

International Teleconference Support Services

This service is provided to reduce international calling expenses for OASIS members, and is only for use during calls for OASIS Technical Committees and Subcommittees. OASIS Members who use this international bridge can call into this bridge, which is then connected to the Primary call of the TC.

OASIS Member Service staff will manage and monitor this service. You can direct any questions to them via email or telephone. OASIS is happy to be able to provide this service, but most note that misuse or use beyond the planned use may be cause for its discontinuance.

Instructions for OASIS 3 OpenDocument

Before your TC conference call begins, make sure you have this information and the primary conference call information that your committee is using. You must connect to this bridge, then dial out to the primary conference of the TC.

It will be useful for the callers intending to use this to designate who the international call Leader is, as someone must follow the steps shown below as **Leader Only**- in order to connect the international bridge to the main conference. More than 1 caller can dial in as leader, but only one needs to dial out.

1. Call the telephone number for your country, using the local number where possible. See the number table on page 2
2. When prompted, enter your Conference Code **9667511** followed by #.
3. **Leader Only**- When prompted, press * (STAR, not hash) to identify yourself as the call leader, then enter your Leader PIN **3109** followed by #.
4. **Leader Only**-Press 1 to begin your conference
5. **Leader Only**-When you are ready to join the main conference, dial *1 .This will invoke the call-out feature, with which you can call the main conference service. If the number you are calling is in the US or Canada dial the number directly 1-xxx-xxx-xxxx You do not need to dial your country's international call code, as you are already connected to a US based phone switch. If you experience any problem, you can connect to a service agent to help you.
