ISSUE 87:Clarification re. value of appliesTo

<http://www.osoa.org/jira/browse/POLICY-87>
Ashok presents the issue
the appliesTo examples don't look like XPath
Mike E moves to open Issue 87
Eric seconds
Motion passes unanimously

Resolution: Issue 87 is Opened

(Item 10) Testing Discussion

Eric's action item:

<http://lists.oasis-open.org/archives/sca-policy/200906/msg00027.html>

Document: SCA_Policy_Test_Assertions_EW_June_15.doc

Eric explains what he has done - separating out the testcases relating to optionality
The test suite will have to know in advance what capabilities the runtime is claiming

These are POL-TA-40001A, B, C

Dave: We did previously discuss the possibility that the test suite Bridge code could contain the information about what is supported

<Discussion of how the selection of applicable testcases actually takes place>

Dave: The testcases discussion is at a tangent - let's get back to the actual new assertions here

Ashok: I will take all 9 of the POL-TA-40001x and fold them in.

Ashok's document: SCA_Policy_Test_Assertions_02_June15.doc
Starting in Section 10

POL-TA-100001

<discussion of the Bindings Issue relating to default qualifier for a qualified intent>

POL-TA-100002

POL-TA-100003

POL-TA-100004

Ashok: Notes that it will be difficult to build a testcase for this assertion - might need a technique like sniffers on the wire?

POL-TA-100005

POL-TA-100006

Dave: This needs more work since this is for a Callback scenario, so there are some pre-reqs here

eg reference implements a service interface with a callback interface

POL-TA-110001

Dave: Shouldn't the target here be the Composite file?

Ashok: OK, I'll change the target here

Ashok: What is the next step on this TestAssertions document? Produce a final cleaned up version - or do folks want to look at it again?

Dave: It should be cleaned up and made stable, as if going for a CD
