Draft comment and issue handling process for PbD-SE specifications and notes

General process

Issues added at least 7 (calendar) days before a TC meeting will be reviewed before the next meeting, i.e. one of the following things will happen:

- If a resolution can already be reached (e.g. it's just fixing a "bug", etc.), it will be done in mail before the next meeting.
 - If anyone disagrees with the resolution, we can discuss it at the next meeting.
 - If the proposal is substantive (i.e., not a typo) it should be discussed at the next meeting. If there is any question on the substantive nature of an issue, it should be treated as substantive.
- If further clarification / discussion is needed, it will either be done in mail before the next meeting.
- If no consensus is reached on the list before the next meeting, the issue will be added to the agenda for the next meeting.

Responsibilities:

- Proposer: It is the proposer's responsibility to make sure his or her proposal is discussed, received adequate reviews, and voted on at the TC meeting.
- Component Owner: It is the owner's responsibility to look across all issues for his or her component and provide holistic feedback and validate that issues do not conflict.

Fields:

- Description: Describes the issue with any relevant context. This field should only be edited by the reporter to clarify the issue being reported
- Proposal: This describes the proposed resolution of the issue. This field will be kept up to date based on the comments and will be updated by either the reporter or by the owner of the component.
- Resolution: This describes the resolution of the issue when it is closed. This is edited by the owner of the component. If the resolution field contains a resolution, the Fixed Version must specify which version will contain this resolution.

Creating issues:

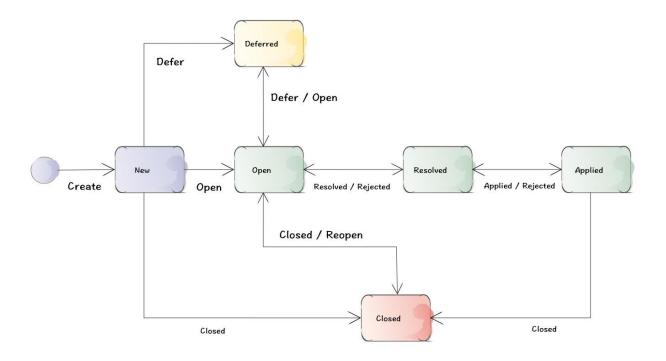

- Issues should address a single item that can be resolved
- Issues that contain more than one item will be updated to reflect a single item
- Issues should be created to capture a discussion. A thread should be created on the mailing list and any issues that arise should be created in the issue tracker.

Editing Issues:

• When editing issues, please add comments instead of editing.

Lifecycle

- New: Issues are created in this state and can transition to Open (Accepted as Work by the TC) or Closed (Rejected)
- Deferred: Not critical; awaiting review by TC
- Open: Issues in this state are accepted as work items for the TC. Proposals are being refined. Issues can transition to Resolved
- Resolved: Issues in this state have proposals that are accepted. At this point, the issue is targeted for a particular Draft. Issues can transition to Applied
- Applied: Issues in this state have been accepted and the draft has been updated. Issues can transition to Closed or Resolved if the changes are rejected. The issue submitter should review the issue and validate it is applied.
- Closed: Issues are closed no work is pending on the issue

Current review sheet (use for comment in June/July 2014) versus JIRA:

Comments-Frank Dawson, Nokia					Date: 2014-06-23	Document: Working Draft 06	
1	2	(3)	4	5	(6)		(7)
MI1	Clause No./ Subclause No./ Annex (e.g. 3.1)	Paragraph/ Figure/Tab le/Note (e.g. Table 1)	Type of com- ment	Comment (justification for change) by the member	Proposed change by the member		Editors Disposition
FD1	Title page	Date	Ed	Date is wrong on the draft distributed on 22 June	Change "Updated: 25 June 2014" to the correct date that the draft is uploaded and distributed. It should read "Updated: 22 June 2014".		
FD2	Title page	Abstract	Ed	Translates is the wrong term.	Change " <u>engineers translates</u> the seven" to "engineers transposes the seven".		
FD3	Title page	Citation format	Ed	The citation text needs correction	Change "Privacy by Design Documentation for Software Engineers (PbD-SE) Version 1.0, 25 June 2014, OASIS Working Draft 01, Revision 5, http://docs.oasis-open- org//pbd-se-v1 0-wd06.docx" to "Privacy by Design Documentation for Software Engineers (PbD-SE) Version 1.0, 22 June 2014, OASIS Working Draft 01, Revision 6, http://docs.oasis-open-org//pbd-se-v1 0- wd06.docx"		

Current review sheet:

- MI (reporter initials)
- Clause No./ Subclause No./ Annex
- Paragraph / Figure / Table / Note
- Type of comment
- Comment (justification for change) by the member
- Proposed change by the member
- Editors Disposition

Current review sheet versus JIRA:

- Standard JIRA feature:
 - MI (reporter initials)
- Component:
 - Clause No./ Subclause No./ Annex
 - Paragraph / Figure / Table / Note
- Description
 - Comment (justification for change) by the member
 - Type of comment
- Proposal
 - Proposed change by the member
- Resolution
 - o Editors Disposition
- Comments
 - o Discussion on proposal / resolution
