Accept" or "Conditional", then the ResourceInformation:ScheduleInformation element MUST be present. If ResponseInformation:ResponseType has a value of "Decline", then the ResourceInformation:ScheduleInformation is not applicable.
- The ResponseInformation:PrecedingSequenceNumber and ResponseInformation:ResponseType elements MUST be present.
- If ResponseInformation:ResponseType has a value of "Conditional", then at least one of ResponseInformation:ReasonCode and/or ResponseInformation:ResponseReason elements MUST be present.
- If a ResourceInformation:Resource element is present, then at least one of Resource:ResourceID, Resource:Name, and/or Resource:Type:TypeStructure element MUST be present.
- If a Resource:OwnerInformation is present, then at least one of OwnershipInformation:Owner and/or OwnershipInformation:OwningJurisdiction element MUST be present.
- If a ResourceInformation:AssignmentInformation element is present, then the AssignmentInformation:Quantity element MUST be present.
- If the ResourceInformation:ScheduleInformation element is present, then the ScheduleInformation:ScheduleType MUST be present and contain one of the following values:
 - New Schedule Information: "ActualDeparture", "Committed",
 - Carried Forward Schedule Information: "RequestedArrival", "RequestedDeparture", "EstimatedReturnDeparture", "RequestedReturnArrival", "EstimatedReturnArrival", "ReportTo",
 - New or Carried Forward Schedule Information: "EstimatedArrival", "EstimatedDeparture", "RequestedReturnDeparture", "BeginAvailable", "EndAvailable", or "Route".

The schema for a Commit Resource message can be found in Appendix A.6.

3.3.4.3 Message Flow

The Commit Resource message is sent by a Resource Supplier in response to an either a Request Resource or Requisition Resource message sent by the Resource Consumer.

The potential responses to this message include:

- Acknowledgement
 - The EDXL-DE is used for a message acknowledgement.

The message may be canceled or updated through the ResourceMessage:MessageRecall element.

3.3.4.4 Message Example

Below is an example of a Commit Resource Message. This is an example Response to the original Requisition Resource shown in Section 3.3.3.4. In this example, the two requests have different responses:

- The "Small Animal Sheltering Team" (idref=001) is Accepted. In this case the Schedule information is updated with Committed and Actual Departure dates.
- The "Patrol and Surveillance Helicopters" (idref=002) is Declined.

[Note: The XML example shown in this section is informative only.]

3.3.5 Request Information (RFI) Message

3.3.5.1 Overview

One use of the “Request Information” message is to ask questions about specific resources. In this case, the message can be the initial message sent from the Resource Consumer to the Resource Suppliers, or it can be a follow up message seeking further information after the Resource Consumer has sent a Request Resource or other resource messages. A Request Information can be used in this manner even after a resource has been committed and/or deployed; however, if the request is related to the status of a deployed resource, the Request Resource Deployment Status message MUST be used instead.

A second use of this message type is to provide a general description of the sender’s situation and needs, with the expectation of receiving responses suggesting suitable resources. This is useful when the Resource Consumer is not able to issue a specific Request Resource message because of a lack of knowledge about the resources that would be most appropriate for the situation.

3.3.5.2 Element Reference Model

Figure 8 below shows the EDXL–RM Element Reference Model (ERM) tailored for the Request Information Message. The ERM shows the element-level details for the main entities in the RM.

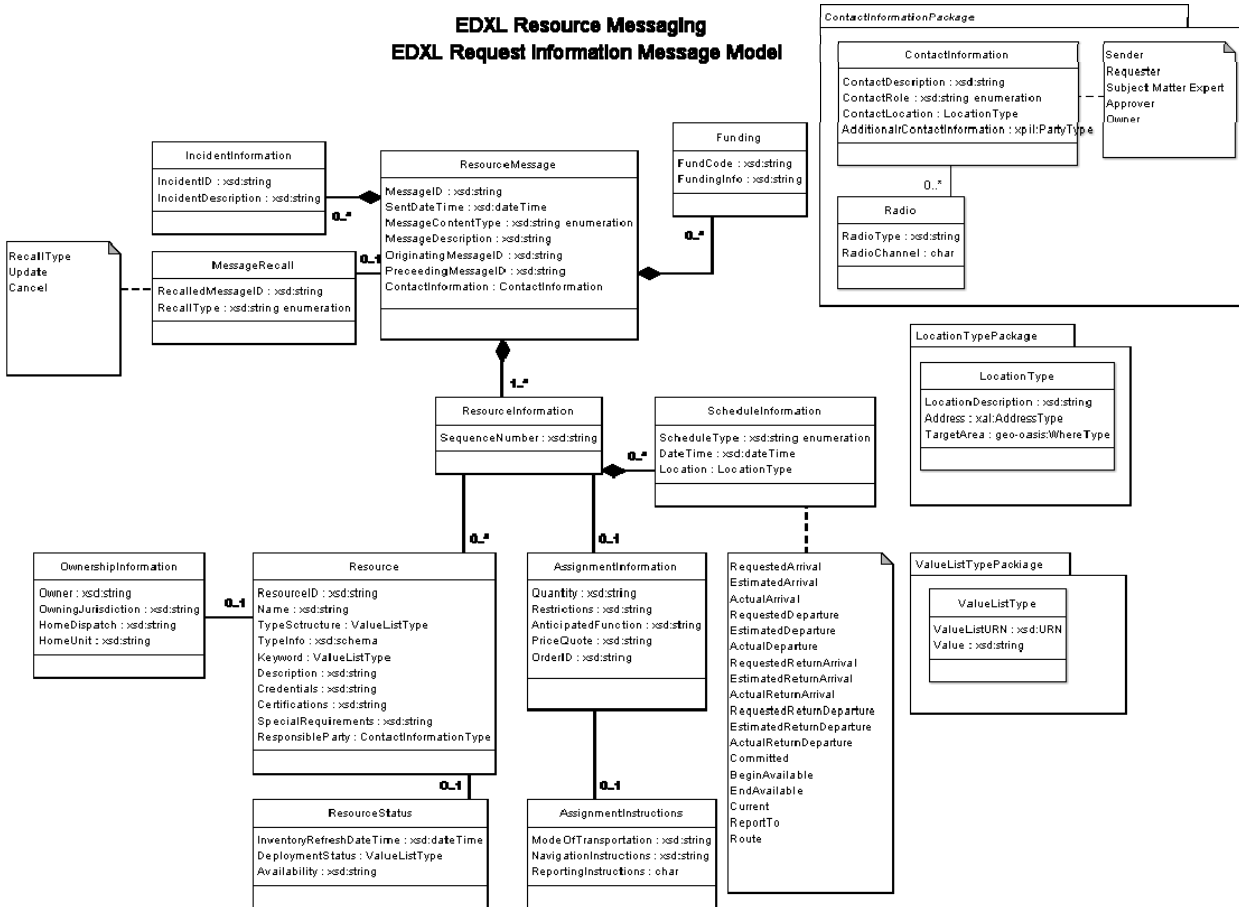

Figure 8: EDXL-RM ERM for Request for Information (RFI) Message

The following table outlines the element and attribute cardinalities for this message type.

Table 9: Request Information Message Elements

Parent Element	Sub-Elements
ResourceMessage	MessageID , SentDateTime , MessageContentType^ , MessageDescription , OriginatingMessageID , PrecedingMessageID, IncidentInformation*, MessageRecall, Funding* ContactInformation* , ResourceInformation*
IncidentInformation	<i>IncidentID</i> , <i>IncidentDescription</i>
MessageRecall	RecalledMessageID , RecallType
Funding	<i>FundCode</i> , <i>FundingInfo</i>
ResourceInformation	SequenceNumber , Resource, AssignmentInformation, ScheduleInformation*
Resource	<i>ResourceID</i> , <i>Name</i> , <i>TypeStructure</i> , <i>TypeInfo</i> , <i>Keyword*</i> , <i>Description</i> , <i>Credentials</i> , <i>Certifications</i> , <i>SpecialRequirements</i> , <i>ResponsibleParty</i> , <i>OwnershipInformation</i> , <i>ResourceStatus</i>
OwnerInformation	<i>Owner</i> , <i>OwningJurisdiction</i> , <i>HomeDispatch</i> , <i>HomeUnit</i>
ResourceStatus	<i>InventoryRefreshDateTime</i> , <i>DeploymentStatus</i> , <i>Availability</i>
AssignmentInformation	<i>Quantity</i> , <i>Restrictions</i> , <i>AnticipatedFunction</i> , <i>PriceQuote</i> , <i>OrderID</i> , <i>AssignmentInstructions</i>
AssignmentInstructions	<i>ModeOfTransportation</i> , <i>NavigationInstructions</i> , <i>ReportingInstructions</i>
ScheduleInformation	ScheduleType^ , <i>DateTime</i> , <i>Location</i>

1028

1029 The following rules apply to the above elements/attributes:

- 1030 • The ResourceMessage:MessageID, ResourceMessage:SentDateTime
1031 ResourceMessage:MessageContentType, ResourceMessage:MessageDescription,
1032 ResourceMessage:OriginatingMessageID, and ResourceMessage:ContactInformation elements
1033 MUST be present.
- 1034 • The value of ResourceMessage:MessageContentType MUST be "RequestInformation".
- 1035 • If a ResourceMessage:IncidentInformation element is present, then at least one of
1036 IncidentInformation:IncidentID and/or IncidentInformation:IncidentDescription element MUST be
1037 present.
- 1038 • If the ResourceMessage:MessageRecall element is present, then the
1039 MessageRecall:RecalledMessageID and MessageRecall:RecallType elements must be present.
- 1040 • If a ResourceMessage:Funding element is present, then at least one of Funding:FundCode and/or
1041 Funding:FundingInfo element MUST be present.
- 1042 • If a ResourceMessage:ResourceInformation element is present, then the
1043 ResourceInformation:SequenceNumber element MUST be present.
- 1044 • If a ResourceInformation:Resource element is present, then at least one of Resource:ResourceID,
1045 Resource:Name, and/or Resource:Type:TypeStructure element MUST be present.
- 1046 • If a Resource:OwnerInformation is present, then at least one of OwnershipInformation:Owner and/or
1047 OwnershipInformation:OwningJurisdiction element MUST be present.
- 1048 • If the ResourceInformation:ScheduleInformation element is present, then the
1049 ScheduleInformation:ScheduleType MUST be present.

1050

1051 The schema for a Request Information message can be found in Appendix A.7.

3.3.5.3 Message Flow

The Request Resource message is sent by the Resource Consumer to any number of Resource Suppliers, and may follow earlier resource messages.

The potential responses to this message include:

- Response to Request for Information (See 0)
 - This includes Accept, Decline, and Conditional responses
- Report Resource Deployment Status
- Acknowledgement
 - The EDXL-DE is used for a message acknowledgement.

3.3.5.4 Message Example

Below are two example Request Information messages. The first is intended as a follow up message to the Request Resource and Response to Request Resource messages shown in Sections 3.3.1.4 and 3.3.2.4, requesting further information about the third resource that was requested (two electrical power restoration teams). The second message is a general request for assistance with assessing and repairing a damaged bridge.

[Note: The XML examples shown in this section are informative only.]

1173

3.3.6 Response to Request Information Message

3.3.6.1 Overview

The “Response to Request Information” message is used by Resource Suppliers to respond to an original Request Information message from Resource Consumers. If the original Request Information message contained one or more ResourceSummary elements, the response MUST Accept or Decline each ResourceSummary element with a separate ResponseSummary element; however, accepting here only entails agreeing to supply the requested information, not agreeing to supply resources. If the original request did not contain any ResourceSummary elements, one or more ResponseSummary elements MAY be included in the response message (and, in this case, each ResponseSummary element MUST contain the “Accept” element).

3.3.6.2 Element Reference Model

Figure 9 below shows the EDXL–RM Element Reference Model (ERM) tailored for the Response to Request Information Message. The ERM shows the element-level details for the main entities in the RM.

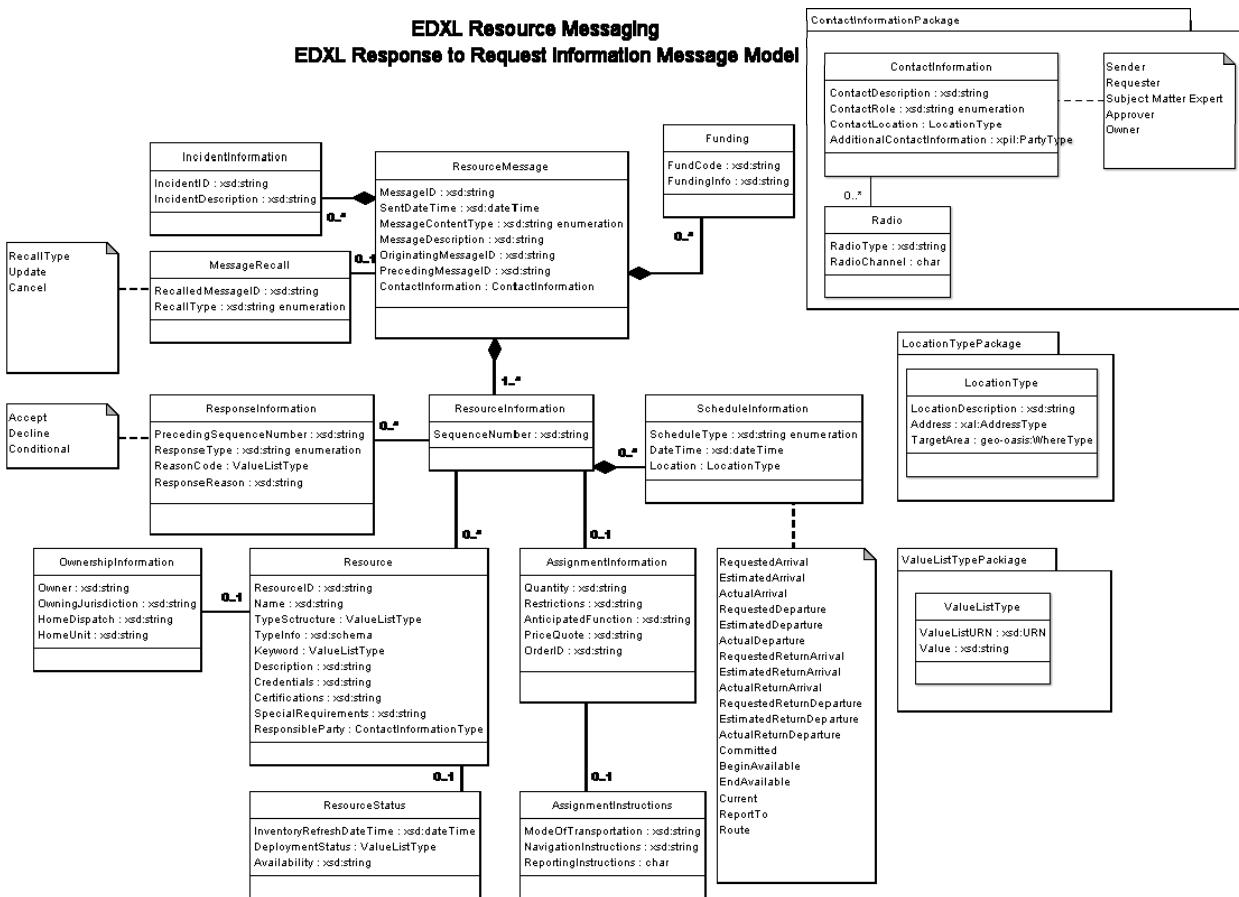

Figure 9: EDXL-RM ERM for Response to Request Information Message

The following table outlines the element and attribute cardinalities for this message type.

Table 10: Response to Request Information Message Elements

Parent Element	Sub-Elements
----------------	--------------

ResourceMessage	MessageID, SentDateTime, MessageContentType[^], MessageDescription, OriginatingMessageID, PrecedingMessageID, IncidentInformation*, MessageRecall, Funding* ContactInformation*, ResourceInformation*
IncidentInformation	<i>IncidentID, IncidentDescription</i>
MessageRecall	RecalledMessageID, RecallType
Funding	<i>FundCode, FundingInfo</i>
ResourceInformation	SequenceNumber, ResponseInformation¹, Resource, AssignmentInformation, ScheduleInformation*
ResponseInformation	PrecedingSequenceNumber, ResponseType, ReasonCode, ResponseReason
Resource	<i>ResourceID, Name, TypeStructure, TypeInfo, Keyword*, Description, Credentials, Certifications, SpecialRequirements, ResponsibleParty, OwnershipInformation, ResourceStatus</i>
OwnerInformation	<i>Owner, OwningJurisdiction, HomeDispatch, HomeUnit</i>
ResourceStatus	<i>InventoryRefreshDateTime, DeploymentStatus, Availability</i>
AssignmentInformation	<i>Quantity, Restrictions, AnticipatedFunction, PriceQuote, OrderID, AssignmentInstructions</i>
AssignmentInstructions	<i>ModeOfTransportation, NavigationInstructions, ReportingInstructions</i>
ScheduleInformation	ScheduleType, DateTime, Location

- 1193
- 1194 The following rules apply to the above elements/attributes:
- 1195 • The ResourceMessage:MessageID, ResourceMessage:SentDateTime
 - 1196 ResourceMessage:MessageContentType, ResourceMessage:OriginatingMessageID,
 - 1197 ResourceMessage:PrecedingMessageID, and ResourceMessage:ContactInformation elements
 - 1198 MUST be present.
 - 1199 • The value of ResourceMessage:MessageContentType MUST be "ResponseToRequestInformation".
 - 1200 • If a ResourceMessage:IncidentInformation element is present, then at least one of
 - 1201 IncidentInformation:IncidentID and/or IncidentInformation:IncidentDescription element MUST be
 - 1202 present.
 - 1203 • If the ResourceMessage:MessageRecall element is present, then the
 - 1204 MessageRecall:RecalledMessageID and MessageRecall:RecallType elements must be present.

¹ The ResourceInformation:ResponseInformation element refers to the resource information. Because this is a response to a request for information and the response may not be to a particular resource, the ResourceInformation:ResponseInformation element is not mandatory.

- 1205 • If a ResourceMessage:Funding element is present, then at least one of Funding:FundCode and/or
1206 Funding:FundingInfo element MUST be present.
- 1207 • If a ResourceMessage:ResourceInformation element is present, then the
1208 ResourceInformation:SequenceNubmer element MUST be present.
- 1209 • If the ResourceInformation:ResponseInformation element is present, then the
1210 ResponseInformation:PrecedingSequenceNumber and ResponseInformation: ResponseType
1211 elements MUST be present.
- 1212 • If If the ResourceInformation:ResponseInformation element is present and the
1213 ResponseInformation:ResponseType has a value of "Conditional", then at least one of
1214 ResponseInformation:ReasonCode and/or ResponseInformation:ResponseReason elements MUST
1215 be present.
- 1216 • If a ResourceInformation:Resource element is present, then at least one of Resource:ResourceID,
1217 Resource:Name, and/or Resource:TypeStructure element MUST be present.
- 1218 • If a Resource:OwnerInformation element is present, then at least one of OwnershipInformation:Owner
1219 and/or OwnershipInformation:OwningJurisdiction element MUST be present.
- 1220 • If the ResourceInformation:ScheduleInformation element is present, then the
1221 ScheduleInformation:ScheduleType MUST be present.

1222

1223 The schema for a Response to Request Information message can be found in Appendix A.8.

1224 3.3.6.3 Message Flow

1225 The Response to Request Information message is sent by a Resource Supplier in response to an original
1226 Request Information message sent by the Resource Consumer.

1227 The potential responses to this message include:

- 1228 • Acknowledgement
- 1229 • The EDXL-DE is used for a message acknowledgement.

1230 A Response to Request Resource message MAY be followed by a Requisition message from the
1231 Resource Consumer.

1232 3.3.6.4 Message Example

1233 Below are two example Response to Request Information messages. These are example responses to
1234 the Request Information messages shown in Section 3.3.5.4.

1235

1236 [Note: The XML examples shown in this section are informative only.]

```

1237 <?xml version="1.0" encoding="UTF-8"?>

3.3.7 Offer Unsolicited Resource Message

3.3.7.1 Overview

The “Offer Unsolicited Resource” message is used to offer available resources (that have not been requested) to assist with an emergency response.

3.3.7.2 Element Reference Model

Figure 10 below shows the EDXL–RM Element Reference Model (ERM) tailored for the Offer Unsolicited Resource Message. The ERM shows the element-level details for the main entities in the RM.

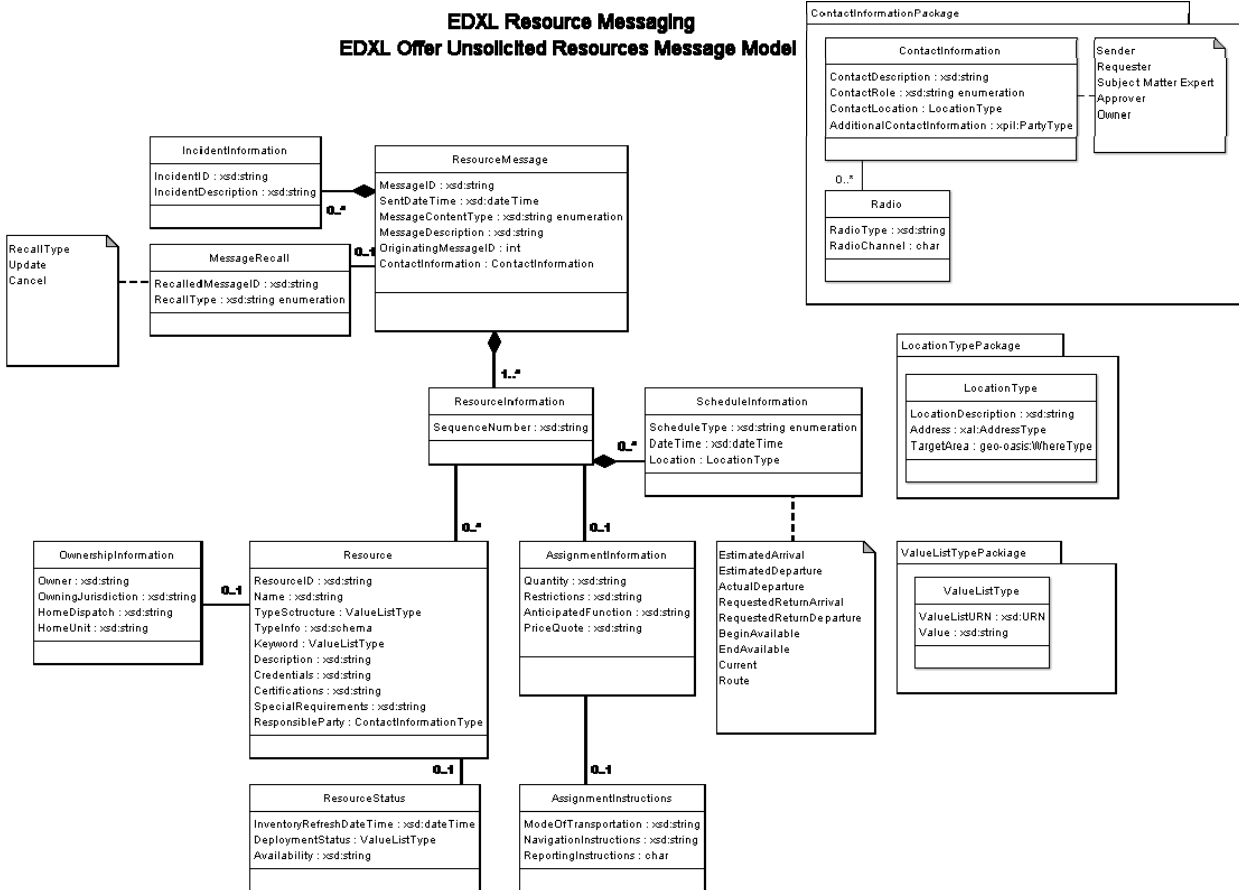

Figure 10: EDXL-RM ERM for Offer Unsolicited Resource Message

The following table outlines the element and attribute cardinalities for this message type.

Table 11: Offer Unsolicited Resource Message Elements

Parent Element	Sub-Elements
ResourceMessage	MessageID , SentDateTime , MessageContentType [*] , MessageDescription , OriginatingMessageID , IncidentInformation [*] , MessageRecall , ContactInformation [*] , ResourceInformation [*]
IncidentInformation	<i>IncidentID</i> , <i>IncidentDescription</i>
MessageRecall	RecalledMessageID , RecallType
ResourceInformation	SequenceNumber , Resource , AssignmentInformation , ScheduleInformation [*]
Resource	<i>ResourceID</i> , <i>Name</i> , <i>TypeStructure</i> , <i>TypeInfo</i> , Keyword [*] , <i>Description</i> , <i>Credentials</i> , <i>Certifications</i> , <i>SpecialRequirements</i> , <i>ResponsibleParty</i> , <i>OwnershipInformation</i> , <i>ResourceStatus</i>

OwnerInformation	<i>Owner, OwningJurisdiction, HomeDispatch, HomeUnit</i>
ResourceStatus	InventoryRefreshDateTime, DeploymentStatus, Availability
AssignmentInformation	Quantity, Restrictions, AnticipatedFunction, PriceQuote, AssignmentInstructions
AssignmentInstructions	ModeOfTransportation, NavigationInstructions, ReportingInstructions
ScheduleInformation	ScheduleType , DateTime, Location

1396

1397 The following rules apply to the above elements/attributes:

- 1398 • The ResourceMessage:MessageID, ResourceMessage:SentDateTime
1399 ResourceMessage:MessageContentType, ResourceMessage:OriginatingMessageID,
1400 ResourceMessage:ContactInformation, and ResourceMessage:ResourceInformation elements MUST
1401 be present.
- 1402 • The value of ResourceMessage:MessageContentType MUST be “OfferUnsolicitedResource”.
- 1403 • If a ResourceMessage:IncidentInformation element is present, then at least one of
1404 IncidentInformation:IncidentID and/or IncidentInformation:IncidentDescription element MUST be
1405 present.
- 1406 • If the ResourceMessage:MessageRecall element is present, then the
1407 MessageRecall:RecalledMessageID and MessageRecall:RecallType elements must be present.
- 1408 • A SequenceNumber and at least one ResourceInformation:Resource elements MUST be present.
- 1409 • At least one of Resource:ResourceID, Resource:Name, and/or ResourceType:TypeStructure element
1410 MUST be present.
- 1411 • If a Resource:OwnerInformation is present, then at least one of OwnershipInformation:Owner and/or
1412 OwnershipInformation:OwningJurisdiction element MUST be present.
- 1413 • If the ResourceInformation:ScheduleInformation element is present, then the
1414 ScheduleInformation:ScheduleType MUST be present and contain one of the following values:
- 1415 • New Schedule Information: “EstimatedArrival”, “EstimatedDeparture”,
1416 “RequestedReturnDeparture”, “RequestedReturnArrival”, “BeginAvailable”, “EndAvailable”, or
1417 “Route”.

1418

1419 The schema for a Offer Unsolicited Resource message can be found in Appendix A.9.

1420 3.3.7.3 Message Flow

1421 The Offer Unsolicited Resource message is an initial message created and sent by the Resource
1422 Supplier to any number of Resource Consumers.

1423 The potential responses to this message include:

- 1424 • Request Information
- 1425 • Requisition Resource
- 1426 • Acknowledgement
- 1427 • The EDXL-DE is used for a message acknowledgement.

1428 3.3.7.4 Message Example

1429 Below is an example Offer Unsolicited Resource message. This message offers a donation of 100 large
1430 and 100 small tarpaulins.

1431

1432 [Note: The XML example shown in this section is informative only.]

3.3.8 Release Resource Message

3.3.8.1 Overview

The “Release Resource” message is used by authorities at the incident to “release” (demobilize) a resource back to its original point of assignment or to another location / assignment.

3.3.8.2 Element Reference Model

Figure 11 below shows the EDXL–RM Element Reference Model (ERM) tailored for the Release Resource Message. The ERM shows the element-level details for the main entities in the RM.

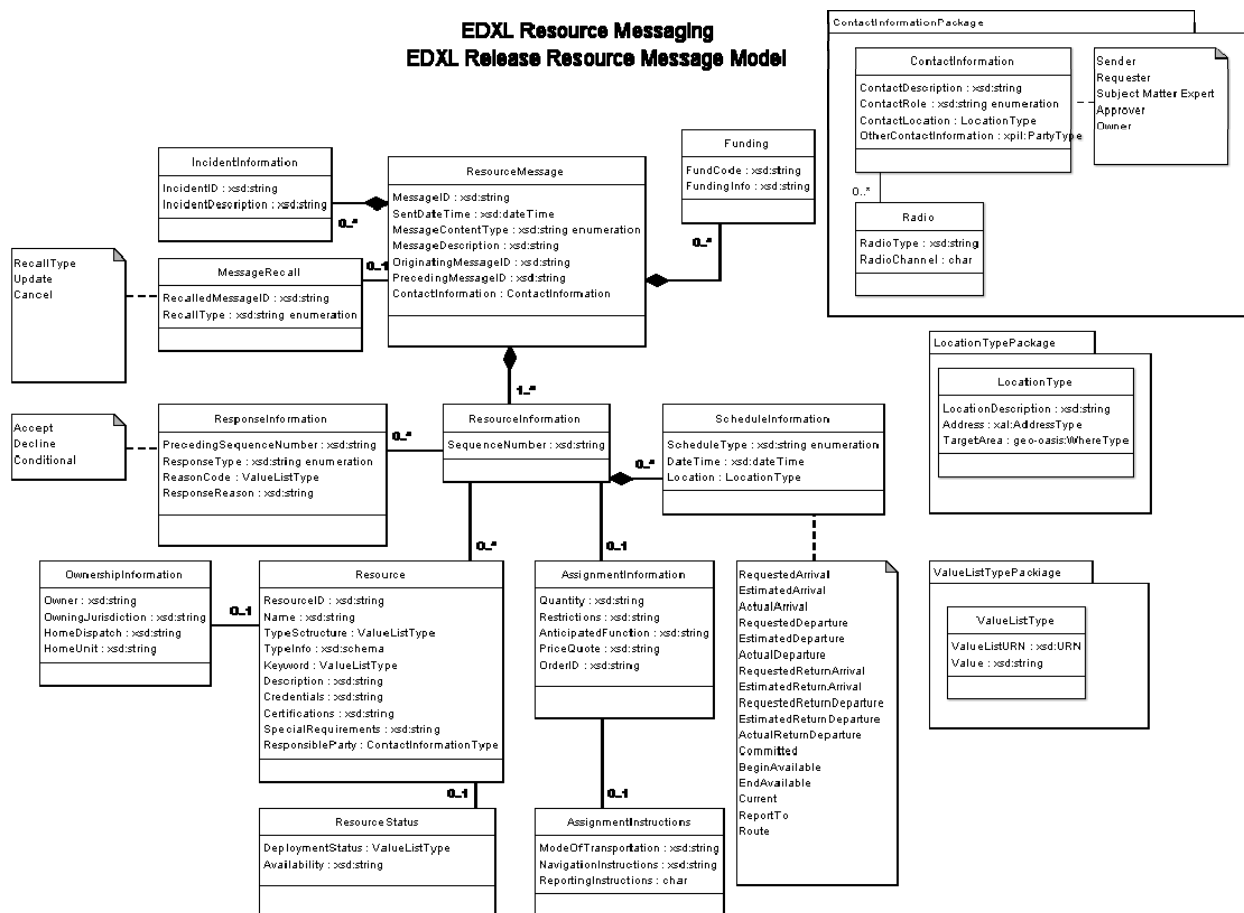

Figure 11: EDXL-RM ERM for Release Resource Message

The following table outlines the element and attribute cardinalities for this message type.

Table 12: Release Resource Message Elements

Parent Element	Sub-Elements
ResourceMessage	MessageID , SentDateTime , MessageContentType [^] , MessageDescription, OriginatingMessageID , PrecedingMessageID, IncidentInformation*, MessageRecall, Funding* ContactInformation *, ResourceInformation *
IncidentInformation	<i>IncidentID</i> , <i>IncidentDescription</i>

The following rules apply to the above elements/attributes:

- The ResourceMessage:MessageID, ResourceMessage:SentDateTime, ResourceMessage:MessageContentType, ResourceMessage:OriginatingMessageID, ResourceMessage:ContactInformation, and ResourceMessage:ResourceInformation elements MUST be present.
- The value of ResourceMessage:MessageContentType MUST be "ReleaseResource".
- If a ResourceMessage:IncidentInformation element is present, then at least one of IncidentInformation:IncidentID and/or IncidentInformation:IncidentDescription element MUST be present.
- If the ResourceMessage:MessageRecall element is present, then the MessageRecall:RecalledMessageID and MessageRecall:RecallType elements must be present.
- If a ResourceMessage:Funding element is present, then at least one of Funding:FundCode and/or Funding:FundingInfo element MUST be present.
- A ResourceInformation: SequenceNumber and at least one ResourceInformation:Resource elements MUST be present.

- 1615 • If the ResourceInformation:ResponseInformation element is present, then the
1616 ResponseInformation:ResponseType and ResponseInformation:ReferenceID elements MUST be
1617 present.
- 1618 • If a ResourceInformation:ResponseInformation element is present, then the
1619 ResponseInformation:OriginationSequenceNumber and ResponseInformation:ResponseType
1620 elements MUST be present.
- 1621 • If a ResourceInformation:ResponseInformation element is present and the
1622 ResponseInformation:ResponseType has a value of "Conditional", then at least one of
1623 ResponseInformation:ReasonCode and/or ResponseInformation:ResponseReason elements MUST
1624 be present.
- 1625 • At least one of Resource:ResourceID, Resource:Name, and/or ResourceType:TypeStructure element
1626 MUST be present.
- 1627 • If a Resource:OwnerInformation is present, then at least one of OwnershipInformation:Owner and/or
1628 OwnershipInformation:OwningJurisdiction element MUST be present.
- 1629 • If the ResourceInformation:AssignmentInformation element is present, then the
1630 AssignmentInformation:Quantity element MUST be present.
- 1631 • If the ResourceInformation:ScheduleInformation element is present, then the
1632 ScheduleInformation:ScheduleType MUST be present and contain one of the following values:
1633 • New Schedule Information: "ActualReturnDeparture"
1634 • Carried Forward Schedule Information: "RequestedArrival", "EstimatedArrival", "ActualArrival",
1635 "RequestedDeparture", "EstimatedDeparture", "ActualDeparture", "RequestedReturnDeparture",
1636 "RequestedReturnArrival", "BeginAvailable", "EndAvailable", "Committed", "ReportTo"
1637 • New or Carried Forward Schedule Information: "EstimatedReturnDeparture",
1638 "EstimatedReturnArrival", or "Route".
1639
- 1640 The schema for a Release Resource message can be found in Appendix A.10.

1641 3.3.8.3 Message Flow

1642 The Release Resource message is sent by the Resource Consumer to the Resource Supplier, and
1643 typically follows an earlier sequence of messages (e.g., Requisition Resource and Commit Resource
1644 messages).

1645 The potential responses to this message include:

- 1646 • Request Information
- 1647 • Requisition Resource
- 1648 • Acknowledgement
- 1649 • The EDXL-DE is used for a message acknowledgement.

1650 3.3.8.4 Message Example

1651 Below is an example Release Resource message. This message releases the Small Animal Sheltering
1652 Team committed in the example in Section 3.3.4.4.

1653

3.3.9 Request Return Message

3.3.9.1 Overview

The “Request Return” message is used to request release (demobilization) of resource(s) back to its original owning jurisdiction and location or to another location / assignment.

3.3.9.2 Element Reference Model

Figure 12 below shows the EDXL–RM Element Reference Model (ERM) tailored for the Request Return Message. The ERM shows the element-level details for the main entities in the RM.

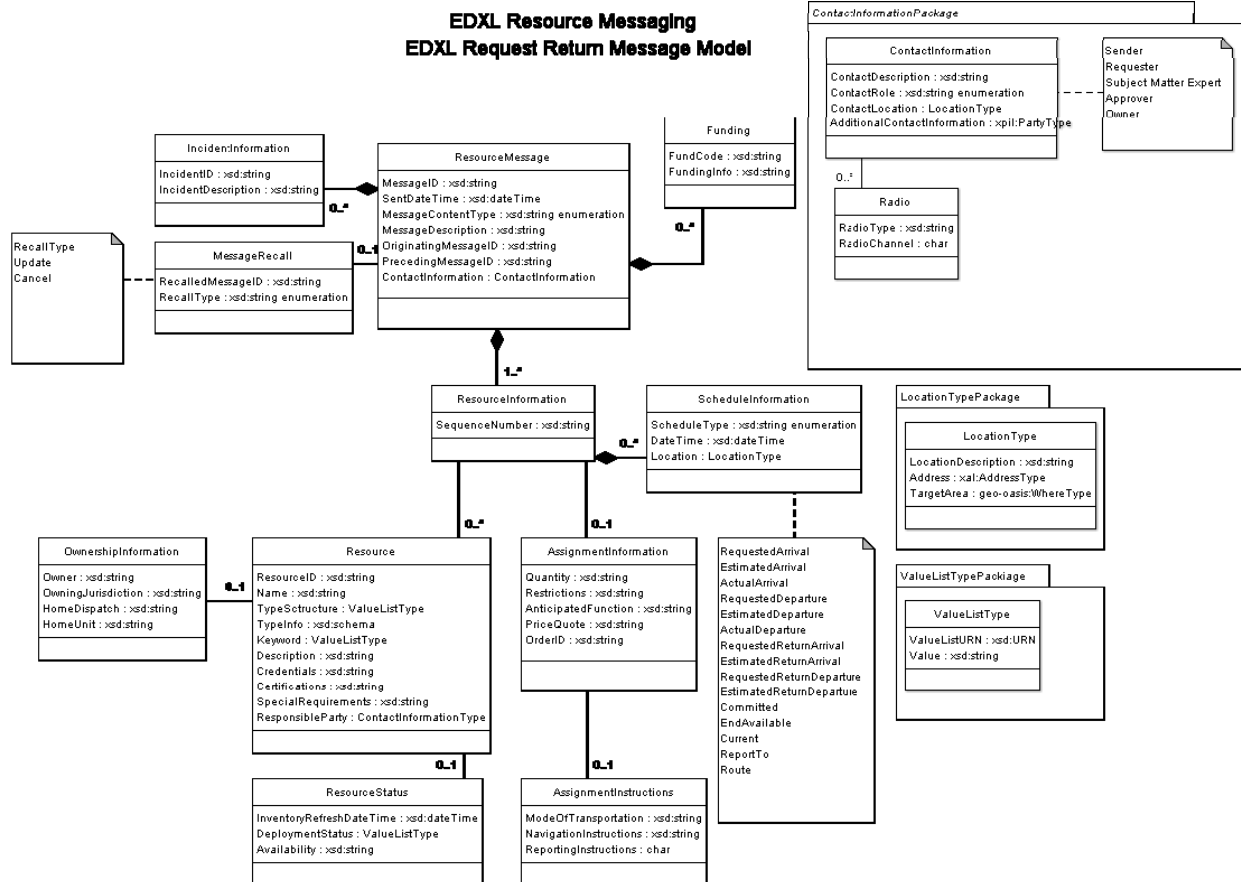

Figure 12: EDXL-RM ERM for Request Return Message

The following table outlines the element and attribute cardinalities for this message type.

Table 13: Request Return Message Elements

Parent Element	Sub-Elements
ResourceMessage	MessageID , SentDateTime , MessageContentType [*] , MessageDescription , OriginatingMessageID , PrecedingMessageID , IncidentInformation [*] , MessageRecall , Funding [*] , ContactInformation [*] , ResourceInformation [*]
IncidentInformation	<i>IncidentID</i> , <i>IncidentDescription</i>
MessageRecall	RecalledMessageID , RecallType
Funding	<i>FundCode</i> , <i>FundingInfo</i>
ResourceInformation	SequenceNumber , Resource , AssignmentInformation , ScheduleInformation [*]
Resource	<i>ResourceID</i> , <i>Name</i> , <i>TypeStructure</i> , <i>TypeInfo</i> , <i>Keyword</i> [*] , <i>Description</i> , <i>Credentials</i> , <i>Certifications</i> , <i>SpecialRequirements</i> , <i>ResponsibleParty</i> , <i>OwnershipInformation</i> , <i>ResourceStatus</i>
OwnerInformation	<i>Owner</i> , <i>OwningJurisdiction</i> , <i>HomeDispatch</i> , <i>HomeUnit</i>

ResourceStatus	DeploymentStatus, Availability
AssignmentInformation	Quantity, Restrictions, AnticipatedFunction, PriceQuote, OrderID, AssignmentInstructions
AssignmentInstructions	ModeOfTransportation, NavigationInstructions, ReportingInstructions
ScheduleInformation	ScheduleType[^] , DateTime, Location

1767

1768 The following rules apply to the above elements/attributes:

- 1769 • The ResourceMessage:MessageID, ResourceMessage:SentDateTime,
1770 ResourceMessage:MessageContentType. ResourceMessage:OriginatingMessageID,
1771 ResourceMessage:ContactInformation, and ResourceMessage:ResourceInformation elements MUST
1772 be present.
- 1773 • The value of ResourceMessage:MessageContentType MUST be “RequestReturn”.
- 1774 • If a ResourceMessage:IncidentInformation element is present, then at least one of
1775 IncidentInformation:IncidentID and/or IncidentInformation:IncidentDescription element MUST be
1776 present.
- 1777 • If the ResourceMessage:MessageRecall element is present, then the
1778 MessageRecall:RecalledMessageID and MessageRecall:RecallType elements must be present.
- 1779 • If a ResourceMessage:Funding element is present, then at least one of Funding:FundCode and/or
1780 Funding:FundingInfo element MUST be present.
- 1781 • The ResourceInformation:SequenceNumber and ResourceInformation:Resource elements MUST be
1782 present.
- 1783 • At least one of Resource:ResourceID, Resource:Name, and/or Resource:Type:TypeStructure element
1784 MUST be present for each ResourceInformation:Resource element present.
- 1785 • If a Resource:OwnerInformation is present, then at least one of OwnershipInformation:Owner and/or
1786 OwnershipInformation:OwningJurisdiction element MUST be present.
- 1787 • If the ResourceInformation:ScheduleInformation element is present, then the
1788 ScheduleInformation:ScheduleType MUST be present and contain one of the following values:
 - 1789 • Carried Forward Schedule Information: “RequestedArrival”, “EstimatedArrival”, “ActualArrival”,
1790 “RequestedDeparture”, “EstimatedDeparture”, “ActualDeparture”, “RequestedReturnDeparture”,
1791 “RequestedReturnArrival”, “BeginAvailable”, “EndAvailable”, “Committed”, “ReportTo”,
 - 1792 • Either New or Carried Forward Schedule Information: “RequestedReturnDeparture”,
1793 “RequestedReturnArrival”, “EndAvailable”, or “Route”.

1794

1795 The schema for a Request Return message can be found in Appendix A.11.

1796 3.3.9.3 Message Flow

1797 The Release Resource message is sent by the Resource Supplier to the Resource Consumer, and
1798 typically follows an earlier sequence of messages (e.g., Requisition Resource and Commit Resource
1799 messages).

1800 The potential responses to this message include:

- 1801 • Response to Request Return
 - 1802 • This includes Accept, Decline, and any Conditional response
- 1803 • Release Resource
- 1804 • Acknowledgement

- The EDXL-DE is used for a message acknowledgement.

3.3.9.4 Message Example

Below is an example of a Request Return Message, in which one request return is shown:

- Small Animal Sheltering Team (id=001)

[Note: The XML example shown in this section is informative only.]

```

3.3.10 Response to Request Return Message

3.3.10.1 Overview

The “Response to Request Return” message is used by Resource Consumers to respond to a Request Return Resource message from Resource Suppliers. The response identifies the resources in the original request message and how the Resource Consumer has responded.

3.3.10.2 Element Reference Model

Figure 13 below shows the EDXL–RM Element Reference Model (ERM) tailored for the Response to Request Return Message. The ERM shows the element-level details for the main entities in the RM.

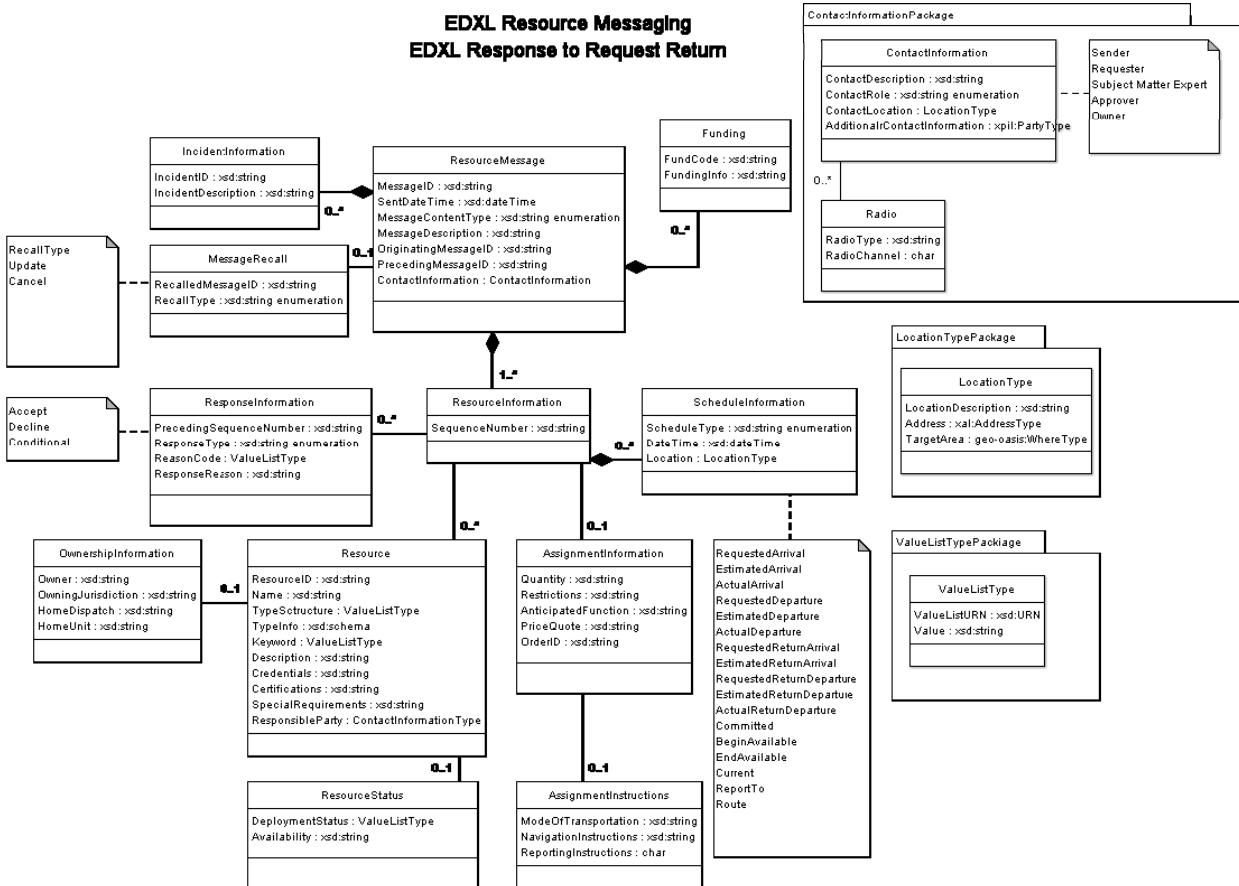

Figure 13: EDXL-DE ERM for Response to Request Return Message

The following table outlines the element and attribute cardinalities for this message type.

Table 14: Response to Request Return Message Elements

Parent Element	Sub-Elements
ResourceMessage	MessageID, SentDateTime, MessageContentType^ , MessageDescription, OriginatingMessageID, PrecedingMessageID , IncidentInformation*, MessageRecall, Funding* ContactInformation* , ResourceInformation*
IncidentInformation	<i>IncidentID, IncidentDescription</i>

MessageRecall	RecalledMessageID, RecallType
Funding	<i>FundCode, FundingInfo</i>
ResourceInformation	SequenceNumber, ResponseInformation, Resource, AssignmentInformation, ScheduleInformation*
ResponseInformation	<i>PrecedingSequenceNumber, ResourceType, ReasonCode,</i> <i>ResponseReason</i>
Resource	<i>ResourceID, Name, TypeStructure, TypeInfo, Keyword*, Description,</i> Credentials, Certifications, SpecialRequirements, ResponsibleParty, OwnershipInformation, ResourceStatus
OwnerInformation	<i>Owner, OwningJurisdiction, HomeDispatch, HomeUnit</i>
ResourceStatus	DeploymentStatus, Availability
AssignmentInformation	Quantity, Restrictions, AnticipatedFunction, PriceQuote, OrderID, AssignmentInstructions
AssignmentInstructions	ModeOfTransportation, NavigationInstructions, ReportingInstructions
ScheduleInformation	ScheduleType^ , DateTime, Location

1877

1878 The following rules apply to the above elements/attributes:

- 1879 • The ResourceMessage:MessageID, ResourceMessage:SentDateTime,
1880 ResourceMessage:MessageContentType, ResourceMessage:OriginatingMessageID,
1881 ResourceMessage:PrecedingMessageID, ResourceMessage:ContactInformation, and
1882 ResourceMessage:ResourceInformation elements MUST be present.
- 1883 • The value of ResourceMessage:MessageContentType MUST be "ResponseToRequestReturn".
- 1884 • If a ResourceMessage:IncidentInformation element is present, then at least one of
1885 IncidentInformation:IncidentID and/or IncidentInformation:IncidentDescription element MUST be
1886 present.
- 1887 • If the ResourceMessage:MessageRecall element is present, then the
1888 MessageRecall:RecalledMessageID and MessageRecall:RecallType elements must be present.
- 1889 • If a ResourceMessage:Funding element is present, then at least one of Funding:FundCode and/or
1890 Funding:FundingInfo element MUST be present.
- 1891 • The ResourceInformation:SequenceNumber and ResourceInformation:ResponseInformation
1892 elements MUST be present.
- 1893 • The ResponseInformation:PrecedingSequenceNumber and ResponseInformation:ResponseType
1894 elements MUST be present.
- 1895 • If the ResponseInformation:ResponseType element has a value of "Conditional", then at least one of
1896 ResponseInformation:ReasonCode and/or ResponseInformation:ResponseReason elements MUST
1897 be present.
- 1898 • At least one of Resource:ResourceID, Resource:Name, and/or ResourceType:TypeStructure element
1899 MUST be present for each ResourceInformation:Resource element present.
- 1900 • The Resource:ResourceStatus element MUST be present for each ResourceInformation:Resource
1901 element present.
- 1902 • If a Resource:OwnerInformation is present, then at least one of OwnershipInformation:Owner and/or
1903 OwnershipInformation:OwningJurisdiction element MUST be present.
- 1904 • The ResourceStatus:DeploymentStatus and ResourceStatus:Availability elements MUST be present.

- If the ResourceInformation:ScheduleInformation element is present, then the ScheduleInformation:ScheduleType MUST be present and contain one of the following values:
 - New Schedule Information: "ActualReturnDeparture",
 - Carried Forward Schedule Information: "RequestedArrival", "EstimatedArrival", "ActualArrival", "RequestedDeparture", "EstimatedDeparture", "ActualDeparture", "RequestedReturnDeparture", "RequestedReturnArrival", "BeginAvailable", "EndAvailable", "Committed", "ReportTo"
 - New or Carried Forward Schedule Information: "EstimatedReturnDeparture", "EstimatedReturnArrival", "Route"

The schema for a Response to Request Return message can be found in Appendix A.12.

3.3.10.3 Message Flow

The Response to Request Return message is sent by a Resource Consumer in response to an original Request Return message sent by the Resource Supplier.

The potential responses to this message include:

- Request Return
- Acknowledgement
 - The EDXL-DE is used for a message acknowledgement.

The message will typically be followed by a Release Resource message (see 3.3.8) when the Resource Consumer is ready to return the resource to the Resource Supplier.

3.3.10.4 Message Example

Below is an example of a Response to Request Return message. This is an example response to the Request Return message shown in Section 3.3.1.4. The sender of the message is the original resource requester (Resource Consumer). The response is an "Accept" (i.e., the Resource Consumer agrees to return the resource according to the specified schedule).

[Note: The XML example shown in this section is informative only.]

1970

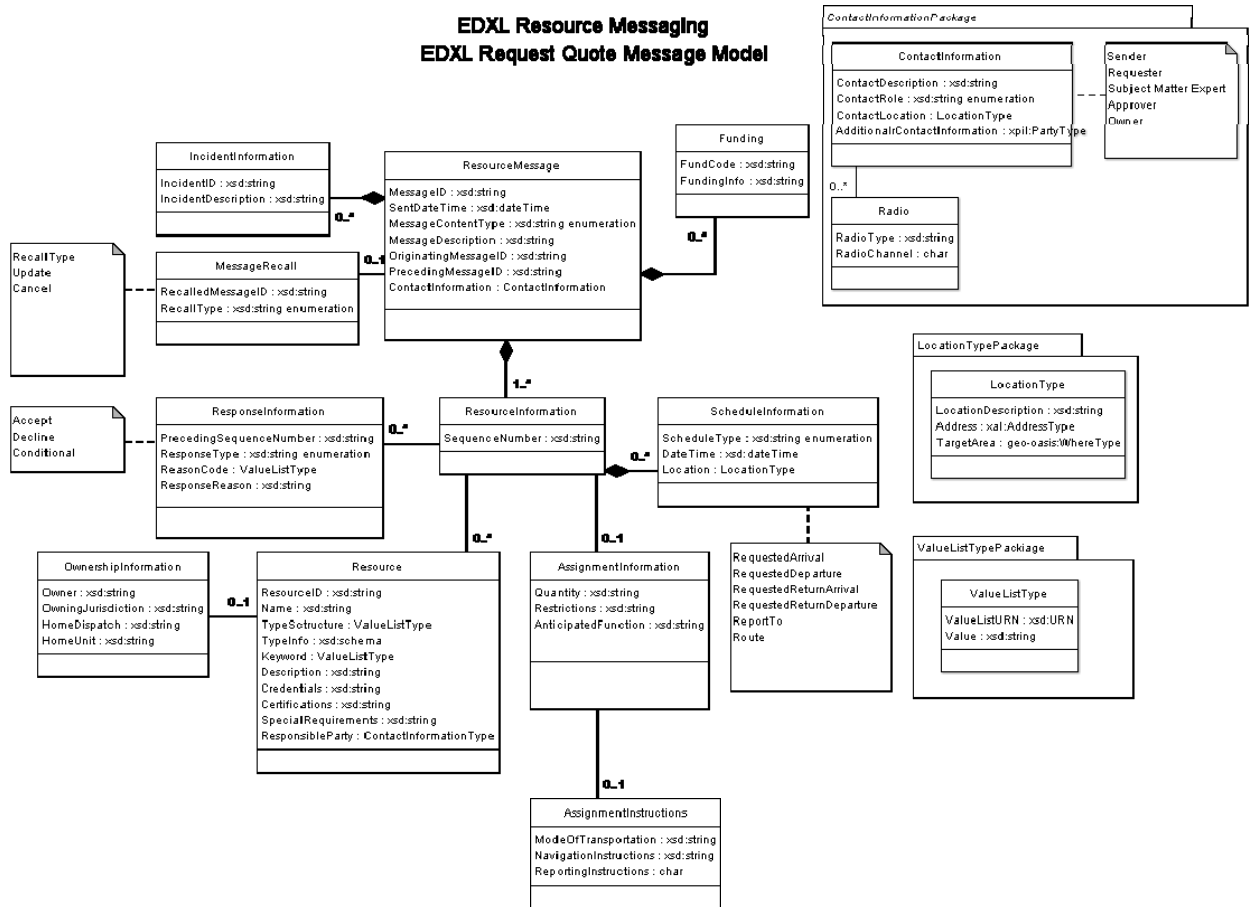

1971 **3.3.11 Request Quote Message**

1972 **3.3.11.1 Overview**

1973 The “Request Quote” message is used by the Resource Consumer to request a price quote from the
1974 Resource Supplier.

1975 **3.3.11.2 Element Reference Model**

1976 Figure 14 below shows the EDXL–RM Element Reference Model (ERM) tailored for the Request Quote
1977 Message. The ERM shows the element-level details for the main entities in the RM.

1978
1979
1980

Figure 14: EDXL-RM ERM for Request Quote Message

The following table outlines the element and attribute cardinalities for this message type.

Table 15: Request Quote Message Elements

Parent Element	Sub-Elements
ResourceMessage	MessageID , SentDateTime , MessageContentType [^] , MessageDescription, OriginatingMessageID , PrecedingMessageID, IncidentInformation*, MessageRecall, Funding*, ContactInformation *, ResourceInformation *
IncidentInformation	<i>IncidentID</i> , <i>IncidentDescription</i>
MessageRecall	RecalledMessageID , RecallType
Funding	<i>FundCode</i> , <i>FundingInfo</i>
ResourceInformation	SequenceNumber , ResponseInformation, Resource , AssignmentInformation, ScheduleInformation*
ResponseInformation	PrecedingSequenceNumber , ResponseType , <i>ReasonCode</i> , <i>ResponseReason</i>
Resource	<i>ResourceID</i> , <i>Name</i> , <i>TypeStructure</i> , <i>TypeInfo</i> , <i>Keyword</i> *, <i>Description</i> , <i>Credentials</i> , <i>Certifications</i> , <i>SpecialRequirements</i> , <i>ResponsibleParty</i> , <i>OwnershipInformation</i>
OwnerInformation	<i>Owner</i> , <i>OwningJurisdiction</i> , <i>HomeDispatch</i> , <i>HomeUnit</i>
AssignmentInformation	<i>Quantity</i> , <i>Restrictions</i> , <i>AnticipatedFunction</i> , <i>AssignmentInstructions</i>
AssignmentInstructions	<i>ModeOfTransportation</i> , <i>NavigationInstructions</i> , <i>ReportingInstructions</i>
ScheduleInformation	ScheduleType [^] , <i>DateTime</i> , <i>Location</i>

The following rules apply to the above elements/attributes:

- The ResourceMessage:MessageID, ResourceMessage:SentDateTime, ResourceMessage:MessageContentType, ResourceMessage:OriginatingMessageID, ResourceMessage:ContactInformation, and ResourceMessage:ResourceInformation elements MUST be present.
- The value of ResourceMessage:MessageContentType MUST be "RequestQuote".
- If a ResourceMessage:IncidentInformation element is present, then at least one of IncidentInformation:IncidentID and/or IncidentInformation:IncidentDescription element MUST be present.
- If the ResourceMessage:MessageRecall element is present, then the MessageRecall:RecalledMessageID and MessageRecall:RecallType elements must be present.
- If a ResourceMessage:Funding element is present, then at least one of Funding:FundCode and/or Funding:FundingInfo element MUST be present.
- The ResourceInformation: SequenceNumber and ResourceInformation:Resource elements MUST be present.
- If the ResourceInformation:ResponseInformation element is present, then the ResponseInformation:ResponseType and ResponseInformation:ReferenceID elements MUST be present.

- 2003 • If ResponseInformation:ResponseType has a value of “Conditional”, then at least one of
2004 ResponseInformation:ReasonCode and/or ResponseInformation:ResponseReason elements MUST
2005 be present.
- 2006 • At least one of Resource:ResourceID, Resource:Name, and/or Resource:Type:TypeStructure element
2007 MUST be present for each ResourceInformation:Resource element present.
- 2008 • If a Resource:OwnerInformation is present, then at least one of OwnershipInformation:Owner and/or
2009 OwnershipInformation:OwningJurisdiction element MUST be present.
- 2010 • If the ResourceInformation:ScheduleInformation element is present, then the
2011 ScheduleInformation:ScheduleType MUST be present and contain one of the following values:
 - 2012 • New Schedule Information: “RequestedArrival”, “RequestedDeparture”,
2013 “EstimatedReturnDeparture”, “EstimatedReturnArrival”, “ReportTo”, or “Route”.
- 2014
- 2015 The schema for a Request Quote message can be found in Appendix A.13.

2016 3.3.11.3 Message Flow

- 2017 The Request Quote message is usually an initial message created and sent by the Resource Consumer
2018 to any number of Resource Suppliers.
- 2019 The potential responses to this message include:
- 2020 • Response to Request Quote (See 3.3.12)
 - 2021 • This includes Accept, Decline, and any Conditional response
 - 2022 • Acknowledgement
 - 2023 • The EDXL-DE is used for a message acknowledgement.

2024 3.3.11.4 Message Example

2025 Below is an example Request Quote message. This message requests quotes for a “Debris
2026 Management Team” (id=001) and two “All Terrain Cranes” (id=002).

3.3.12 Response to Request Quote Message

3.3.12.1 Overview

The “Response to Request Quote” message is used by the Resource Supplier to respond with pricing information to a “Request Quote” message. The Resource Supplier may provide quotes for several alternative resources that match a single resource request.

3.3.12.2 Element Reference Model

Figure 15 below shows the EDXL–RM Element Reference Model (ERM) tailored for the Response to Request Quote Message. The ERM shows the element-level details for the main entities in the RM.

EDXL Resource Messaging **EDXL Response to Request Quote Message Model**

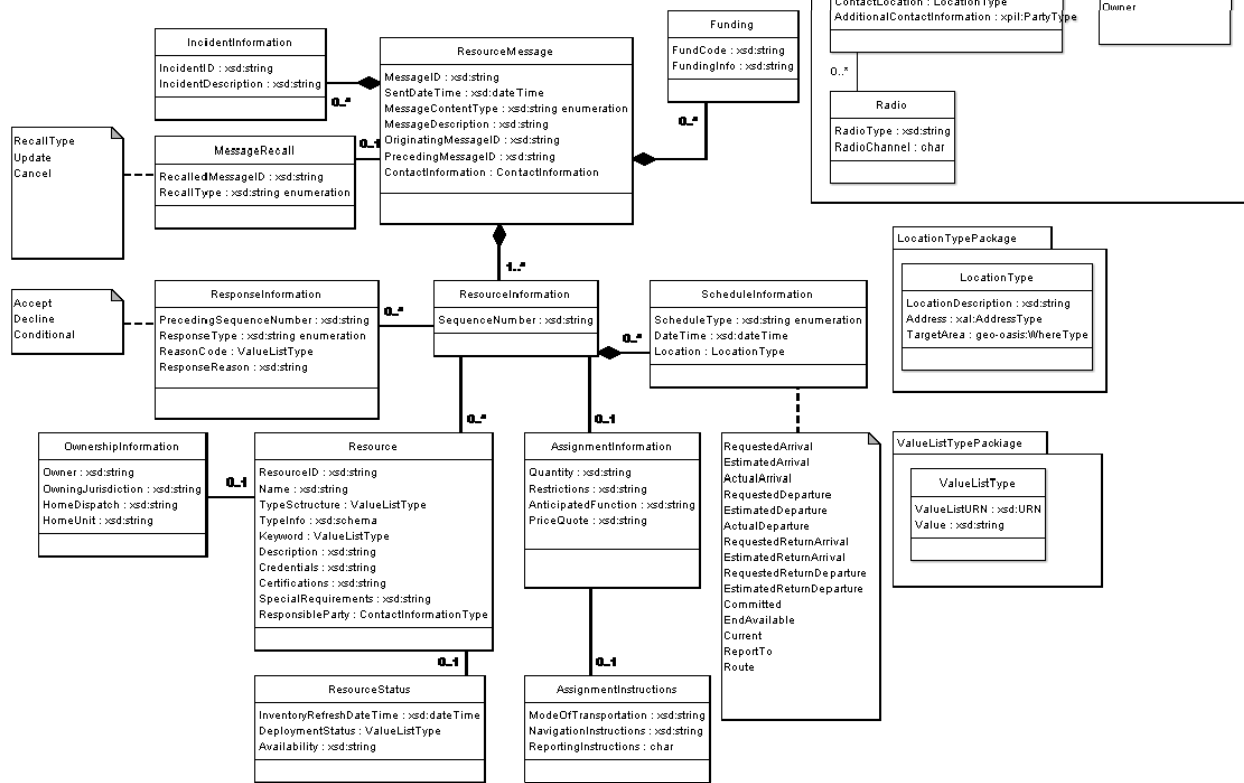

Figure 15: EDXL-RM ERM for Response to Request Quote Message

The following table outlines the element and attribute cardinalities for this message type.

Table 16: Response to Request Quote Message Elements

Parent Element	Sub-Elements
ResourceMessage	MessageID , SentDateTime , MessageContentType [*] , MessageDescription, OriginatingMessageID , PrecedingMessageID , IncidentInformation [*] , MessageRecall, Funding [*] , ContactInformation [*] , ResourceInformation [*]
IncidentInformation	<i>IncidentID</i> , <i>IncidentDescription</i>
MessageRecall	RecalledMessageID , RecallType
Funding	<i>FundCode</i> , <i>FundingInfo</i>
ResourceInformation	SequenceNumber , ResponseInformation , Resource [*] , AssignmentInformation, ScheduleInformation [*]
ResponseInformation	PrecedingSequenceNumber , ResourceType , ReasonCode , ResponseReason
Resource	<i>ResourceID</i> , <i>Name</i> , <i>TypeStructure</i> , <i>TypeInfo</i> , Keyword [*] , <i>Description</i> , <i>Credentials</i> , <i>Certifications</i> , <i>SpecialRequirements</i> , <i>Responsible Party</i> ,

	OwnershipInformation, ResourceStatus
OwnerInformation	Owner, OwningJurisdiction, HomeDispatch, HomeUnit
ResourceStatus	InventoryRefreshDateTime, DeploymentStatus, Availability
AssignmentInformation	Quantity, Restrictions, AnticipatedFunction, PriceQuote , AssignmentInstructions
AssignmentInstructions	ModeOfTransportation, NavigationInstructions, ReportingInstructions
ScheduleInformation	ScheduleType [^] , DateTime, Location

2174

2175 The following rules apply to the above elements/attributes:

- 2176 • The ResourceMessage:MessageID, ResourceMessage:SentDateTime,
2177 ResourceMessage:MessageContentType, ResourceMessage:OriginatingMessageID,
2178 ResourceMessage:PrecedingMessageID, ResourceMessage:ContactInformation, and
2179 ResourceMessage:ResourceInformation elements MUST be present.
- 2180 • The value of ResourceMessage:MessageContentType MUST be "ResponseToRequestQuote".
- 2181 • If a ResourceMessage:IncidentInformation element is present, then at least one of
2182 IncidentInformation:IncidentID and/or IncidentInformation:IncidentDescription element MUST be
2183 present.
- 2184 • If the ResourceMessage:MessageRecall element is present, then the
2185 MessageRecall:RecalledMessageID and MessageRecall:RecallType elements must be present.
- 2186 • If a ResourceMessage:Funding element is present, then at least one of Funding:FundCode and/or
2187 Funding:FundingInfo element MUST be present.
- 2188 • The ResourceInformation:SequenceNumber and ResourceInformation:ResponseInformation
2189 elements MUST be present.
- 2190 • If the ResponseInformation:ResponseType has a value of "Accept" or "Conditional", then at least one
2191 ResourceInformation:Resource element MUST be present.
- 2192 • The ResponseInformation: OriginatingSequence and ResponseInformation:ResponseType elements
2193 MUST be present.
- 2194 • If ResponseInformation:ResponseType has a value of "Conditional", at least one of
2195 ResponseInformation:ReasonCode and/or ResponseInformation:ResponseReason elements MUST
2196 be present.
- 2197 • If a ResourceInformation:Resource element is present, then at least one of Resource:ResourceID,
2198 Resource:Name, and/or Resource:Type:TypeStructure element MUST be present for each
2199 ResourceInformation:Resource element present.
- 2200 • If a Resource:OwnerInformation is present, then at least one of OwnershipInformation:Owner and/or
2201 OwnershipInformation:OwningJurisdiction element MUST be present.
- 2202 • If a ResourceInformation:AssignmentInformation element is present, then the
2203 AssignmentInformation:PriceQuote element MUST be present.
- 2204 • If the ResourceInformation:ScheduleInformation element is present, then the
2205 ScheduleInformation:ScheduleType MUST be present and contain one of the following values:
 - 2206 • New Schedule Information: "EstimatedArrival", "EstimatedDeparture",
2207 "RequestedReturnDeparture", "RequestedReturnArrival", "BeginAvailable", EndAvailable",
 - 2208 • Carried Forward Schedule Information: "RequestedArrival", "RequestedDeparture",
2209 "EstimatedReturnDeparture", "EstimatedReturnArrival", "ReportTo",
 - 2210 • New or Carried Forward Information: "Route".

2211

2212 The schema for a Response to Request Quote message can be found in Appendix A.14.

2213 3.3.12.3 Message Flow

2214 The Response to Request Quote message is sent by the Resource Supplier to the Resource Consumer
2215 in response to a Request Quote message.

2216 The potential responses to this message include:

- 2217 • Request for Information (RFI)
- 2218 • RequisitionResource
- 2219 • Acknowledgement
- 2220 • The EDXL-DE is used for a message acknowledgement.

2221 The Response to Request Quote message can potentially be followed by a Request Resource or
2222 Requisition Resource message from the Resource Consumer.

2223 3.3.12.4 Message Example

2224 Below is an example Response to Request Quote message. The message is a possible response to the
2225 Request Quote message shown in Section 3.3.11.4. The first quote request ("Debris Management
2226 Team", idref=001) is accepted, while the second ("All Terrain Crane", id=002) is declined.

2227

2348 **3.3.13 Request Resource Deployment Status Message**

2349 **3.3.13.1 Overview**

2350 The “Request Resource Deployment Status” message is used to request the current status of one or
2351 more deployed resources. It can be sent by the Resource Supplier to the Resource Consumer (e.g., to
2352 check the status of the resource after a “Release Resource” message) or by the Resource Consumer to
2353 the Resource Supplier (e.g., to track the progress of a resource after a “Requisition Resource” message).

2354 **3.3.13.2 Element Reference Model**

2355 Figure 16 below shows the EDXL–RM Element Reference Model (ERM) tailored for the Request
2356 Resource Deployment Status Message. The ERM shows the element-level details for the main entities in
2357 the RM.

2358
2359
2360

Figure 16: EDXL-RM ERM for Request Resource Deployment Status Message

2361 The following table outlines the element and attribute cardinalities for this message type.

2362

2363 *Table 17: Resource Deployment Status Message Elements*

Parent Element	Sub-Elements
ResourceMessage	MessageID , SentDateTime , MessageContentType^ , MessageDescription, OriginatingMessageID , PrecedingMessageID, IncidentInformation*, MessageRecall, Funding* ContactInformation* , ResourceInformation*
IncidentInformation	<i>IncidentID</i> , <i>IncidentDescription</i>
MessageRecall	RecalledMessageID , RecallType
Funding	<i>FundCode</i> , <i>FundingInfo</i>
ResourceInformation	SequenceNumber , Resource , AssignmentInformation, ScheduleInformation*
Resource	<i>ResourceID</i> , <i>Name</i> , <i>TypeStructure</i> , <i>TypeInfo</i> , <i>Keyword*</i> , <i>Description</i> , <i>Credentials</i> , <i>Certifications</i> , <i>SpecialRequirements</i> , <i>Responsible Party</i> , <i>OwnershipInformation</i>
OwnerInformation	<i>Owner</i> , <i>OwningJurisdiction</i> , <i>HomeDispatch</i> , <i>HomeUnit</i>
AssignmentInformation	Quantity, Restrictions, AnticipatedFunction, PriceQuote, OrderID, AssignmentInstructions
AssignmentInstructions	ModeOfTransportation, NavigationInstructions, ReportingInstructions
ScheduleInformation	ScheduleType^ , <i>DateTime</i> , <i>Location</i>

2364

2365 The following rules apply to the above elements/attributes:

- 2366 • The ResourceMessage:MessageID, ResourceMessage:SentDateTime,
2367 ResourceMessage:MessageContentType, ResourceMessage:OriginatingMessageID,
2368 ResourceMessage:ContactInformation, and ResourceMessage:ResourceInformation elements MUST
2369 be present.
- 2370 • The value of ResourceMessage:MessageContentType MUST be
2371 "RequestResourceDeploymentStatus".
- 2372 • If a ResourceMessage:IncidentInformation element is present, then at least one of
2373 IncidentInformation:IncidentID and/or IncidentInformation:IncidentDescription element MUST be
2374 present.
- 2375 • If the ResourceMessage:MessageRecall element is present, then the
2376 MessageRecall:RecalledMessageID and MessageRecall:RecallType elements must be present.
- 2377 • If a ResourceMessage:Funding element is present, then at least one of Funding:FundCode and/or
2378 Funding:FundingInfo element MUST be present.
- 2379 • The ResourceInformation:SequenceNumber and ResourceInformation:Resource elements MUST be
2380 present.
- 2381 • At least one of Resource:ResourceID, Resource:Name, and/or ResourceType:TypeStructure element
2382 MUST be present for each ResourceInformation:Resource element present.
- 2383 • If a Resource:OwnerInformation is present, then at least one of OwnershipInformation:Owner and/or
2384 OwnershipInformation:OwningJurisdiction element MUST be present.

- If the ResourceInformation:ScheduleInformation element is present, then the ScheduleInformation:ScheduleType element MUST be present and contain one of the following values:
 - Carried Forward Schedule Information: "RequestedArrival", "EstimatedArrival", "ActualArrival", "RequestedDeparture", "EstimatedDeparture", "ActualDeparture", "RequestedReturnDeparture", "EstimatedReturnDeparture", "ActualReturnDeparture", "RequestedReturnArrival", "EstimatedReturnArrival", "ActualReturnArrival", "BeginAvailable", "EndAvailable", "Committed", "ReportTo", or "Route".

The schema for a Request Resource Deployment Status message can be found in Appendix A.15.

3.3.13.3 Message Flow

The Request Resource Deployment Status message can be sent from the Resource Supplier to the Resource Consumer, or from the Resource Consumer to the Resource Supplier, any time after a resource is requisitioned or committed.

The potential responses to this message include:

- Report Resource Deployment Status
- Acknowledgement
 - The EDXL-DE is used for a message acknowledgement.

3.3.13.4 Message Example

Below is an example Request Resource Deployment Status message. This message requests the deployment status of the "Small Animal Sheltering Team"; it follows on from the example Commit message in Section 3.3.4.4, and precedes the Release Resource message in Section 3.3.8.4.

[Note: The XML example shown in this section is informative only.]

2469 3.3.14 Report Resource Deployment Status Message

2470 3.3.14.1 Overview

2471 The “Report Resource Deployment Status” message is used to report on the current status of any
2472 deployed resource. The message can be sent from the Resource Supplier to the Resource Consumer, or
2473 from the Resource Consumer to the Resource Supplier.

2474 3.3.14.2 Element Reference Model

2475 Figure 17 below shows the EDXL–RM Element Reference Model (ERM) tailored for the Report Resource
2476 Deployment Status Message. The ERM shows the element-level details for the main entities in the RM.

EDXL Resource Messaging EDXL Report Resource Deployment Status Message Model

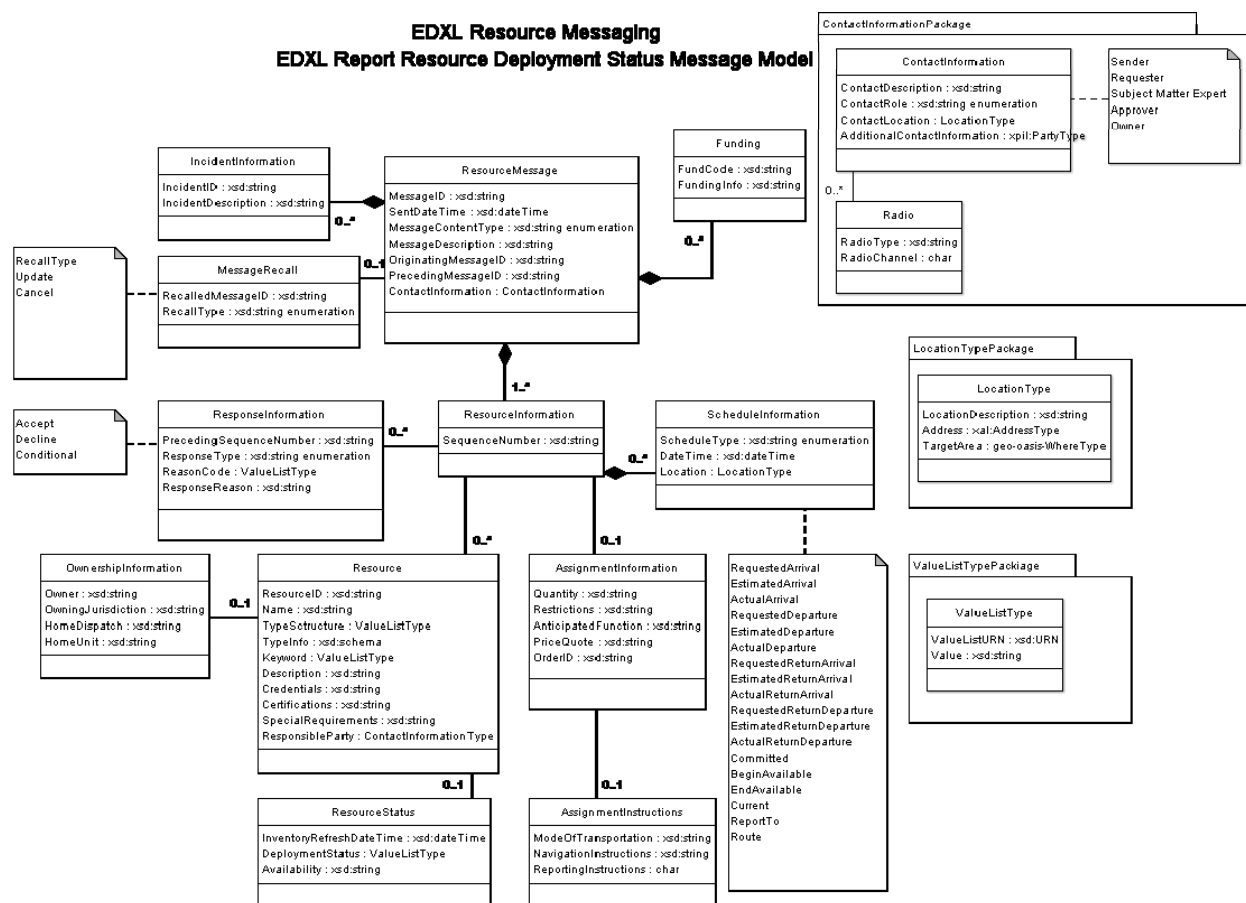

Figure 17: EDXL-RM ERM for Report Resource Deployment Status Message

The following table outlines the element and attribute cardinalities for this message type.

Table 18: Report Resource Deployment Status Message Elements

Parent Element	Sub-Elements
ResourceMessage	MessageID , SentDateTime , MessageContentType [^] , MessageDescription, OriginatingMessageID , PrecedingMessageID, IncidentInformation*, MessageRecall, Funding* ContactInformation* , ResourceInformation*
IncidentInformation	<i>IncidentID</i> , <i>IncidentDescription</i>
MessageRecall	RecalledMessageID , RecallType
Funding	<i>FundCode</i> , <i>FundingInfo</i>
ResourceInformation	SequenceNumber , ResponseInformation, Resource, AssignmentInformation, ScheduleInformation*
ResponseInformation	PrecedingSequenceNumber , ResourceType , <i>ReasonCode</i> , <i>ResponseReason</i>
Resource	<i>ResourceID</i> , <i>Name</i> , <i>TypeStructure</i> , <i>TypeInfo</i> , <i>Keyword</i> *, <i>Description</i> , <i>Credentials</i> , <i>Certifications</i> , <i>SpecialRequirements</i> , <i>Responsible Party</i> ,

	OwnershipInformation, ResourceStatus
OwnerInformation	Owner, OwningJurisdiction, HomeDispatch, HomeUnit
ResourceStatus	InventoryRefreshDateTime, DeploymentStatus, Availability
AssignmentInformation	Quantity, Restrictions, AnticipatedFunction, PriceQuote, OrderID, AssignmentInstructions
AssignmentInstructions	ModeOfTransportation, NavigationInstructions, ReportingInstructions
ScheduleInformation	ScheduleType[^] , DateTime, Location

2483

2484 The following rules apply to the above elements/attributes:

- 2485 • The ResourceMessage:MessageID, ResourceMessage:SentDateTime,
2486 ResourceMessage:MessageContentType, ResourceMessage:OriginatingMessageID,
2487 ResourceMessage:ContactInformation, and ResourceMessage:ResourceInformation elements MUST
2488 be present.
- 2489 • The value of ResourceMessage:MessageContentType MUST be
2490 "ReportResourceDeploymentStatus".
- 2491 • If a ResourceMessage:IncidentInformation element is present, then at least one of
2492 IncidentInformation:IncidentID and/or IncidentInformation:IncidentDescription element MUST be
2493 present.
- 2494 • If the ResourceMessage:MessageRecall element is present, then the
2495 MessageRecall:RecalledMessageID and MessageRecall:RecallType elements must be present.
- 2496 • If a ResourceMessage:Funding element is present, then at least one of Funding:FundCode and/or
2497 Funding:FundingInfo element MUST be present.
- 2498 • If the ResourceInformation:ResponseInformation element is present, the
2499 ResponseInformation:ResponseType and ResponseInformation:ReferenceID elements MUST be
2500 present.
- 2501 • If the ResponseInformation:ResponseType element has a value of "Conditional", at least one of
2502 ResponseInformation:ReasonCode and/or ResponseInformation:ResponseReason elements MUST
2503 be present.
- 2504 • If a ResourceInformation:Resource element is present, then at least one of Resource:ResourceID,
2505 Resource:Name, and/or Resource:Type:TypeStructure element MUST be present for each
2506 ResourceInformation:Resource element present.
- 2507 • If a Resource:OwnerInformation is present, then at least one of OwnershipInformation:Owner and/or
2508 OwnershipInformation:OwningJurisdiction element MUST be present.
- 2509 • If the ResourceInformation:ScheduleInformation element is present, then the
2510 ScheduleInformation:ScheduleType element MUST be present and contain one of the following
2511 values:
 - 2512 • Either New or Carried Forward Schedule Information: "RequestedArrival", "EstimatedArrival",
2513 "ActualArrival", "RequestedDeparture", "EstimatedDeparture", "ActualDeparture",
2514 "RequestedReturnDeparture", "EstimatedReturnDeparture", "ActualReturnDeparture",
2515 "RequestedReturnArrival", "EstimatedReturnArrival", "ActualReturnArrival", "BeginAvailable",
2516 EndAvailable", "Committed", "ReportTo", or "Route".

2517

2518 The schema for a Report Resource Deployment Status message can be found in Appendix A.16.

3.3.14.3 Message Flow

The Report Resource Deployment Status message can be sent from the Resource Supplier to the Resource Consumer, or from the Resource Consumer to the Resource Supplier, any time after a resource is requisitioned or committed. The message MAY be sent in response to an earlier Request Resource Deployment Status message.

The potential responses to this message include:

- Acknowledgement
 - The EDXL-DE is used for a message acknowledgement.

3.3.14.4 Message Example

Below is an example Report Resource Deployment Status message. This message shows a possible response to the Request Resource Deployment Status message in Section **Error! Reference source not found.**

[Note: The XML example shown in this section is informative only.]

3.3.15 Request Extended Deployment Duration

3.3.15.1 Overview

The “Request Extended Deployment Duration” message is sent by the Resource Consumer to the Resource Supplier when the Consumer wishes to retain one or more resources longer than previously agreed (e.g., in the original Requisition Resource and Commit Resource messages).

3.3.15.2 Element Reference Model

Figure 18 below shows the EDXL–RM Element Reference Model (ERM) tailored for the Request Extended Deployment Duration Message. The ERM shows the element-level details for the main entities in the RM.

EDXL Resource Messaging **EDXL Request Extended Deployment Duration Message Model**

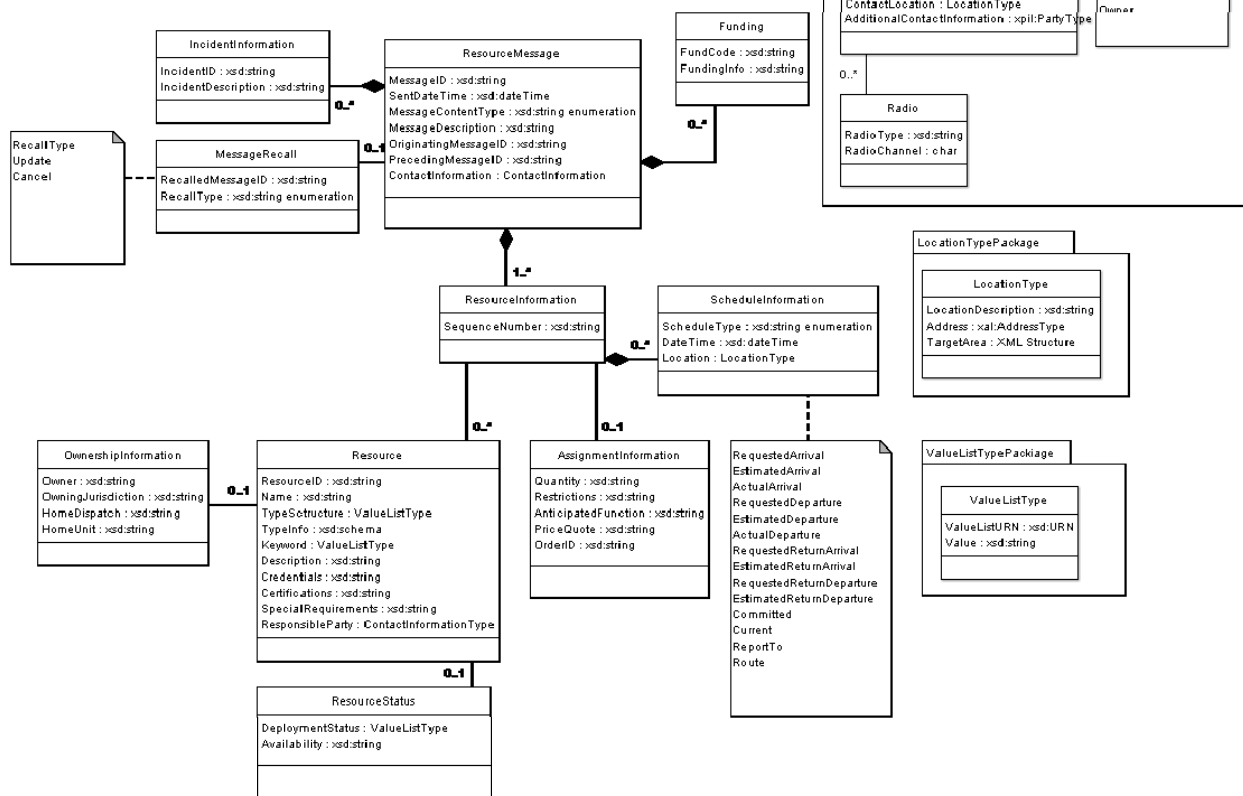

Figure 18: EDXL-RM ERM for Request Extended Deployment Duration Message

The following table outlines the element and attribute cardinalities for this message type.

Table 19: Request Extended Deployment Duration Message Elements

- 2641
- 2642 The following rules apply to the above elements/attributes:
- 2643 • The ResourceMessage:MessageID, ResourceMessage:SentDateTime,
2644 ResourceMessage:MessageContentType, ResourceMessage:OriginatingMessageID,
2645 ResourceMessage:ContactInformation, and ResourceMessage:ResourceInformation elements MUST
2646 be present.
 - 2647 • The value of ResourceMessage:MessageContentType MUST be
2648 "RequestExtendedDeploymentDuration".
 - 2649 • If a ResourceMessage:IncidentInformation element is present, then at least one of
2650 IncidentInformation:IncidentID and/or IncidentInformation:IncidentDescription element MUST be
2651 present.
 - 2652 • If the ResourceMessage:MessageRecall element is present, then the
2653 MessageRecall:RecalledMessageID and MessageRecall:RecallType elements must be present.
 - 2654 • If a ResourceMessage:Funding element is present, then at least one of Funding:FundCode and/or
2655 Funding:FundingInfo element MUST be present.
 - 2656 • The ResourceInformation:SequenceNumber and ResourceInformation:Resource elements MUST be
2657 present.
 - 2658 • At least one of Resource:ResourceID, Resource:Name, and/or ResourceType:TypeStructure element
2659 MUST be present for each ResourceInformation:Resource elements present for each
2660 ResourceInformation:Resource element.
 - 2661 • If a Resource:OwnerInformation is present, then at least one of OwnershipInformation:Owner and/or
2662 OwnershipInformation:OwningJurisdiction element MUST be present.
 - 2663 • If a ResourceInformation:ScheduleInformation element is present, then the
2664 ScheduleInformation:ScheduleType element MUST be present and contain one of the following
2665 values:
 - 2666 • Carried Forward Schedule Information: "RequestedArrival", "EstimatedArrival", "ActualArrival",
2667 "RequestedDeparture", "EstimatedDeparture", "ActualDeparture", "RequestedReturnArrival",
2668 "Committed", "ReportTo",
 - 2669 • Either New or Carried Forward Schedule Information: "RequestedReturnDeparture",
2670 "EstimatedReturnDeparture", "EstimatedReturnArrival", or "Route".
- 2671
- 2672 The schema for a Request Extended Deployment Duration message can be found in Appendix A.17.

2673 3.3.15.3 Message Flow

- 2674 The Request Extended Deployment Duration message is sent from the Resource Consumer to the
2675 Resource Supplier after the Commit Resource message and prior to the Release Resource message.
- 2676 The potential responses to this message include:
- 2677 • Response to Request Extended Deployment Duration (see 3.3.16)
 - 2678 • This includes Accept, Decline and Conditional responses
 - 2679 • Acknowledgement
 - 2680 • The EDXL-DE is used for a message acknowledgement.

3.3.15.4 Message Example

Below is an example Request Extended Deployment Duration message. This message follows on from the Commit Resource message in Section 3.3.4.4 and preceeds the Request Return and Release Resource messages in Sections 3.3.9.4 and 3.3.8.4 respectively.

[Note: The XML example shown in this section is informative only.]

3.3.16 Response to Request Extended Deployment Duration Message

3.3.16.1 Overview

The “Response to Request Extended Deployment Duration” message is used as the response to a “Request Extended Deployment Duration”. It allows the sender to accept, decline, or offer conditions upon which deployment duration of resources may be extended.

3.3.16.2 Element Reference Model

Figure 19 below shows the EDXL–RM Element Reference Model (ERM) tailored for the Response to Request Extended Deployment Duration Message. The ERM shows the element-level details for the main entities in the RM.

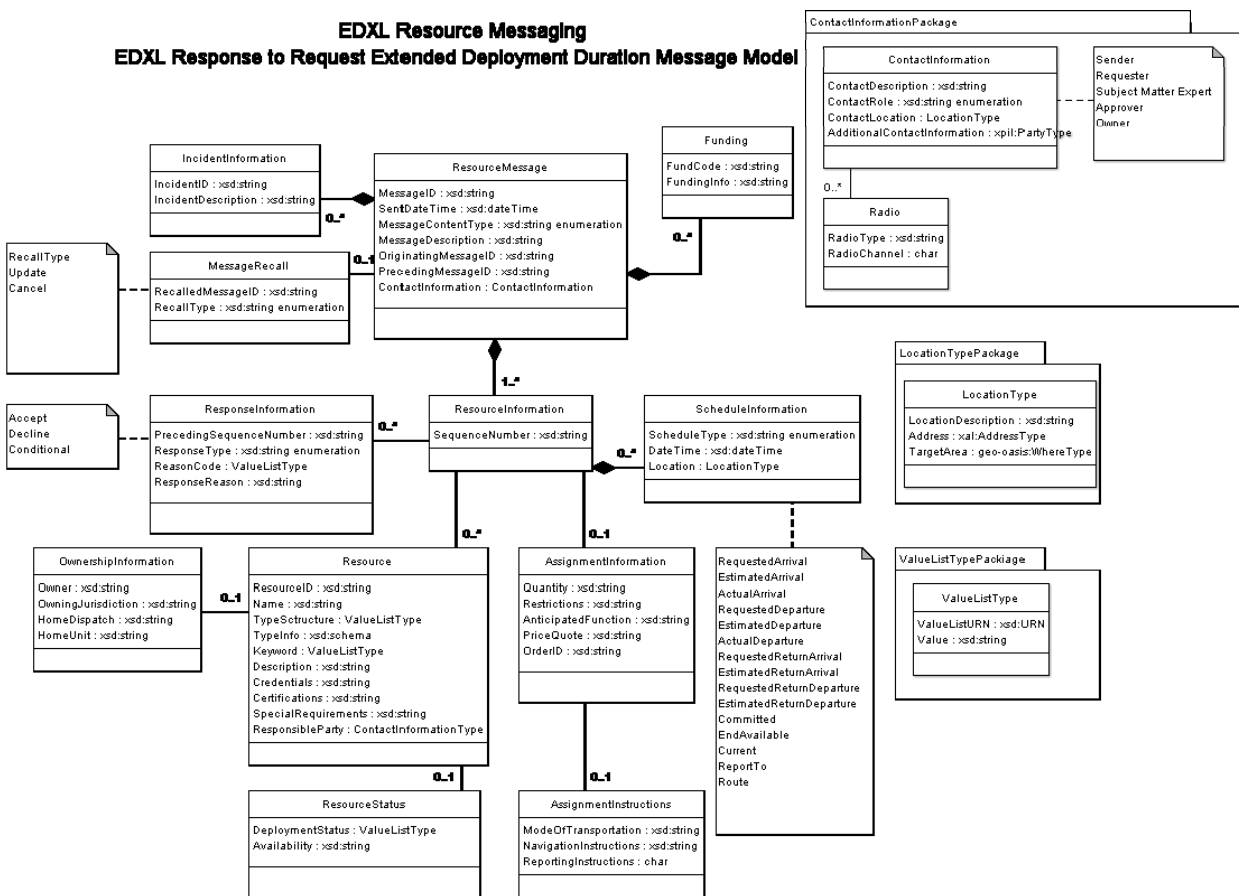

Figure 19: EDXL-RM ERM Response to Request Extended Deployment Duration Message

The following table outlines the element and attribute cardinalities for this message type.

Table 20: Response to Request Extended Deployment Duration Message Elements

Parent Element	Sub-Elements
ResourceMessage	MessageID, SentDateTime, MessageContentType^, MessageDescription, OriginatingMessageID, PrecedingMessageID, IncidentInformation*, MessageRecall, Funding* ContactInformation*, ResourceInformation*

IncidentInformation	<i>IncidentID, IncidentDescription</i>
MessageRecall	RecalledMessageID, RecallType
Funding	<i>FundCode, FundingInfo</i>
ResourceInformation	SequenceNumber, ResponseInformation , Resource [^] , AssignmentInformation, ScheduleInformation*
ResponseInformation	<i>PrecedingSequenceNumber, ResponseType, ReasonCode, ResponseReason</i>
Resource	<i>ResourceID, Name, TypeStructure, TypeInfo, Keyword*, Description, Credentials, Certifications, SpecialRequirements, OwnershipInformation, ResourceStatus</i>
OwnerInformation	<i>Owner, OwningJurisdiction, HomeDispatch, HomeUnit</i>
ResourceStatus	DeploymentStatus, Availability
AssignmentInformation	Quantity, Restrictions, AnticipatedFunction, PriceQuote, OrderID, AssignmentInstructions
AssignmentInstructions	ModeOfTransportation, NavigationInstructions, ReportingInstructions
ScheduleInformation	ScheduleType[^] , DateTime, Location

2754

2755 The following rules apply to the above elements/attributes:

- 2756 • The ResourceMessage:MessageID, ResourceMessage:SentDateTime,
2757 ResourceMessage:MessageContentType, ResourceMessage:OriginatingMessageID,
2758 ResourceMessage:PrecedingMessageID, ResourceMessage:ContactInformation, and
2759 ResourceMessage:ResourceInformation elements MUST be present.
- 2760 • The value of ResourceMessage:MessageContentType MUST be
2761 "ResponseToRequestExtendedDeploymentDuration".
- 2762 • If a ResourceMessage:IncidentInformation element is present, then at least one of
2763 IncidentInformation:IncidentID and/or IncidentInformation:IncidentDescription element MUST be
2764 present.
- 2765 • If the ResourceMessage:MessageRecall element is present, then the
2766 MessageRecall:RecalledMessageID and MessageRecall:RecallType elements must be present.
- 2767 • If a ResourceMessage:Funding element is present, then at least one of Funding:FundCode and/or
2768 Funding:FundingInfo element MUST be present.
- 2769 • The ResourceInformation:SequenceNumber and ResourceInformation:ResponseInformation
2770 elements MUST be present.
- 2771 • The ResponseInformation:PrecedingSequenceNumber and ResponseInformation:ResponseType
2772 elements MUST be present.
- 2773 • If the ResponseElement:ResponseType element has a value of "Accept" or "Conditional", then at
2774 least one ResourceInformation.Resource element MUST be present. Otherwise, the
2775 ResourceInformation.Resource element is optional.
- 2776 • If ResponseInformation:ResponseType has a value of "Conditional", at least one of
2777 ResponseInformation:ReasonCode and/or ResponseInformation:ResponseReason elements MUST
2778 be present.
- 2779 • If a ResourceInformation:Resource element is present, then at least one of Resource:ResourceID,
2780 Resource:Name, and/or Resource:TypeStructure element MUST be present.

- If a Resource:OwnerInformation is present, then at least one of OwnershipInformation:Owner and/or OwnershipInformation:OwningJurisdiction element MUST be present.
- If the ResourceInformation:ScheduleInformation element is present, then the ScheduleInformation:ScheduleType element MUST be present and contain one of the following values:
 - New Schedule Information: "EndAvailable",
 - Carried Forward Schedule Information: "RequestedArrival", "EstimatedArrival", "ActualArrival", "RequestedDeparture", "EstimatedDeparture", "ActualDeparture", "RequestedReturnDeparture",
 - Either New or Carried Forward Schedule Information: "EstimatedReturnDeparture", "RequestedReturnArrival", "EstimatedReturnArrival", "Committed", "ReportTo", or "Route".

The schema for a Response to Request Extended Deployment Duration message can be found in Appendix A.18.

3.3.16.3 Message Flow

The Response to Request Extended Deployment Duration message is sent from the Resource Supplier to the Resource Consumer in response to a Request Extended Deployment Duration message.

The potential responses to this message include:

- Acknowledgement (See ??)

3.3.16.4 Message Example

Below is an example Resonse to Request Extended Deployment Duration message. This message follows on from the example Request Extended Deployment Duration message shown in Section 3.3.15.4 (declining the request).

[Note: The XML example shown in this section is informative only.]

2882

4 Data Dictionary (NORMATIVE)

2883

4.1.1 ResourceMessage Element

Element	MessageID
Type	xsd:string [Identified in the RMCommonTypes schema as MessageIDType]
Usage	REQUIRED , MUST be used once and only once
Definition	Each EDXL resource message contains an identifier that uniquely identifies each resource message.
Comments	<ul style="list-style-type: none"> The EDXL Distribution Element contains the "Distribution ID", which identifies the "container" for the distribution message information.
Requirements Supported	20

2884

Element	SentDateTime
Type	xsd:dateTime [Identified in the RMCommonTypes schema as DateTimeType]
Usage	REQUIRED , MUST be used once and only once
Definition	The system stamped date and time the resource message was sent. (1) The date and time is represented in [dateTime] format (e. g., "2002-05-24T16:49:00-07:00" for 24 May 2002 at 16: 49 PDT). (2) Alphabetic timezone designators such as "Z" MUST NOT be used. The timezone for UTC MUST be represented as "-00:00" or "+00:00.
Comments	<ul style="list-style-type: none"> Original requirement = ICS "Request Date/Time"
Requirements Supported	21

2885

Element	MessageContentType
Type	xsd:string enumeration [Identified in the RMCommonTypes schema as MessageContentTypeType]
Usage	REQUIRED , MUST be used once and only once

Definition	Specifies the purpose / type of resource content / payload being sent within the Resource Reference Model
Comments	<ul style="list-style-type: none"> Value must be one of the following: <ol style="list-style-type: none"> 1. Request Resource 2. Response to Request Resource 3. Requisition Resource 4. Commit Resource 5. Request Information 6. Response to Request Information 7. Offer Unsolicited Resource 8. Release Resource 9. Request Return 10. Request Quote 11. Response to Request Return 12. Response to Request Quote 13. Request Resource Deployment Status 14. Report Resource Deployment Status 15. Request Extended Deployment Duration 16. Response to Request Extended Deployment Duration
Requirements Supported	2,3,4,5,6,7,8,9,10,11,12,17

2886

Element	MessageDescription
Type	xsd:string [Identified in the RMCommonTypes schema as MessageDescriptionType]
Usage	CONDITIONAL , MAY be used once and only once
Definition	Text field used to specify the information requested in a request for information and the response to a request for information. May also be used to include additional information in other message types.
Comments	<ul style="list-style-type: none"> Conditional Usage: <ul style="list-style-type: none"> Required: <ul style="list-style-type: none"> ResourceMessage:MessageContentType = "Request Information" Optional: <ul style="list-style-type: none"> Otherwise
Requirements	20

Supported	
-----------	--

2887

Element	OriginatingMessageID
Type	xsd:string [Identified in the RMCommonTypes schema as MessageIDType]
Usage	REQUIRED , MUST be used once and only once
Definition	Each EDXL resource message contains a MessageID that uniquely identifies each resource message. InitialMessageID identifies the MessageID of the first message in the sequence to which the message belongs. If the message is itself the initial message in a new sequence, InitialMessageID will have the same value as the MessageID element. In some other cases, the InitialMessageID element will have the same value as the OriginatingMessageID element. The InitialMessageID value essentially forms a unique identifier for a group of related messages, linking them together so that the relationship between the messages is made explicit and unambiguous (and threads of messages can be tracked by resource management software).
Comments	<ul style="list-style-type: none"> ▪ This Message ID is an EDXL-RM Message ID, not an EDXL-Distribution Element Message ID. ▪ The OriginatingMessageID of an originating message will be the MessageID of that message.
Requirements Supported	20

2888

Element	PrecedingMessageID
Type	xsd:string [Identified in the RMCommonTypes schema as MessageIDType]
Usage	CONDITIONAL , MAY be used once and only once
Definition	Each EDXL resource message contains a MessageID that uniquely identifies each resource message. OriginatingMessageID identifies the MessageID of the original message to which this message refers. This element is most commonly used in Response messages to refer back to the corresponding Request message. This Message ID is an EDXL-RM Message ID, not an EDXL-Distribution Element Message ID.
Comments	<ul style="list-style-type: none"> ▪ The PrecedingMessageID of an originating message will be the MessageID of that message. ▪ Conditional Usage: <ul style="list-style-type: none"> ○ Required: <ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = "Response To

	<p>Request Resource”</p> <ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = “Commit Resource” ▪ ResourceMessage:MessageContentType = “Response to Request Information” ▪ ResourceMessage:MessageContentType = “Response to Request Return” ▪ ResourceMessage:MessageContentType = “Response to Request Quote” ▪ ResourceMessage:MessageContentType = “Response to Request Extended Deployment Duration” <ul style="list-style-type: none"> ○ Optional: <ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = “Requisition Resource” ▪ ResourceMessage:MessageContentType = “Request for Information” ▪ ResourceMessage:MessageContentType = “Release Resource” ▪ ResourceMessage:MessageContentType = “Request Return” ▪ ResourceMessage:MessageContentType = “Request Quote” ▪ ResourceMessage:MessageContentType = “Request Resource Deployment Status” ▪ ResourceMessage:MessageContentType = “Report Resource Deployment Status” ○ Not Applicable: <ul style="list-style-type: none"> ▪ Otherwise
Requirements Supported	

2889

Element	ContactInformation
Type	XML structure [Identified in the RMCommonTypes schema as ContactInformationType]
Usage	REQUIRED , MUST be used at least once
Definition	The contact associated with the resource message.
Comments	
Requirements Supported	

2890 **4.1.2 IncidentInformation Element**

Element	IncidentID
Type	xsd:string [Identified in the RMCommonTypes schema as IncidentIDType]
Usage	CONDITIONAL , MAY be used once and only once.
Definition	The name or other identifier of the incident to which the current message refers.
Comments	<ul style="list-style-type: none"> If an IncidentInformation element is present, then at least one of IncidentInformation:IncidentID or IncidentInformation:IncidentDescription MUST be present
Requirements Supported	19

2891

Element	IncidentDescription
Type	xsd:string [Identified in the RMCommonTypes schema as IncidentDescriptionType]
Usage	CONDITIONAL , MAY be used once and only once.
Definition	A free form description of the incident to which the current message refers.
Comments	<ul style="list-style-type: none"> If an IncidentInformation element is present, then at least one of IncidentInformation:IncidentID or IncidentInformation:IncidentDescription MUST be present
Requirements Supported	19

2892 **4.1.3 MessageRecall Element**

Element	RecalledMessageID
Type	xsd:string [Identified in the RMCommonTypes schema as MessageIDType]
Usage	REQUIRED , MAY be used once and only once.
Definition	The identifier of the previously sent message that is to be recalled. MessageRecall is used to replace a previously sent message by updating or canceling it.
Comments	<ul style="list-style-type: none"> The MessageRecall element is Optional.

Requirements Supported	14, 15
------------------------	--------

2893

Element	RecallType
Type	xsd:string enumeration [Identified in the RMCommonTypes as an element within RecallTypeType]
Usage	REQUIRED , MAY be used once and only once.
Definition	Specifies the recall type as either an update or a cancel of the previously sent message. MessageRecall is used to replace a previously sent message which is then updated or cancelled.
Comments	<ul style="list-style-type: none"> ▪ The Message Recall element is Optional. ▪ Value must be one of the following: <ol style="list-style-type: none"> 1. Update 2. Cancel
Requirements Supported	14,15

2894

4.1.4 Funding Element

Element	FundCode
Type	xsd:string [Identified in the RMCommonTypes schema as FundCodeType]
Usage	CONDITIONAL , MAY be used once and only once.
Definition	Identifies the funds that will pay for the resource
Comments	<ul style="list-style-type: none"> • The Funding element is Required ONLY in a Requisition Resource message. • If a funding element is present, then at least one of Funding:FundCode or Funding:FundingInfo MUST be present • Identified in support of NIMS Resource Management Guide NIC-GDL0004 • This field may be used as a comma separated list of fund codes (e.g. "HP4347,RT45S")
Requirements Supported	18,24

2895

Element	FundingInfo
Type	xsd:string [Identified in the RMCommonTypes schema as FundingInfoType]
Usage	CONDITIONAL , MAY be used once and only once.
Definition	Provides additional information on the funds that will pay for the resource
Comments	<ul style="list-style-type: none"> • A textual description of funding sources or distribution • The Funding element is Required ONLY in a Requisition Resource message. • If a funding element is present, then at least one of Funding:FundCode or Funding:FundingInfo MUST be present
Requirements Supported	18, 24

2896 4.1.5 ResourceInformation Element

Element	SequenceNumber
Type	xsd:string [Identified in the RMCommonTypes schema as SequenceNumberType]
Usage	REQUIRED , MUST be used once and only once
Definition	This element identifies the instance of ResourceInformation within the message. It does not identify the Resource.
Comments	<ul style="list-style-type: none"> ▪ The purpose of this element is to uniquely identify the ResourceInformation element in future messages that refer to this message. ▪ The Resource is identified by a combination of one or more of ResourceID, Name and/or ResourceTypeStructure.
Requirements Supported	

2897 4.1.6 ResponseInformation Element

Element	PrecedingSequenceNumber
Type	xsd:string [Identified in the RMCommonTypes schema as SequenceNumberType]
Usage	REQUIRED , MUST be used once and only once
Definition	This element identifies the instance of ResourceInformation within the message specified in the ResourceMessage:OriginatingMessageID element.

Comments	•
Requirements Supported	

2898

Element	ResponseType
Type	xsd:string enumeration [Identified in the RMCommonTypes schema as ResponseTypeType]
Usage	REQUIRED , MUST be used once and only once
Definition	Used to accept or decline a Request, Response, Unsolicited Offer, or a Request Return. "Decline" indicates the request, response or offer is not accepted. "Conditional" means that the request is accepted pending certain specified conditions.
Comments	<ul style="list-style-type: none"> • The "ResponseReason" is associated with a "decline" value. • Value must be one of the following: <ol style="list-style-type: none"> 1. Accept 2. Decline 3. Conditional
Requirements Supported	6,29

2899

Element	ReasonCode
Type	ValueListUrnType [Identified in the RMCommonTypes schema as ReasonCodeType]
Usage	CONDITIONAL , MAY be used once and only once
Definition	Code from a managed list that offers an explanation for a declined or conditional response to a Request, Response, Unsolicited Offer, or a Request Return.
Comments	<ul style="list-style-type: none"> ▪ If the ResponseInformation:ResponseType element has a value of "Conditional", then at least one of the ResponseInformation:ReasonCode and/or ResponseInformation: ResponseReason elements must be present.
Requirements Supported	6,29

2900

Element	ResponseReason
----------------	----------------

Type	xsd:string [Identified in the RMCommonTypes schema as ResponseReasonType]
Usage	CONDITIONAL , MAY be used once and only once
Definition	Explanation for a declined or conditional response to a Request, Response, Unsolicited Offer, or a Request Return.
Comments	<ul style="list-style-type: none"> ▪ If the ResponseInformation:ResponseType element has a value of “Conditional”, then at least one of the ResponseInformation:ReasonCode and/or ResponseInformation: ResponseReason elements must be present.
Requirements Supported	6,29

2901 4.1.7 Resource Element

Element	ResourceID
Type	xsd:string [Identified in the RMCommonTypes schema as ResourceIDType]
Usage	CONDITIONAL , MAY be used once and only once.
Definition	This identifier (if available) is used to identify and track.a resource.
Comments	<ul style="list-style-type: none"> • At least one of Resource:ResourceID, Resource:Name or Resource:TypeStructure MUST be present and used throughout a exchange of messages. • May be selected via the <Resource Keyword> if available.
Requirements Supported	3,16,26

2902

Element	Name
Type	xsd:string [Identified in the RMCommonTypes schema as ResourceNameType]
Usage	CONDITIONAL , MAY be used once and only once.
Definition	A name or title of the resource used for identification and tracking.
Comments	<ul style="list-style-type: none"> • At least one of Resource:ResourceID, Resource:Name or Resource:TypeStructure MUST be present and used throughout a exchange of messages. • May be selected via the <ResourceKeyword> if available.

Requirements Supported	3,16,18,26
------------------------	------------

2903

Element	TypeStructure
Type	ValueListType [Identified in the RMCommonTypes schema as TypeStructureType]
Usage	CONDITIONAL , MAY be used once and only once.
Definition	Uniform Resource Name of a certified list of resources maintained by the Community of Interest (COI) for the value referenced. Facilitates link to ARMS and other managed lists
Comments	<ul style="list-style-type: none"> At least one of Resource:ResourceID, Resource:Name or Resource:TypeStructure MUST be contained in each Resource element present.
Requirements Supported	3,16,25, 26

2904

Element	TypeInfo
Type	xsd: schema [Identified in the RMCommonTypes schema as TypeInfoType]
Usage	OPTIONAL , MAY be used once and only once
Definition	The resource type as defined by either a Keyword structure or a validatable schema.
Comments	<ul style="list-style-type: none"> This is xsd:any in the TypeInfoType that is dependent on the value of TypeStructure above.
Requirements Supported	3,16,25,26

2905

Element	Keyword
Type	ValueListType [Identified in the RMCommonTypes schema as KeywordType]
Usage	OPTIONAL , MAY be used one to many
Definition	Any value from a discrete managed list, used to specify a keyword.

Comments	<ul style="list-style-type: none"> Allows reference to a separate schema for enumerations. Example: valueListUrn= "http://www.dhs.gov/NiemEquipmentResources" and value="Portable Radio", or valueListUrn= "http://www.eic.org/Package" and value="DMAT – burn"
Requirements Supported	3,16,25,26

2906

Element	Description
Type	xsd:string [Identified in the RMCommonTypes schema as DescriptionType]
Usage	OPTIONAL , MAY be used once and only once
Definition	Free Text description of resource or resource characteristics, situation requiring resource assistance, or statement of mission resource must satisfy.
Comments	▪
Requirements Supported	3,7,16,18,26

2907

Element	Credentials
Type	xsd:string [Identified in the RMCommonTypes schema as CredentialsType]
Usage	OPTIONAL , MAY be used once and only once
Definition	Statements of resource qualifications showing that a person or role has a right to exercise official power
Comments	▪
Requirements Supported	

2908

Element	Certifications
Type	xsd:string [Identified in the RMCommonTypes schema as CertificationsType]
Usage	OPTIONAL , MAY be used once and only once
Definition	Statements of recognition that a resource has met special requirements or

	qualifications within a field
Comments	▪
Requirements Supported	

2909

Element	SpecialRequirements
Type	xsd:string [Identified in the RMCommonTypes schema as SpecialRequirementsType]
Usage	OPTIONAL , MAY be used once and only once
Definition	A description of any special needs related to the requested resource (e.g. must carry protective equipment)
Comments	<ul style="list-style-type: none"> • Not intended to carry certifications or capabilities.
Requirements Supported	3,7,16,27

2910

Element	ResponsibleParty
Type	XML Structure [Identified in the RMCommonTypes schema as ContactInformationType.]
Usage	CONDITIONAL , MAY be used once and only once
Definition	Contact Info for person currently responsible for resource
Comments	<ul style="list-style-type: none"> ▪ Conditional Usage: <ul style="list-style-type: none"> ○ Not Applicable: <ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = "Request Resource" ○ Optional, otherwise
Requirements Supported	3,7,16,27

2911 4.1.8 OwnershipInformation Element

Element	Owner
----------------	-------

Type	xsd:string [Identified in the RMCommonTypes schema as OwnerType]
Usage	CONDITIONAL , MAY be used once and only once
Definition	The name of an agency or supplier that owns the resource (which may not be the home unit or dispatch). Also referred to as home agency.
Comments	<ul style="list-style-type: none"> At least one of OwnershipInformation:Owner or OwnershipInformation:OwningJurisdiction each OwnershipInformation element.
Requirements Supported	3,16,18

2912

Element	OwningJurisdiction
Type	xsd:string [Identified in the RMCommonTypes schema as OwningJurisdictionType]
Usage	CONDITIONAL , MAY be used once and only once
Definition	A geopolitical area in which an organization, person, or object has a specific range of authority for specified resources.
Comments	<ul style="list-style-type: none"> At least one of OwnershipInformation:Owner or OwnershipInformation:OwningJurisdiction each OwnershipInformation element. Can be a code
Requirements Supported	3, 16, 18

2913

Element	HomeDispatch
Type	xsd:string [Identified in the RMCommonTypes schema as HomeDispatchType]
Usage	CONDITIONAL , MAY be used once and only once
Definition	Resource home agency dispatch center name. This identifies the dispatch unit that has primary responsibility for maintaining information on the resource (e.g., Ft. Collins Dispatch Center, Rocky Mountain Area Coordination Center).
Comments	<ul style="list-style-type: none"> Conditional Usage: <ul style="list-style-type: none"> Not Applicable:

	<ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = "Request Resource" ▪ Optional, otherwise
Requirements Supported	18

2914

Element	HomeUnit
Type	xsd:string [Identified in the RMCommonTypes schema as HomeUnitType]
Usage	OPTIONAL , MAY be used once and only once
Definition	The unit (office, district, organization, etc.) from which the resource typically works or is used (e.g., Manti-Lasal National Forest/Sanpete District). When released from an assignment, the location to which the resource is released will usually be determined by the home unit.
Comments	<ul style="list-style-type: none"> ▪ Conditional Usage: <ul style="list-style-type: none"> ○ Not Applicable: <ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = "Request Resource" ○ Optional, otherwise
Requirements Supported	18

2915 4.1.9 ResourceStatus Element

Element	InventoryRefreshDateTime
Type	xsd:dateTime [Identified in the RMCommonTypes schema as InventoryRefreshDateTimeType]
Usage	CONDITIONAL , MAY be used once and only once
Definition	Date and time that resource inventory counts were last updated
Comments	<ul style="list-style-type: none"> ▪ Conditional Usage: <ul style="list-style-type: none"> ○ Optional: <ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = "Response to Request Resource" ▪ ResourceMessage:MessageContentType = "Commit Resource" ▪ ResourceMessage:MessageContentType = "Request

	<p>Information”</p> <ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = “Response to Request Information” ▪ ResourceMessage:MessageContentType = “Offer Unsolicited Resource” ▪ ResourceMessage:MessageContentType = “Response to Request Quote” ▪ ResourceMessage:MessageContentType = “Report Resource Deployment Status” <p>○ Not Applicable, otherwise</p>
Requirements Supported	2,12’

2916

Element	DeploymentStatus
Type	ValueListType [Identified in the RMCommonTypes schema as DeploymentStatusType]
Usage	CONDITIONAL , MAY be used once and only once
Definition	Any value from a discrete managed list, used to specify the general state of a resource if known.
Comments	<ul style="list-style-type: none"> ▪ Conditional Usage: <ul style="list-style-type: none"> ○ Required <ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = “Response to Request Return” ○ Optional: <ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = “Response to Request Resource” ▪ ResourceMessage:MessageContentType = “Commit Resource” ▪ ResourceMessage:MessageContentType = “Request Information” ▪ ResourceMessage:MessageContentType = “Response to Request Information” ▪ ResourceMessage:MessageContentType = “Offer Unsolicited Resource” ▪ ResourceMessage:MessageContentType = “Release Resource” ▪ ResourceMessage:MessageContentType = “Request Return” ▪ ResourceMessage:MessageContentType = “Response to Request Quote” ▪ ResourceMessage:MessageContentType = “Report Resource Deployment Status”

	<ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = "Request Extended Deployment Duration" ▪ ResourceMessage:MessageContentType = "Response to Request Extended Deployment Duration" ○ Not Applicable, otherwise • Allows reference to a separate schema for enumerations. Example: valueListUrn= "http://www.dhs.gov/NIMSResourceStatus" and value="Available". Example values include: <ul style="list-style-type: none"> ○ atBase-available ○ enroute-Unavailable ○ on-scene-unavailable ○ returning-unavailable ○ Resource maintenance ○ Out of Service ○ Depleted ○ Available ○ Committed ○ In transit ○ At incident (ROSS) ○ Assigned ○ In Camp ○ Reassignment ○ Return transit ○ Returned ○ Demobilized ○ Etc.
Requirements Supported	18

2917

Element	Availability
Type	xsd:string [Identified in the RMCommonTypes schema as AvailabilityType]
Usage	CONDITIONAL , MAY be used once and only once
Definition	Text to describe availability and limitations on availability. Resource availability refers to resource that it is present or ready for immediate use, or otherwise accessible or obtainable, or is qualified or willing to do something or to assume a responsibility.
Comments	<ul style="list-style-type: none"> ▪ Conditional Usage: <ul style="list-style-type: none"> ○ Required

	<ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = "Response to Request Return" ○ Optional: <ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = "Response to Request Resource" ▪ ResourceMessage:MessageContentType = "Request Information" ▪ ResourceMessage:MessageContentType = "Response to Request Information" ▪ ResourceMessage:MessageContentType = "Offer Unsolicited Resource" ▪ ResourceMessage:MessageContentType = "Release Resource" ▪ ResourceMessage:MessageContentType = "Request Return" ▪ ResourceMessage:MessageContentType = "Response to Request Quote" ▪ ResourceMessage:MessageContentType = "Report Resource Deployment Status" ▪ ResourceMessage:MessageContentType = "Request Extended Deployment Duration" ▪ ResourceMessage:MessageContentType = "Response to Request Extended Deployment Duration" ○ Not Applicable, otherwise
Requirements Supported	3,16

2918

2919 4.1.10 AssignmentInformation Element

Element	Quantity
Type	xsd:string [Identified in the RMCommonTypes schema as QuantityType]
Usage	CONDITIONAL , MAY be used once and only once
Definition	Description of amount of resource needed in both quantity and units of measure.
Comments	<ul style="list-style-type: none"> • Value must be non-negative. • Conditional Usage: <ul style="list-style-type: none"> ○ Required <ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = "Response to Request Resource" and ResponseInformation:ResponseType = "Accept" ▪ ResourceMessage:MessageContentType = "Response to Request Resource" and ResponseInformation:ResponseType

	<ul style="list-style-type: none"> = "Conditional" ▪ ResourceMessage:MessageContentType = "Requisition Resource" ▪ ResourceMessage:MessageContentType = "Commit Resource" ▪ ResourceMessage:MessageContentType = "Release Resource" ○ Optional, otherwise.
Requirements Supported	3,16,18,26

2920

Element	Restrictions
Type	xsd:string [Identified in the RMCommonTypes schema as RestrictionsType]
Usage	OPTIONAL , MAY be used one to many
Definition	Description of a condition governing the availability of resources. E.g. condition for number of beds available may be "if patents have insurance". This may be thought of as a term/condition or a restriction on availability.
Comments	▪
Requirements Supported	28

2921

Element	AnticipatedFunction
Type	xsd:string [Identified in the RMCommonTypes schema as AnticipatedFunctionType]
Usage	OPTIONAL , MAY be used once and only once
Definition	Anticipated function, task, job, or role to be provided by the requested resource.
Comments	▪
Requirements Supported	18,28

2922

Element	PriceQuote [Identified in the RMCommonTypes schema as PriceQuoteType]
----------------	---

Type	xsd:string
Usage	CONDITIONAL , MAY be used once and only once
Definition	Description of quoted cost to acquire desired resource including currency, if the distinction is appropriate.
Comments	<ul style="list-style-type: none"> • • Completed in response to a “Request Quote” • Conditional Usage: <ul style="list-style-type: none"> ○ Required <ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = “Response to Request Quote” ○ Not Applicable <ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = “Request Resource” ▪ ResourceMessage:MessageContentType = “Request Quote” ○ Optional, otherwise
Requirements Supported	10,30

2923

Element	OrderID
Type	xsd:string [Identified in the RMCommonTypes schema as OrderIDType]
Usage	CONDITIONAL , MAY be used once and only once
Definition	Reference to the external system number or ID assigned by the ordering system or personnel meeting the request for resources that has been made.
Comments	<ul style="list-style-type: none"> • • There is no assurance of uniqueness between various external systems. • Conditional Usage: <ul style="list-style-type: none"> ○ Optional <ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = “Commit Resource” ▪ ResourceMessage:MessageContentType = “Request Information” ▪ ResourceMessage:MessageContentType = “Response to Request Information” ▪ ResourceMessage:MessageContentType = “Release Resource”

	<ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = “Request Return” ▪ ResourceMessage:MessageContentType = “Response to Request Return” ▪ ResourceMessage:MessageContentType = “Request Resource Deployment Status” ▪ ResourceMessage:MessageContentType = “Report Resource Deployment Status” ▪ ResourceMessage:MessageContentType = “Request Extended Deployment Duration” ▪ ResourceMessage:MessageContentType = “Response to Request Extended Deployment Duration” <ul style="list-style-type: none"> ○ Not Applicable, otherwise
Requirements Supported	18,30

2924 4.1.11 AssignmentInstructions Element

Element	ModeOfTransportation
Type	xsd:string [Identified in the RMCommonTypes schema as ModeOfTransportationType]
Usage	CONDITIONAL , MAY be used once and only once
Definition	Method or mode used to transport the resource to or from the incident.
Comments	<ul style="list-style-type: none"> • Conditional Usage: <ul style="list-style-type: none"> ○ Not Applicable <ul style="list-style-type: none"> ▪ ResourceMessage:MessageContentType = “Request Resource” ▪ ResourceMessage:MessageContentType = “Request Extended Deployment Duration” ○ Optional, otherwise
Requirements Supported	18,30

2925

Element	NavigationInstructions
Type	xsd:string [Identified in the RMCommonTypes schema as NavigationInstructionsType]
Usage	CONDITIONAL , MAY be used once and only once
Definition	Instructions that define how to get to the “report to location”

Comments	<ul style="list-style-type: none"> Conditional Usage: <ul style="list-style-type: none"> Not Applicable <ul style="list-style-type: none"> ResourceMessage:MessageContentType = "Request Resource" ResourceMessage:MessageContentType = "Request Extended Deployment Duration" Optional, otherwise
Requirements Supported	28

2926

Element	ReportingInstructions
Type	xsd:string [Identified in the RMCommonTypes schema as ReportingInstructionsType]
Usage	CONDITIONAL , MAY be used once and only once
Definition	The name of the party that the requested item is to report to when they arrive at the incident.
Comments	<ul style="list-style-type: none"> Conditional Usage: <ul style="list-style-type: none"> Not Applicable <ul style="list-style-type: none"> ResourceMessage:MessageContentType = "Request Resource" ResourceMessage:MessageContentType = "Request Extended Deployment Duration" Optional, otherwise
Requirements Supported	30

2927

4.1.12 ScheduleInformation Element

Element	ScheduleType
Type	xsd:string enumeration [Identified in the RMCommonTypes schema as ScheduleTypeType]
Usage	REQUIRED , MUST be used once and only once
Definition	A scheduled event that occurs at a particular time and/or at a particular location.
Comments	<ul style="list-style-type: none"> Value must be one of the following: <ol style="list-style-type: none"> ResourceRequestedArrivalDateTime

	<ul style="list-style-type: none"> ▪ When the resource is needed. Completed for Resource requests, returns, etc. ▪ ICS uses the term "delivery" vs. "arrival". "Arrival" used here because this applies to Human Resources also <ol style="list-style-type: none"> 2. ResourceEstimatedDepartureDateTime <ul style="list-style-type: none"> ▪ When the resource is expected to depart from its current location for transit to a "Report-to Location" 3. ResourceActualDepartureDateTime <ul style="list-style-type: none"> ▪ Actual date and time when the resource departs from its current location for transit to a "Report To Location". 4. ResourceEstimatedArrivalDateTime <ul style="list-style-type: none"> ▪ When the resource is expected to arrive at its "Report To Location". 5. Committed <ul style="list-style-type: none"> ▪ When specified resource is committed to a request or requisition. Completed in response to a resource request message. Specified resource is no longer available to be applied to other resource requests ▪ "Dispatch" is a commitment of resources in the Distribution Element 6. ResourceActualArrivalDateTime <ul style="list-style-type: none"> ▪ Actual date and time of arrival of the resource a "Report To Location". 7. ResourceEstimatedDepartureDateTime <ul style="list-style-type: none"> ▪ When the resource is expected to depart from its current location for transit to a "Report-to Location" 8. ResourceEstimatedArrivalDateTime <ul style="list-style-type: none"> ▪ When the resource is expected to arrive at its "Report To Location". 9. ResourceActualDepartureDateTime <ul style="list-style-type: none"> ▪ Actual date and time when the resource departs from its current location for transit to a "Report To Location". 10. ResourceActualArrivalDateTime <ul style="list-style-type: none"> ▪ Actual date and time of arrival of the resource a "Report To Location". 11. ResourceAnticipatedReturnDateTime <ul style="list-style-type: none"> ▪ When the resource is expected to be returned or demobilized. Completed for a "Request Resource". This element with the "Requested Arrival Date / Time" provides the estimated duration of resource deployment.
Requirements Supported	2, 11, 12, 28, 30

2928

Element	DateTime
Type	xsd:dateTime [Identified in the RMCommonTypes schema as DateTimeType]
Usage	OPTIONAL , MAY be used once and only once

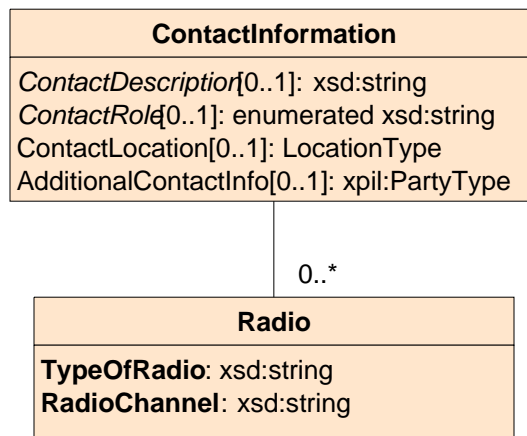

Definition	The date and time that a scheduled event takes place.
Comments	•
Requirements Supported	2, 11, 12, 28, 30

2929

Element	Location
Type	XML structure [Identified in the RMCommonTypes schema as LocationType]
Usage	OPTIONAL , MAY be used once and only once
Definition	The location in which a scheduled event takes place.
Comments	•
Requirements Supported	

2930 4.1.13 Supporting Element Types

2931 4.1.13.1 ContactInformationType

2932

2933

Element	ContactDescription
Type	xsd:string [Identified in the RMCommonTypes schema as ContactDescriptionType]
Usage	CONDITIONAL , MAY be used once and only once.
Definition	Description of the contact associated with the resource message.

Comments	<ul style="list-style-type: none"> If a ContactInformation element is present, then at least one of ContactInformation:ContactDescription or ContactInformation:ContactRole MUST be present
Requirements Supported	18,23,24

2934

Element	ContactRole
Type	xsd:string enumeration [Identified in the RMCommonTypes schema as ContactRoleType]
Usage	CONDITIONAL , MAY be used once and only once.
Definition	Role of the contact associated with the resource message.
Comments	<ul style="list-style-type: none"> If a ContactInformation element is present, then at least one of ContactInformation:ContactDescription or ContactInformation:ContactRole MUST be present Value must be one of the following: <ol style="list-style-type: none"> "Sender" (who sent the message) "Requester" (authorization for the message / request) "Subject Matter Expert" (answer questions or provide details) "Approver" "RespondingOrg" (who responded to the message) "Owner"
Requirements Supported	18,23,24

2935

Element	ContactLocation
Type	XML Structure [Identified in the RMCommonTypes schema as LocationType]
Usage	OPTIONAL , MAY be used once and only once.
Definition	The geophysical location of the contact.
Comments	
Requirements Supported	18,23,24

2936

Element	AdditionalContactInformation
Type	xpil:PartyType [Identified in the RMCommonTypes schema as AdditionalContactInformationType]
Usage	OPTIONAL , MAY be used once and only once.
Definition	Any other contact information including name and other party information.
Comments	▪ .
Requirements Supported	18,23,24

2937 **4.1.13.1.1 Radio Element**

Element	RadioType
Type	xsd:string [Identified in the RMCommonTypes schema as RadioTypeType]
Usage	REQUIRED , Must be used once and only once
Definition	Contact radio type of the person or organization referred to in ContactRole
Comments	▪ .
Requirements Supported	18,23

2938

Element	RadioChannel
Type	xsd:string [Identified in the RMCommonTypes schema as RadioChannelType]
Usage	REQUIRED , MUST be used once and only once
Definition	Contact radio channel of the person or organization referred to in ContactRole
Comments	▪ “Channel” and “Frequency” are synonyms for purposes of this standard
Requirements Supported	18,23

2939 **4.1.13.2 LocationType**

LocationType
<i>LocationDescription</i> [0..1]: xsd:string <i>Address</i> [0..*]: xal:AddressType <i>TargetArea</i> [0..1]: geo-oasis:WhereType

2940

Element	LocationDescription
Type	xsd:string [Identified in the RMCommonTypes schema as LocationDescriptionType]
Usage	CONDITIONAL , MAY be used once and only once.
Definition	A free-form textual description of a location.
Comments	<ul style="list-style-type: none"> At least one of the Description, Address or TargetArea elements must be present.
Requirements Supported	

2941

Element	Address
Type	xal:AddressType [Identified in the RMCommonTypes schema as AddressType]
Usage	CONDITIONAL , MAY be used zero to many.
Definition	The identifier of an explicit address.
Comments	<ul style="list-style-type: none"> At least one of the Description, Address or TargetArea elements must be present.
Requirements Supported	

2942

Element	TargetArea
Type	geo-oasis:WhereType [Identified in the RMCommonTypes schema as TargetAreaType]
Usage	CONDITIONAL , MAY be used once and only once.
Definition	The container element for location information. This element is structured to import the specific "WhereType" from the proposed geo:oasis GML specification. It allows the target Area to be defined a choice that includes:

	<ul style="list-style-type: none"> • Point – WGS84 lat long • Line – a series of points • Circle - a point and radius • Polygon – a set of connected non-crossing points • Envelope – two points used to define a bounding rectangle <p>It also allows the use of a set of attributes defined for “WhereType.” More detailed definitions for geo-oasis:WhereType and its components can be found in the geo:oasis proposed specification. Specific usage of those types for RM are found in the section “Imported Type Definitions” below.</p>
Comments	<ul style="list-style-type: none"> ▪ At least one of the Description, ExplicitAddress or TargetArea elements must be present.
Requirements Supported	<ul style="list-style-type: none"> ▪

2943 4.1.13.2.1 Imported Type Definitions

Type	geo-oasis:WhereType
Usage	Used for as the type value for TargetArea elements
Definition	<p>WhereType provides a mechanism for defining location. It allows the target Area to be defined as a choice of one of the following:</p> <ul style="list-style-type: none"> • gml:Point • gml:LineString • gml:CircleByCenterPoint • gml:Ploygon • gml:Envelope <p>It also allows the use of a set of attributes (oasis:whereAttrGroup) defined for “WhereType.” More detailed definitions for geo:oasis:WhereType can be found in the geo:oasis proposed specification</p>
Comments	<ul style="list-style-type: none"> ▪ Specific usage structures for the choices above to be used in the RM specification are found in definitions included later in this section. ▪ Use of the oasis:whereAttrGroup is not covered by this standard. While oasis:whereAttrGroup can be used, its particular use should be regarded as a proprietary extension of the Resource Messaging standard, meaning that an understanding of its use cannot be guaranteed by implementation instances of the standard.
Requirements Supported	<ul style="list-style-type: none"> ▪

2944

Type	geo-oasis:WhereType using GML:Point
Usage	Where TargetAreaType is best represented as a WGS84 point.
Definition	<p>The use of gml:Point within TargetArea provides location using a specific WGS-84 point value that is compatible with compatible with GML compliant geospatial information systems. The following example applies:</p> <pre> <oasis:where> <gml:Point> <gml:pos>45.256 -71.92</gml:pos> </gml:Point> </oasis:where> </pre> <p>More detailed definitions for geo:oasis:WhereType can be found in the geo:oasis proposed specification.</p>
Comments	<ul style="list-style-type: none"> ▪ The geo-oasis proposal offers the use of an attribute within the Point tag to indicate an alternate Coordinate Reference System (other than WGS-84). The Resource Messaging Standard requires the use of WGS-84 only.
Requirements Supported	<ul style="list-style-type: none"> ▪

2945

Type	geo-oasis:WhereType using GML:LineString
Usage	Where TargetAreaType is best represented as a route along a series of WGS84 points.
Definition	<p>The use of gml:LineString within TargetArea provides location along a line represented by a specific list of WGS-84 point values that is compatible with GML compliant geospatial information systems. The following example applies:</p> <pre> <oasis:where> <gml:LineString> <gml:posList> 45.256 -110.45 46.46 -109.48 43.84 -109.86 </gml:posList> </gml:LineString> </oasis:where > </pre> <p>More detailed definitions for geo:oasis:WhereType can be found in the geo:oasis proposed specification.</p>

Comments	<ul style="list-style-type: none"> ▪ The geo-oasis proposal offers the use of an attribute within the Point tag to indicate an alternate Coordinate Reference System (other than WGS-84). The Resource Messaging Standard requires the use of WGS-84 only.
Requirements Supported	<ul style="list-style-type: none"> ▪

2946

Type	geo-oasis:WhereType using GML:CircleByCenterPoint
Usage	Where TargetAreaType is best represented circular area of a given radius in kilometers around a center point represented in WGS84.
Definition	<p>The use of gml:CircleByCenterPoint within TargetArea provides location as a circle centered on a WGS-84 referenced point with a radius defined in kilometers. The following example applies:</p> <pre> <oasis:where> <gml:CircleByCenterPoint> <gml:pos> 45.256 -110.45 </gml:pos> <gml:radius> 10 </gml:radius> </gml:CircleByCenterPoint> </oasis:where> </pre> <p>More detailed definitions for geo:oasis:WhereType can be found in the geo:oasis proposed specification.</p>
Comments	<ul style="list-style-type: none"> ▪ The geo-oasis proposal offers the use of an attribute within the Point tag to indicate an alternate Coordinate Reference System (other than WGS-84). The Resource Messaging Standard requires the use of WGS-84 only. ▪ The geo-oasis proposal contains the option to use attributes to change the unit of measure to other than kilometers. For the resource messaging standard such attributes will not be used.
Requirements Supported	<ul style="list-style-type: none"> ▪

2947

Type	geo-oasis:WhereType using GML:Polygon
Usage	Where TargetAreaType is best represented as a connected group of WGS 84 points representing an actual area of concern.
Definition	<p>The use of gml:Polygon within TargetArea provides a ring of points (first and last point are the same) represented by a specific list of WGS-84 point values that is compatible with GML compliant geospatial information systems. The following example applies:</p>

	<pre> <oasis:where> <gml:Polygon> <gml:exterior> <gml:LinearRing> <gml:posList> 45.256 -110.45 46.46 -109.48 43.84 -109.86 45.256 -110.45 </gml:posList> </gml:LinearRing> </gml:exterior> </gml:Polygon> </oasis:where> </pre> <p>More detailed definitions for geo:oasis:WhereType can be found in the geo:oasis proposed specification.</p>
Comments	<ul style="list-style-type: none"> ▪ The geo-oasis proposal offers the use of an attribute within the Point tag to indicate an alternate Coordinate Reference System (other than WGS-84). The Resource Messaging Standard requires the use of WGS-84 only.
Requirements Supported	<ul style="list-style-type: none"> ▪

2948

Type	geo-oasis:WhereType using GML:Polygon
Usage	Where TargetAreaType is best represented as a connected group of WGS 84 points representing an actual area of concern.
Definition	<p>The use of gml:Polygon within TargetArea provides a ring of points (first and last point are the same) represented by a specific list of WGS-84 point values that is compatible with GML compliant geospatial information systems. The following example applies:</p> <pre> <oasis:where> <gml:Polygon> <gml:exterior> <gml:LinearRing> <gml:posList> 45.256 -110.45 46.46 -109.48 43.84 -109.86 45.256 -110.45 </gml:posList> </gml:LinearRing> </gml:exterior> </pre>

	<p style="text-align: center;"></gml:Polygon> </oasis:where></p> <p>More detailed definitions for geo:oasis:WhereType can be found in the geo:oasis proposed specification.</p>
Comments	<ul style="list-style-type: none"> ▪ The geo-oasis proposal offers the use of an attribute within the Point tag to indicate an alternate Coordinate Reference System (other than WGS-84). The Resource Messaging Standard requires the use of WGS-84 only. ▪ The geo-oasis proposal offers an alternate notation for Polygon using separate gml:pos elements for each point in the polygon. Resource messages will not use this feature and will only use the gml:posList layout.
Requirements Supported	<ul style="list-style-type: none"> ▪

2949

Type	geo-oasis:WhereType using GML:Envelope
Usage	Where TargetAreaType is best represented as a rectangular area of interest often known as a "bounding box." of WGS 84 points representing an actual area of concern.
Definition	<p>The use of gml:Envelope within TargetArea provides two WGS 84 point representations, the first representing a lower corner of the box and the second representing an upper corner. The following example applies:</p> <pre> <oasis:where> <gml:Envelope> <gml:lowerCorner>42.943 -71.032</gml:lowerCorner> <gml:upperCorner>43.039 -69.856</gml:upperCorner> </gml:Envelope> </oasis:where> </pre> <p>More detailed definitions for geo:oasis:WhereType can be found in the geo:oasis proposed specification.</p>
Comments	<ul style="list-style-type: none"> ▪ The geo-oasis proposal offers the use of an attribute within the Point tag to indicate an alternate Coordinate Reference System (other than WGS-84). The Resource Messaging Standard requires the use of WGS-84 only.
Requirements Supported	<ul style="list-style-type: none"> ▪

2950 4.1.13.3 ValueListType

Element	ValueListURN
Type	xsd:anyURI [Identified in the RMCommonTypes schema as ValueListURNType]

sage	REQUIRED , MUST be used once and only once
Definition	The name of the certified list maintained by the Community of Interest (COI) for the value referenced.
Comments	<ul style="list-style-type: none"> Derive from DE namespace?
Sub-elements	
Requirements Supported	25,26

2951

Element	Value
Type	xsd:string [Identified in the RMCommonTypes schema as ValueType]
Usage	REQUIRED , MUST be used one to many
Definition	A value from the certified list maintained by the Community of Interest (COI).
Comments	<ul style="list-style-type: none">

Requirements Supported	

5 Distribution of EDXL-RM (NON-NORMATIVE)

EDXL DISTRIBUTION ELEMENT (EDXL-DE)

The EDXL Distribution Element (EDXL-DE) V, 1.0 was adopted as a standard in April 2006. The DE provides a flexible message-distribution framework for emergency information systems data sharing among emergency information systems using the XML-based Emergency Data Exchange Language (EDXL). This format may be used over any data transmission system, including but not limited to the SOAP HTTP binding. The primary use of the EDXL Distribution Element is to identify and provide information to enable the routing of encapsulated payloads, called Content Objects. It is used to provide a common mechanism to encapsulate content information.

The primary purpose of the Distribution Element is to facilitate the routing of any properly formatted XML emergency message to recipients. The Distribution Element may be thought of as a "container". It provides the information to route "payload" message sets (such as Alerts or Resource Messages) by including key routing information such as distribution type, geography, incident, and sender/recipient IDs. Messages may be distributed by specific recipients, by a geographic area, or by other codes such as agency type (police, fire, etc.).

EDXL RESOURCE MESSAGING (EDXL-RM) DISTRIBUTION

The primary purpose of the Emergency Data Exchange Language Resource Messaging (EDXL-RM) Specification is to provide a set of standard formats for XML emergency messages. These Resource Messages are specifically designed as payloads of the EDXL-DE. Together EDXL-DE and EDXL-RM are intended to expedite all activities associated with resources needed to respond and adapt to emergency incidents.

The EDXL-DE is designed to carry one or more "Content Objects", and each Content Object may be in the form of well-formed XMLContent, or NonXMLContent. EDXL-RM is designed to be compatible as well-formed XMLContent for routing using the EDXL-DE. Metadata (i.e. the "codes" mentioned above) for routing / distribuion is found only in the EDXL-DE, and not in the EDXL-RM. Therefore, other routing mechanisms may be used to distribute EDXL-RM content if this metadata is provided in the same fashion. Alternatively, other routing mechanisms may be utilized for "directed distribution" of EDXL-RM content, meaning the sender specifies specific recipients of the payload. The EDXL-DE also supports directed distribution through its "explicitAddress" element.

A. XML Schema for the EDXL Resource Messaging

Schemas included in Appendix A are for reference only. The normative schemas can be found at <http://docs.oasis-open.org/emergency/edxl-rm/v1.0/cd01/schemas/>.
