Latest email contains Mike Edwards' puzzlement regarding the proposed function.

<Discussion of the required function>

**Action 20081208-03: (Ashok & Rich) To come back with an updated proposal**

## **ISSUE-33: Capabilities**

<http://www.osoa.org/jira/browse/POLICY-33>

Proposal:

<http://lists.oasis-open.org/archives/sca-policy/200811/msg00008.html>

Proposal is attached to the email above: "Issue33\_capabilities\_v1.ppt"

Dave discusses the proposal in the slides

<breaks after slide 5>

Ashok: Suppose there is a binding and that it has alwaysProvides and mayProvides

- if you want to do something not in those, you can add in a PolicySet

Ashok: so this neverProvides marks out some things that cannot be done in that way (no policySet could be used to obtain this feature)

Dave: If a service or reference @requires="X" and the binding is used that has @neverProvides="X", then it is an error

Slide 6 - an alternative approach - using positive statements of available policies that can be configured using parameters/policy sets - ie. list those extra things that the binding does support: @provides attribute on binding type
