## Statement of use – UBL 2.2 – for OASIS

We hereby affirm that the Norwegian Agency for Public Management and eGovernment (Difi) has successfully implemented UBL 2.2 in formats when testing eTender documents in the e-Sens project (e-Sens has been to consolidate and solidify the work done in previous [Large Scale Pilots](#), providing generic IT solutions for cross-border communication which can be applied to any policy domain). Difi has through the e-Sens project tested formats from other parties and sent eTender files within the project successfully.

Difi, an organizational member of OASIS, has been successfully using the UBL 2.2 Committee Specification 01, as approved and published by OASIS on March 22, 2018 in accordance with the mandatory conformance clauses specified therein and OASIS policy.

Best regards  
for Difi

André Hoddevik  
Head of Unit

Jens Aabol  
Senior advisor Difi and Representative OASIS
