Proposal document: sca-policy-1[1].1-spec-wd-07\_Issue\_15.pdf

Starting at Section 4.3.3.1 - line 890

Anish: Line 909 - WSDL interfaces are QNames, which is not the way that they are presented here - an NCName is not possible

Ashok: Request - should vote on this section with a rider indicating that the details could change

Anish: Messages are QNames also - So for 926 you could just use the Message QName

Dave B: There is a possibility of full boolean logic here - and this does not exist either in Profile intents or in PolicySet provides attributes - what is people's thinking about such a concept?

**Action 2008-09-15-01: Mike E: Lines 1113, 1130 of the Issue 15 Proposal need to be fixed.**

Completed reading through the changes proposed by the resolution of Issue 15

Ashok discusses his problems with the proposal ...when using a Policy Repository associated with the Domain
