### **POL-TA-40010**

Mike E: I don't think it is easy to write a testcase for a predicate that contains IFs like this  
Ashok explains that originally there were separate assertions, but it was hard to see how they combined - this new formulation shows the combinations

**ACTION 20090615-01: Dave - to drive a resolution to POL-TA-40010**

### **POL-TA-90023A**

### **POL-TA-90023B**

### **POL-TA-90024**

Mike E: I think that:

Target: Component with reference marked @OneWay

Prereqs:

- 1) Component is marked to run under a transaction (managedTransaction etc)
- 2) Component invokes a method of the reference marked @OneWay

Predicate: Transaction context is not propagated with the message sent from the reference

### **POL-TA-90025**

Discussion of the use of the word "message" in the text of the TA

Mike E: POL90025 uses the term "method"

Dave: Yes, the spec text talks about "OneWay method"

Mike E: I think that the Target is a Component reference which is marked with @OneWay and also with the propagatesTransaction intent

Dave: Don't you have to have the component run under a Transaction?

Mike E: Nope, the spec does not make such a requirement

## **POL-TA-90026**

Dave: I wonder if this statement should not be a normative statement

Mike: ...or the normative statement needs some serious rewording

Dave: POL90004 already says the main requirement - that the component runs under a local tran

Dave: I suggest making the text non-normative

**ACTION: 20090615-02: Dave to look at POL90026 and decide on rewording/removal of normative statement**

## **POL-TA-90027A**

## **POL-TA-90027B**

Dave: One of the pre-reqs should be the target

Ashok: OK, I'll fix that

Ashok: Will make the implementation the target

## **POL-TA-90027C**

## **POL-TA-90027D**

## **POL-TA-100001**

## **POL-TA-100002**

## **POL-TA-100003**

## **POL-TA-100004**

Ashok: Let's start with section 10 next week
