## Call for experts for ISO/TC 154/WG 4 "Electronic Layout Key"

ISO/TR project

Dear TC 154 member,

At the last TC meeting on 14<sup>th</sup> September 2011 in Geneva a New Work Item Proposal (NWIP) on the development of a Technical Report regarding the progress of ISO 6422 "Layout key for trade documents" was approved. This project was initiated to provide more clearance on an appropriate extension of ISO 6422 for electronic documents as already registered as Work Item ISO 6422-2.

The foreseen Technical Report should reflect the different views of interested parties on their business needs and provide guidance how to proceed with a relevant ISO standard. The minimal requirements for the ISO/TR project are as follows:

- provide a linkage to the "paper-based documents" part (ISO 6422-1:2010);
- be independent of any messaging syntax (grammar);
- provide linkage/reference to ISO 7372/TDED;
- taking into account the requirements of international trade to map current paper based documents into the electronic environment.

In order to start with the work in ISO/TC 154/WG 4 this call of experts shall ensure to incorporate all interested parties. The experts especially should have knowledge of:

- Single Administrative Documents (SAD) used in international trade;
- the UN layout key and the UNTDED / EDED (EDIFACT Directory of Data Elements);
- the conversion of paper-documents into electronic documents; and
- semantic web specifications like Web Ontology Language (OWL) and Resource Description Framework (RDF).

Any nomination should be send to the ISO/TC 154 secretariat ([maarten.peelen@nen.nl](mailto:maarten.peelen@nen.nl)) by **14 January, 2012**.

Sincerely yours,  
Michael Dill, ISO/TC 154/WG 4 Convenor
