- 100,001 to 200,000 200,001 to 300,000 300,001+

Repository Project - Nature of the Content

What level of application does your Repository support?

- Strategic Tactical Operational Research

What type of Content is registered and /or stored in the repository?

- Web Service Data Dictionary Taxonomy Ontology Data Schemas
 Software Components System Specifications Supporting Documentation
 Messaging Structures Web Page Content / Navigation Business Rules

What is the nature of the content volatility?

- Static Cyclical/Periodic Update Transactional/Volatile

Is this a federated registry / repository? Yes No

Does the repository maintain multiple classifications of content? Yes No

Must the repository maintain historical content views? Yes No

Which trust factors are used in the registry / repository?

- Validation Verification Audit Trail

Repository Project - Implementing the Repository

Does your project leverage both the Registry/Repository and a Semantic Web Application? Yes No

What type of tools did you use to develop the Repository?

- Custom Built Software Existing Applications Open Source Software Vendor Software

Did you perform a bulk load of the Repository? Yes No

How is the Repository maintained?

- Periodic bulk loading Transactional Update Ad hoc Request

What interface / analysis tools do you provide to users?

- Custom Application Commercial Software Package Open Source Software

What percentage of your project was spent in the planning phase of the project?

%

Repository Project - Future
