

# Registry Issues List

issue_num	category	description	originator	resolution
156	User Misundersta	GetContentRequest is inefficient See <a href="http://lists.oasis-open.org/archives/regrep/200202/msg00066.html">http://lists.oasis-open.org/archives/regrep/200202/msg00066.html</a>	Duane Nickull	There are no unique performance issu
157	Error	Registry.xsd does not declare namespace xsd but has references to it.	Joel Munter	This problem is acknowledged.
158	RFE	Need to remove CVS comment.	Joel Munter	This is not a defect. However, we will
159	Comment	there are many opportunities to leverage the use of UDDI for certain registry requirements without having to recreate them here	Joel Munter	Leverage of UDDI functionality is not
160	Comment	that some areas of the RS are greatly "over-prescribed" (e.g., Semantic Rules Lines 1452-1838 - there are 46 pages worth of Filter Query support alone)	Joel Munter	Over prescription is not a defect in th
161	Comment	there are things in this draft of the RS that simply do not belong (e.g., a WSDL Primer)	Joel Munter	This comment is not relevant. The onl
162	User Misundersta	items that should be clearly stated in the CPP/A spec are stated here (e.g., Section 6.3.2.3)	Joel Munter	The example cited definitely belongs i

163	User Misundersta	referenced Sections are incorrect (e.g., 5.4.1 should be 5.5.1) or are missing, there are at least three Error! reference source not found error	Jole Munter	This comment is irrelevant. There is n
164	User Misundersta	there are still references to DTDs when I believed that we were standardizing on XML Schemas	Joel Munter	The only references to DTD are in ex
165	User Misundersta	page numbers are missing	Joel Munter	All pages have numbers in RS 2.0. Co
166	Comment	and that some areas may need serious improvement but I have not had time to be more specific	Joel Munter	Comment is not specific at all.
167	Comment	GetContentRequest is open to DOS attacks See <a href="http://lists.oasis-open.org/archives/regrep/200202/msg00066.html">http://lists.oasis-open.org/archives/regrep/200202/msg00066.html</a>	Duane Nickull	There are no unique vulnerabilities to
168	Question	In Figure 6, there is no "Updated" status in lifecycle. Is it right or missed?	Chaemee Kim	Not a defect. There is currently no se
169	Error	In 8.4.2. GetContentResponse Message Structure, Is it GetContentResponseMessage? In message fragment, there is <GetContentRequest> instead of Response.	Chaemee Kim	This is a typographical error. The sam

170		In 9.7. Access Control, there is only 3 role as Content owner, registry administrator, registry guest. However, there is no consistency between 5.3. Registry Users, Table1. Actors and Table11. Role. I think it's better to have some consistency to describe the role of actors.	Chaemee Kim	
171	RFE	Do you have a plan not to provide RIM DTD anymore? From Developer's perspective, sometimes we need DTD instead of Schema. Some XML Binding SW doesn;t provide Schema yet.	Chaemee Kim	Now that we are XML schema based
172	Question	Content based query in SQL Query Is there specific request & response for content based query in SQL Query?	Chaemee Kim	No there is no specific request & resp
173	Comment	Is V2.0 backward compatible with V1.0. See: <a href="http://lists.oasis-open.org/archives/regrep/200201/msg00012.html">http://lists.oasis-open.org/archives/regrep/200201/msg00012.html</a>	Kyu-Chul Lee	V2.0 is not backward compatible with

issue_num	category	description	originator	resolution
174	Question	Is "sec 6.6.2.2 Communication Bootstrapping for ebXML message Service" only applied to a "thin client" (as defined in sec 6.6.1)? See: <a href="http://lists.oasis-open.org/archives/regrep/200203/msg00008.html">http://lists.oasis-open.org/archives/regrep/200203/msg00008.html</a>	Kit Ko	6.6.2.2 is relevant when ebXML Mes
