ETSI

World Class Standards

"Security as a <u>Business opportunity!</u>
A winning driver to ensure the success
of a technology and to increase confidence
and trust for the end users!""

The annual ETSI Security Workshop has become the greatest annual international security standardization workshop. It will include overviews of the work being done in the area of security across standards and technical bodies, along with presentations from major organisations involved in **security initiatives.**

Participants in the Workshop will:

➜ Assess & spotlight ongoing work on ICT security standards
➜ Localize the gaps & duplication in security standardization
➜ Start to define new work areas
➜ Share ideas and proposals on security innovation, prioritization
  of efforts and implementation evaluation.

Topics that will be addressed include:

➜ Next Generation Networks security,
➜ Mobile Telecommunications systems,
➜ ICT trustworthiness and integrity
➜ Research and Innovation
➜ RFID and NFC Security issues
➜ Internet of Things
➜ Identity Management and your Privacy
➜ Cryptography
➜ Smart Cards and future trends
➜ Quantum Key Distribution
➜ Machine to Machine communication
➜ Standards prioritisation and evaluation

There will be presentations from major organisations involved in security initiatives. A round table discussion will permit participants to offer views on the security challenges we will face in the future.
