

# OASIS Federated Identity InterOp Lab

Co-Sponsored by GSA E-Authentication Initiative and RSA Security

## Booth #1242

Wednesday  
10:00 am - 5:00 pm

Thursday  
10:00 am - 3:00 pm

Organizations from around the globe come together to demonstrate interoperability using the Security Assertion Markup Language (SAML) v2.0 OASIS Standard. SAML enables secure exchange of authentication, attribute, and authorization information between disparate security domains, which makes vendor-independent web single sign-on and secure e-business transactions possible. Participants in the Lab will demonstrate vendor interoperability and the practical application of SAML v2.0 technology to solve real-world business problems.

### OASIS Federated Identity InterOp Participants Include:

“SAML is a proven standard offering implementers opportunities for productivity gains, cost savings, risk transference, and competitive advantage.”

Dan Blum  
Senior VP  
Burton Group

# OASIS Membership:

## One Organization, Many Opportunities

As a member of OASIS, you gain the power to influence the standards that shape our industry, whether you represent a:

- user** seeking to ensure your business requirements are met;
- government agency** wanting to minimize overlap of standards and reduce the risk in recommending new technology;
- software provider** driving industry cooperation through standards; or
- industry group** coordinating domain efforts with foundational work.

Benefits of membership:

- Participate in as many OASIS Committees as you choose
- Initiate new Committees to address identified market needs
- Influence the direction of existing Committees by contributing technical work and articulating preferences
- Gain access to early drafts of new specifications
- Identify partners and develop joint solutions
- Unify fragmented efforts to speed implementation
- Liaise with related efforts at OASIS to address convergence and interoperability issues at the development stage
- Protect development efforts from single-vendor bias
- Expand visibility through participation in interoperability events
- Work alongside the industry's most influential experts
- Learn and adopt best practices
- Foster a greater variety of competitive solutions
- Lower the cost of implementation
- Contribute to work respected as the product of the OASIS open process

### Where Members Drive the Agenda

OASIS believes widespread adoption is best achieved when all those affected by a standard participate in its development and implementation. We offer a range of dues to support an inclusive, balanced member base, where users and vendors, governments and universities all have a seat at the table.

<i>Level</i>	<i>Annual Dues (USD)</i>
Foundational Sponsor .....	45,000
Sponsor .....	13,500
Contributor	
10 or more employees .....	5,750
Less than 10 employees .....	2,750
Non-profit .....	1,000
Unaffiliated Individuals .....	250

OASIS is a not-for-profit, international consortium dedicated to the development, convergence, and adoption of e-business standards. OASIS Standards are developed through an open process, one that provides for fairness, transparency and full participation from the entire community.
